Japanese Americans at Heart Mountain Saara Kekki, 2022-07 On August 8 1942 302 people arrived by train at Vocation Wyoming to become the first Japanese American residents of what the U.S. government called the Relocation Center at Heart Mountain In the following weeks and months they would be joined by some 10 000 of the more than 120 000 people of Japanese descent two thirds of them U.S. citizens incarcerated as domestic enemy aliens during World War II Heart Mountain became a town with workplaces social groups and political alliances in short networks These networks are the focus of Saara Kekki's *Japanese Americans at Heart Mountain* Interconnections between people are the foundation of human societies Exploring the creation of networks at Heart Mountain as well as movement to and from the camp between 1942 and 1945 this book offers an unusually detailed look at the formation of a society within the

incarcerated community specifically the manifestation of power agency and resistance Kekki constructs a dynamic network model of all of Heart Mountain's residents and their interconnections family political employment social and geospatial networks using historical big data drawn from the War Relocation Authority and narrative sources including the camp newspaper Heart Mountain Sentinel For all the inmates life inevitably went on people married had children worked and engaged in politics Because of the duration of the incarceration many became institutionalized and unwilling to leave the camps when the time came Yet most individuals Kekki finds took charge of their own destinies despite the injustice and looked forward to the day when Heart Mountain was behind them Especially timely in its implications for debates over immigration and assimilation Japanese Americans at Heart Mountain presents a remarkable opportunity to reconstruct a community created under duress within the larger American society and to gain new insight into an American experience largely lost to official history

K. Onodera, Fumihiko Kajiya, Y. Maruyama, Gerald A. Klassen, H. Tomoiike, Jos A.E. Spaan, K. Tsujioka, Julien I.E. Hoffman, 2012-12-06 Coronary heart disease is one of the major health problems in industrialized nations because of its high incidence and severity. Recent innovations in medical and surgical treatment of coronary heart disease have increased the importance of accurate diagnostic methods for determining the severity of coronary disease, identifying potential treatment alternatives, and evaluating the results of treatment. Great advances have also been made in basic research on coronary circulation and its interaction with myocardial contraction and relaxation and neural and humoral control. With respect to these developments, the papers included in the present monograph deal with important topics concerned with the basic mechanism of coronary circulation as well as ones of clinical relevance. It is directed toward physicians, cardiologists, cardiac surgeons, cardiac radiologists, anesthesiologists, and others, and basic scientists, e.g., physiologists, bioengineers. We would like to emphasize the importance of a multidisciplinary approach in which basic scientists and clinicians work closely together. This volume consists of nine chapters. Chapter 1 contains macroscopic and microscopic descriptions of coronary vascular anatomy, which is closely related to the functions of coronary circulation. In Chap. 2, two methods in current use to evaluate phasic coronary blood velocity waveforms are presented, i.e., the laser Doppler and ultrasound Doppler methods. Chapter 3 describes the mechanical properties of coronary circulation, a knowledge of which is indispensable for an understanding of coronary arterial and venous blood flow velocity waveforms in relation to cardiac contraction and relaxation. **Ambient Assistive Health and Wellness Management in the Heart of the City** Mokhtari Mounir, Ismail Khalil, Jérémy Bauchet, Daqing Zhang, Chris D. Nugent, 2009-06-29 This book constitutes the refereed proceedings of the 7th International Conference On Smart Homes and Health Telematics ICOST 2009 held in Tours, France, in July 2009. The 27 revised full papers and 20 short papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on cognitive assistance and chronic diseases management, ambient living systems, service continuity, and context awareness, user modeling, and human-machine interaction, ambient intelligence, modeling, and privacy issues, human behavior, and activities monitoring. *Fundamental of Machine Learning* Dr. Khongdet Phasinam, Dr. Alok Kumar Singh, Ms. Tanya Singh, M.
