## **The Fall Rise Of Eros:**

**Music's Making** Michael Cherlin, 2024-07-01 A personal voyage of discovery drawing on musicology literary theory Jewish studies and philosophical phenomenology As a work of musical theory or meta theory Music s Making draws extensively on work done in philosophy and literary criticism in addition to the scholarship of musicologists and music theorists Music s Making is divided into two large parts The first half develops global attitudes toward music emergence out of self and hearing through drawing on Kabbalah and other sources middle voice as discussed in philosophical phenomenology liminal space as discussed in literary theory an ethics of intersubjectivity drawing on Levinas and character canon and metaleptic transformations drawing chiefly on Harold Bloom The second half embodies a search for metaphors figurative language toward understanding music s endlessly variegated shaping of time space The musicians and scholars who inform this part of the book include Pierre Boulez Gilles Deleuze Anton Webern Morton Feldman and James Dillon The book closes with an extended inquiry into the metaphors of horizontal and vertical experience and the spiritual qualities of musical experience expressed through those metaphors

**Homosexualities** Stephen O. Murray, 2002-06 Breathtaking in its historical and geographical scope this book provides a sweeping examination of the construction of male and female homosexualities stressing both the variability of the forms same sex desire can take and the key recurring patterns it has formed throughout history An indispensable resource on same sex sexual relationships and their social contexts Essential reading Choice P romises to deliver a lot and even more extraordinarily succeeds in its lofty aims O riginal and refreshing A sensational book part of what I see emerging as a new commonsense revolution within academe Kevin White International Gay and Lesbian Review

**Before Sexuality** David M. Halperin, Froma I. Zeitlin, 1990 A dream in which a man has sex with his mother may promise him political or commercial success according to dream interpreters of late antiquity who unlike modern Western analysts would not necessarily have drawn conclusions from the dream about the dreamer s sexual psychology Evidence of such shifts in perspective is leading scholars to reconsider in a variety of creative ways the history of sexuality In these fifteen original essays eminent cultural historians and classicists not only discuss sex but demonstrate how norms practices and even the very definitions of what counts as sexual activity have varied significantly over time Ancient Greece offers abundant evidence for a radically different set of sexual standards and behaviors from ours Sex in ancient Hellenic culture assumed a variety of social and political meanings whereas the modern development of a sex centered model of personality now leads us to view sex as the key to understanding the individual Drawing on both the Anglo American tradition of cultural anthropology and the French tradition of les sciences humaines these essays explore the iconography politics ethics poetry and medical practices that made sex in ancient Greece not a paradise of liberation but an exotic locale hardly recognizable to visitors from the modern world In addition to the editors the contributors to this volume are Peter Brown Anne Carson Franoise Frontisi Ducroux Maud W Gleason Ann Ellis Hanson Franois Lissarrague Nicole Loraux

Maurice Olender S R F Price James Redfield Giulia Sissa and Jean Pierre Vernant      **Sophia** Caitlín Matthews, 2013-09-20  
 Anyone interested in the feminine face of God throughout the ages will find Sophia an illuminating experience Caitlin Matthews scholarship connects us to past present and future in the very depths of our femininity Marion Woodman Jungian analyst and author of Bone Dying into Life Sophia or wisdom in Greek has been revered in many forms throughout history from the Dark Goddess of ancient Anatolia to her Egyptian Greek Celtic and Cabalistic manifestations to her current forms as Mary and the orthodox St Sophia In the Gnostic Gospel of Thomas Sophia sits with God until the creation Then she falls into matter and becomes manifest in every atom permeating all things like the sparks that run through charcoal as Matthews says While God is out there the Goddess is in here the mother wit of practical inspiration and compassion at the heart s core This definitive work comprehensively establishes a realistic Goddess theology for Westerners in the twenty first century grounding spirituality in daily life and the natural world learning to work playfully and play seriously ending the gender war to enjoy sacred marriage      **Renewing the Balance** Dirk Dunbar, 2017-03-31 In *Renewing the Balance* Dirk Dunbar shows how the balance worshipped in ancient Earth wisdom traditions is being integrated into Western culture s dominantly masculine rational value system Filled with hope revelations regarding cultural evolution and scholarship of the highest order Dunbar s book passionately challenges all of us to recover the archaic reverence for the natural world to reconsider the limits of growth progress and mechanistic thinking and to join in the newly reclaimed celebration of life that fosters peace and the potential for a sustainable future Dirk Dunbar s *Renewing the Balance* is a crucial and comprehensive account of how traditional cultures maintained a healthy balance that preserved our natural world and how our modern technocratic economic ideology has produced a culture that is dangerously out of balance It is at once a diagnosis of our dis ease and a prescription for healing our collective psyche polis and environment A truly fascinating philosophical adventure Sam Keen Author of 12 books including *The Passionate Life* and *Hymns to an Unknown God* *Renewing the Balance* brings depth and breadth to our efforts to understand how Western culture evolved as it did and to appreciate the many streams that now flow into our efforts to manifest ecological wisdom in a hypermodern world Charlene Spretnak Author of 9 books including *States of Grace* and *The Resurgence of the Real*      The subject of love Sal Renshaw, 2013-07-19 *The Subject of Love* H l ne Cixous and the Feminine Divine is about abundant generous other regarding love In the history of Western ideas of love such a configuration has been inseparable from our ideas about divinity and the sacred often reserved only for God and rarely thought of as a human achievement This book is a substantial engagement with her philosophies of love inviting the reader to reflect on the conditions of subjectivity that just might open us to something like a divine love of the other Renshaw follows this thread in this genealogy of abundant love the thread that connects the subject of love from 5th century B C E Greece and Plato to the 20th century protestant theology of agapic love of Anders Nygren to the late 20th century poetico philosophy of H l ne Cixous This study will be of particular interest to academics and students of the history of gender cultural studies

