There are ways of being in the world that create a flourishing life and other ways that restrict that life both for ourselves and others. Listening is one of these ways of being. Listening gives shape to speaking, inviting other people into a dialogue that impacts our everyday lives. Our acts of listening like all communication are shaped by our cultural and individual differences. Unfortunately, as people consider ways to ethically listen, they often abide by a set of conversational rules that do not reflect or benefit their own or others' unique contexts and communities. In this book, Parks responds to gaps in scholarship related to listening in communication research and difference in ethics scholarship. Rather than imposing a rigid ethical norm that is unresponsive to diverse cultural practices, her proposed listening ethic is one that is highly contextualized and pluralistic and yet dares to make normative claims. Using discourse research methods that are both qualitative and quantitative, Parks goes beyond describing what listening is in a given context to what ethical listening should be. Empirical findings about listening from multiple communities that represent diverse ethnic, gender, and disability orientations are interwoven with insights from communication ethics to develop the first ever dialogic ethics of listening that is empirically based, culturally grounded, and normative. Ten shared values emerge as guidelines for good listening in this ethic: be open, cultivate understanding, practice authenticity, engage in critical thinking, invest in relationship, care for the dialogue, focus on what matters, be intentionally present, remember the ongoing story, and be responsive to need. These values, while shared across cultures, may be expressed in a diverse and sometimes conflicting communicative practices. Ultimately, Parks proposes that ethical listening is best conceptualized as pursuit of sustainable hospitality in our dialogic interactions within and across difference. By understanding the ways that different people share listening values yet practice them differently, we can learn to trust each other and attest to the hope that ethical dialogue is possible.

**Musical Listening in the Age of Technological Reproduction** Gianmario Borio, 2016-04-29

It is undeniable that technology has made a tangible impact on the nature of musical listening. The new media have changed our relationship with music in a myriad of ways, not least because the experience of listening can now be prolonged at will and repeated at any time and in any space. Moreover, among the more striking social phenomena ushered in by the technological revolution, one cannot fail to mention music's current status as a commodity and popular music's unprecedented global reach. In response to these new social and perceptual conditions, the act of listening has diversified into a wide range of patterns of behaviour which seem to resist any attempt at unification. Concentrated listening, the form of musical reception fostered by Western art music, now appears to be but one of the many ways in which audiences respond to organized sound. Cinema, for example, has developed specific ways of combining images and sounds, and more recently, digital technology has redefined the standard forms of mass communication.

Information is aestheticized and music in turn is incorporated into pre existing symbolic fields This volume the first in the series Musical Cultures of the Twentieth Century offers a wide ranging exploration of the relations between sound technology and listening practices considered from the complementary perspectives of art music and popular music music theatre and multimedia composition and performance ethnographic and anthropological research **Everyday Music**

**Listening** Ruth Herbert,2016-04-15 In what ways does listening to music shape everyday perception Is music particularly effective in promoting shifts in consciousness Is there any difference perceptually between contemplating one s surroundings and experiencing a work of art **Everyday Music Listening** is the first book to focus in depth on the detailed nature of music listening episodes as lived mental experiences Ruth Herbert uses new empirical data to explore the psychological processes involved in everyday music listening scenarios charting interactions between music perceiver and environment in a diverse range of real world contexts Findings are integrated with insights from a broad range of literature including consciousness studies and research into altered states of consciousness as well as ideas from ethology and evolutionary psychology suggesting that a psychobiological capacity for trancing is linked to the origins of making and receiving of art The term trance is not generally associated with music listening outside ethnomusicological studies of strong experiences yet hypnotic like involvements in daily life have long been recognized by hypnotherapy researchers The author argues that multiply distributed attention prevalent in much contemporary listening does not necessarily indicate superficial engagement Music emerges as a particularly effective mediator of experience Absorption and dissociation as manifestations of trancing are self regulatory processes often operating at the level of unconscious awareness that support individuals perceptions of psychological health This fascinating study brings together research and theory from a wide range of fields to provide a new framework for understanding the phenomenology of music listening in a way that will appeal to both specialist academic audiences and a broad general readership **The Art of Listening** R. S. White,2015-10-23 Originally published in 1986

This collection of essays is unified by one leading idea that the active and creative abilities of listeners and readers deserve as much attention as the skills of speakers and writers It is shown that hearers far from being passive recipients in the communicative process are in fact active in selecting interpreting and creating from the disparate signals they receive Equally readers are involved in creating individual patterns of significance from a text In presenting this argument some essays deal with the importance of gender considerations some with special modes of writing such as the private diary and literary translations and others with the more familiar fields of poetry and drama In the sphere of popular music distinctions such as folk and pop indicate special problems in assessing the authenticity of a listener s response By concentrating on active listening the collection develops and illustrates the conviction that there are fundamental premises underlying the various disciplines under review the analysis of which makes for a fuller understanding of communication in all its forms

**Listen Like a Dog** Jeff Lazarus,2016-04-26 Have you ever talked to a dog Not just the Who s a good boy Spike s a good
