Bob Woodward. In *Republic of Spin*, a vibrant history covering more than one hundred years of politics, presidential historian David Greenberg recounts the rise of the White House spin machine from Teddy Roosevelt to Barack Obama. His sweeping, startling narrative takes us behind the scenes to see how the tools and techniques of image making and message craft work. We meet Woodrow Wilson convening the first White House press conference, Franklin Roosevelt huddling with his private pollsters, Ronald Reagan's aides crafting his nightly news sound bites, and George W. Bush staging his Mission Accomplished photo op. We meet too the backstage visionaries who pioneered new ways of gauging public opinion and mastering the media figures like George Cortelyou, TR's brilliantly efficient press manager, 1920s ad whiz Bruce Barton, Robert Montgomery, Dwight Eisenhower's canny TV coach, and of course the key spinmeisters of our own times from Roger Ailes to David Axelrod. Greenberg also examines the profound debates Americans have waged over the effect of spin on our politics. Does spin help our leaders manipulate the citizenry? Or does it allow them

to engage us more fully in the democratic project Exploring the ideas of the century's most incisive political critics from Walter Lippmann and H L Mencken to Hannah Arendt and Stephen Colbert *Republic of Spin* illuminates both the power of spin and its limitations its capacity not only to mislead but also to lead *The Dynamics of Advertising* Jackie Botterill,Iain MacRury,Barry Richards,2013-12-19 The authors suggest that advertisements while important in our daily emotional self management are far more closely linked to the pragmatics of everyday life than their symbolic richness might suggest Recent trends in advertisement content point to an important shift in our relationship to goods that reflects an increasing preoccupation with risk management *Adman's Dilemma* Paul Rutherford,2018-01-01 The Adman's Dilemma is a cultural biography that explores the rise and fall of the advertising man as a figure who became effectively a licensed deceiver in the process of governing the lives of American consumers Apparently this personage was caught up in a contradiction both compelled to deceive yet supposed to tell the truth It was this moral condition and its consequences that made the adman so interesting to critics novelists and eventually filmmakers The biography tracks his saga from its origins in the exaggerated doings of P T Barnum the emergence of a new profession in the 1920s the heyday of the adman's influence during the post WW2 era the later rebranding of the adman as artist until the apparent demise of the figure symbolized by the triumph of that consummate huckster Donald Trump In *The Adman's Dilemma* author Paul Rutherford explores how people inside and outside the advertising industry have understood the conflict between artifice and authenticity The book employs a range of fictional and nonfictional sources including memoirs novels movies TV shows websites and museum exhibits to suggest how the adman embodied some of the strange realities of modernity *Brainwashed* Sally Satel,Scott O. Lilienfeld,2013-05-16 This provocative account of our obsession with neuroscience brilliantly illuminates what contemporary neuroscience and brain imaging can and cannot tell us about ourselves providing a much needed reminder about the many factors that make us who we are What can't neuroscience tell us about ourselves Since fMRI functional magnetic resonance imaging was introduced in the early 1990s brain scans have been used to help politicians understand and manipulate voters determine guilt in court cases and make sense of everything from musical aptitude to romantic love In *Brainwashed* psychiatrist and AEI scholar Sally Satel and psychologist Scott O Lilienfeld reveal how many of the real world applications of human neuroscience gloss over its limitations and intricacies at times obscuring rather than clarifying the myriad factors that shape our behavior and identities Brain scans Satel and Lilienfeld show are useful but often ambiguous representations of a highly complex system Each region of the brain participates in a host of experiences and interacts with other regions so seeing one area light up on an fMRI in response to a stimulus doesn't automatically indicate a particular sensation or capture the higher cognitive functions that come from those interactions The narrow focus on the brain's physical processes also assumes that our subjective experiences can be explained away by biology alone As Satel and Lilienfeld explain this neurocentric view of the mind risks undermining our most deeply held ideas about selfhood free will and personal responsibility putting us at risk

of making harmful mistakes whether in the courtroom interrogation room or addiction treatment clinic Although brain scans and other neurotechnologies have provided groundbreaking insights into the workings of the human brain Brainwashed shows readers that the increasingly fashionable idea that they are the most important means of answering the enduring mysteries of psychology is misguided and potentially dangerous
