European Community Dairy Sector , 1986 **European Communities** John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community s target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992

Commercial Law of the European Union Gabriël Moens, John Trone, 2010-04-23 The Hon Michael Kirby AC CMG This splendid book performs the heroic task of introducing readers to the large canvas of the commercial law of the European Union EU The EU began as an economic community of six nations but has grown into 27 member states sharing a significant political social and legal cohesion and serving almost 500

million citizens It generates approximately 30% of the nominal gross world product The EU is a remarkable achievement of trans national co operation given the history including recent history of national racial ethnic and religious hatred and conflict preceding its creation Although as the book recounts the institutions of the EU grew directly out of those of the European Economic Community created in 1957 1 20 the genesis of the EU can be traced to the sufferings of the Second World War and to the disclosure of the barbarous atrocities of the Holocaust Out of the chaos and ruins of historical enmities and the shattered cities and peoples that survived those terrible events arose an astonishing pan European Movement **The**

Union and the Use of Force Julia Schmidt,2020-09-07 In *The European Union and the Use of Force* Julia Schmidt examines the development and activities of the EU as an emerging international military actor The author offers a comprehensive analysis of the conditions under which the EU can engage in military crisis management operations from the perspective of EU law as well as from the perspective of public international law with a particular emphasis on the EU's relationship with the United Nations and the EU's relationship with its Member States in the context of the use of force Throughout the monograph questions of European integration in the sphere of the common security and defence policy as well as the EU's place and role within the international community are put into focus **European Union Foreign Policy** Hazel

Smith,2002-03-20 As the European Union is not a nation state it is not generally perceived to have a foreign policy However this book argues that quite the reverse is true that an overemphasis on procedure and structures has disguised the fact that the EU has a clear foreign policy that can be analysed in much the same way as that of the sovereign state Conventional assessments of the EU focus on the mechanisms institutions and treaties through which policies are implemented Smith shows how this can lead to a massive underestimation of the capacities of the EU Rather than concentrating on how the policy of the EU is made Smith investigates the action that it has engaged in abroad and the nature of its diverse global interventions in relation to the United States and the industrialised North the various regions of the South and most recently its huge involvement in east and central Europe and the entire European continent Developing a pathbreaking analysis of the

nature of EU foreign policy this comprehensive account shows how the EU can be very effective indeed in promoting its own domestic interests abroad

EU Powers Under External Pressure Christina Eckes, 2019-01-15 EU external actions have deep constitutional and institutional implications for EU law and practices The EU's competences in external relations have continuously increased including with the entry into force of the Treaty of Lisbon As a result the EU has become ever more active in external relations This has in turn increased the internal constitutional and institutional effects of EU external actions This book traces these legal effects and the broader constitutional implications including potential integrative forces EU external actions affect the power division between the EU and its Member States and between the different EU institutions the unity and autonomy of the EU legal order the role and position of Member States on the international plane their autonomy the relationship between national international and EU law and the ability of EU citizens to identify who is responsible for a particular action or policy as well as their legitimate expectation that the EU takes action on their behalf The chapters demonstrate the interpretation of organizational principles such as sincere cooperation subsidiarity primacy and coherence changes in the context of external relations how the choice of an external legal basis rather than an internal legal basis affects the powers of the Union and its Member States what power shifts happen when policies are determined in international agreements rather than in internal decision making and how EU participation in international dispute settlement mechanisms affects the autonomy and legitimacy of the EU