criticism and gender studies      **The Map in the Machine** Luis F. Alvarez Leon, 2024-04-30 Digital technologies have changed how we shop work play and communicate reshaping our societies and economies To understand digital capitalism we need to grasp how advances in geospatial technologies underpin the construction operation and refinement of markets for digital goods and services In *The Map in the Machine* Luis F Alvarez Leon examines these advances from MapQuest and Google Maps to the rise of IP geolocation ridesharing and a new Earth Observation satellite ecosystem He develops a geographical theory of digital capitalism centered on the processes of location valuation and marketization to provide a new vantage point from which to better understand and intervene in the dominant techno economic paradigm of our time By centering the spatiality of digital capitalism Alvarez Leon shows how this system is the product not of seemingly intangible information clouds but rather of a vast array of technologies practices and infrastructures deeply rooted in place mediated by geography and open to contestation and change      **The Myth of Analysis** James Hillman, 1997 In this work acclaimed Jungian James Hillman examines the concepts of myth insights eros body and the mytheme of female inferiority as well as the need for the freedom to imagine and to feel psychic reality By examining these ideas and the role they have played both in and outside of the therapeutic setting Hillman mounts a compelling argument that rather than locking them away in some inner asylum or subjecting them to daily self treatment man's peculiarities can become an integral part of a rich and fulfilling daily life Originally published by Northwestern University Press in 1972 this work had a profound impact on a nation emerging self aware from the 1960s as well as on the era's burgeoning feminist movement It remains a profound critique of therapy and the psychological viewpoint and it is one of Hillman's most important and enduring works      **Falling in Love** Ayala Pines, Ayala Malach Pines, 2013-05-13 *Falling in Love* is the first book to unlock the mysteries of how and why we fall in love Renowned psychologist Ayala Pines shows us why we fall for the people we do and argues convincingly that we love neither by chance nor by accident She offers sound advice for making the right choices when it comes to this complicated emotion Packed with helpful suggestions for those seeking love and those already in it this book is about love's many puzzles The second edition furthers the work of the popular and successful first edition With expanded research theory and practice this book once again provides one of a kind understandings of the experience of love The new edition offers updated references to recent research new chapter exercises and case examples of romantic stories to begin each chapter      **An Epigrammatic Voyage** Denton Jaques Snider, 1886      **The Snow Cone Diaries** Juan Valdez, 2014-05-15 The content in this work is fiction fiction in the sense that the main character through which the eyes of this metaphysical and philosophical journey is viewed Charlie is not a real character nor are his counterparts and foils through which he explores various topics such as love the meaning of existence or the origins of the cosmos and how our understanding of these abstract ideas have evolved since the dawn of civilization But like any work of fiction the characters do have some basis in real experience from which of course nothing can be created The intent of the work is to explore the foundations and evolution of knowledge and

