Amith,2005-10-10 The M bius Strip explores the history political economy and culture of space in central Guerrero Mexico during the colonial period This study is significant for two reasons First space comprises a sphere of contention that affects all levels of society from the individual and his or her household to the nation state and its mechanisms for control and coercion Second colonialism offers a particularly unique situation for it invariably involves a determined effort on the part of an invading society to redefine politico administrative units to redirect the flow of commodities and cash and ultimately to foster and construct new patterns of allegiance and identity to communities regions and country Thus spatial politics comprehends the complex interaction of institutional domination and individual agency The complexity of the diachronic transformation of space in central Guerrero is illustrated through an analysis of land tenure migration and commercial exchange three salient and contested aspects of hispanic conquest The M bius Strip therefore addresses issues important to social theory and to the understanding of the processes affecting the colonialization of non Western societies