the boundaries between reason and faith boundaries which from the authors perspective are not quite as clear as some might have us believe And the point of going through the exercise the purpose as it were is not only for the author to come to a better understanding of how all our modern branches of science hang together how they have come to be given their socio political and historical context but also for others to share in his journey and perhaps learn something along the way Since the birth of language and thought even going back thousands of years and even prior to the dawn of civilization itself mankind has attempted to answer two fundamental questions questions that have spurred countless creative forces and branches of thought over the centuries namely who we are and from whence we came The answers to these questions no matter what race religion or creed the seeker might be or what philosophy or religion they might adhere to are inextricably linked to each other This journey of trying to understand our place in the world and the origins of the universe itself is an ageless quest that in many respects distinguishes mankind from the rest of the creatures on the planet Furthermore this very same quest to answer the same questions fuels not only scientific development but also is the basis for theology and religion both approaching the same set of questions with a different set of tools and with a different mindset but both trying to answer the same set of basic questions as to who we are and how we got here From the authors perspective in order to answer these questions effectively in the Information Age we should have at least some understanding of the history of our answers to these questions as they have evolved over time For we all build our collective knowledge on those that have come before us whether we recognize this or not And in turn that in building this bridge a common metaphor used throughout the work we must leverage the tool of metaphysics a term originally coined by Aristotle but in the context of this work implies a level of abstraction that sits above physics as we understand it in todays world but also provides a conceptual underpinning to all of the branches of knowledge that collectively make up our understanding of the world and our place in it In doing so it is the authors hope that we can not only come to a more complete and fuller understanding of the answers to these basic human questions that have plagued mankind since time immemorial but also at the same time perhaps develop a deeper understanding of the problems of life in the Information Age and how we might best approach them or cope with them in way that not only benefits ourselves as individuals but to society as a whole to which our individual well being depends upon whether or not we recognize it or not

Creation: A Guide for the Perplexed Simon Oliver, 2017-06-29 This addition to our popular Guides for the Perplexed series tackles a subject that is enjoying renewed debate Christianity along with Judaism and Islam claims that the universe is not a brute fact It is created But what do we mean by creation Do we mean that the universe is designed Is it the product of an evolutionary process How are creatures related to God and does God act within creation Simon Oliver begins with the background to the Christian theology of creation in Greek philosophy and the Old Testament This provides a route into understanding the claim that we are part of a created order that is also the theatre of God s providential action He examines different understandings of creation including creation out of nothing and the analogy of

being with close reference to the work of patristic and medieval theologians such as Augustine and Thomas Aquinas This leads to an historical overview of the relationship between theological philosophical and scientific approaches to creation in the modern period Some of the ethical issues concerning humanity's place within and treatment of creation and our environment are also examined A distinctive yet traditional theology of creation is proposed focused on the concepts of gift and participation as ways of understanding more fully the meaning and implications of the claim that the universe is created

Summerson,2020-12-29 In Exegesis of the Human Heart Andrew J Summerson explores how Maximus the Confessor uses biblical interpretation to develop an account of human passibility from fallen human passions to perfected human emotions among the divinized This book features Maximus's role as a creative interpreter of tradition Maximus inherits Christian thinking on emotion which revises Stoic and Platonic thought according to biblical categories Through a close reading of Quaestiones ad Thalassium and a wide selection of Maximus's works Andrew J Summerson shows that Maximus understands human emotion in an exegetical milieu and that Maximus places human emotion at the heart of his soteriology Christ redeems passibility so the divinized can enjoy perfected emotional activity in the ever moving repose of eternal life *The Challenge of Islam* Norman O. Brown,2009-08-04 The Prophetic Tradition The Challenge of Islam is an enlightening set of

lectures given by Norman O Brown during the 1980s exploring a wide ranging array of topics concerning Islam Brown reveals the overlooked relationship between Islam and early Christianity exploring Islam s relation to and revision of the Christian tradition the literary innovation of the Qu ran the nature of revolutionary and political Islam and the vision of a world civilization Throughout these lectures which are remarkably pertinent today Brown seeks to educate the reader on misunderstood areas of Islam including the split between the Sunni and Shi ite sects and Islam s exemplification of the broad themes of art and imagination in human life The author s world historical perspective of religion and tradition gives readers a crucial alternative to the divisive clash of civilizations view that paints Islam as at odds with the West He exposes the unifying strands between Islam and early Judeo Christian doctrine showing that Islam is in fact a genuine part of Western tradition and more importantly part of a global tradition that embraces us all

**Transforming Psyche** Barbara Weir Huber, 1999-08-05 In Transforming Psyche Huber shows that the myth of Psyche and Eros can be interpreted to illuminate the experiences of twentieth century women In contrast to the portrayal of Psyche as indecisive and amorphous Huber emphasizes those aspects of the tale that describe Psyche s connectedness to her sisters her own sexuality her earth bound experience and ultimately to the birthing of her child Using the works of such writers as Emily Carr Margaret Laurence Gertrude Stein and Virginia Woolf Huber demonstrates that feminist theory and women s autobiography mirror the insights uncovered in her retelling of the Psyche story
