Sm Mind Over Monopause:

Mind Over Menopause Leslee Kagan, Herbert Benson, Bruce Kessel, 2004-04-13 A groundbreaking mind body program for perimenopause and menopause uses relaxation response techniques nutrition and exercise to manage menopause symptoms

Mind Over Menopause Pahla Bowers, 2023 From YouTuber Pahla B a radically simple method teaching menopausal women to lose weight by changing their mindset With menopause almost overnight nothing about your body is the same Where eating less and exercising more once allowed you to slim down it now produces little to no results In this book Pahla Bowers offers a powerful new method to flip the script on menopause by adjusting how you think Using a highly practical approach that targets really unhelpful thoughts RUTs she teaches readers how to lose weight and love their midlife body by transforming their thinking about food and not fearing calories and carbs practicing moderate exercise staying hydrated and getting plenty of sleep choosing a realistic weight goal and never slowing down Mind Over Menopause gives women the tools they need to improve their health while eating more exercising less and turning good feelings into actions With chapters that include journaling prompts and Borrow This Thought ideas Bowers shows how to use the mind like a compass to steer the body in the direction it wants to go And in the process she proves that aging can be a positive change

The Mind-Brain Continuum Susan Gordon, 2023-01-01 This insightful book proposes a holistic theory of the development of self drawing on interdisciplinary literature in existential phenomenology neurophenomenology intracrinology endocrinology and naturopathic medicine The psychoneurointracrine hypothesis bridges the gap between the mind and brain providing a framework to explain the complex system that facilitates development of one's sense of self and well being The book challenges assumptions in present day neuroscience and psychiatry placing the mind and brain on a continuum of health and growth rather than reducing the study of human consciousness to neurobiological terms and pathological classifications In this landmark book Susan Gordon presents a bold hypothesis one that underscores the importance of psychoneurointracrine activity and links it to female neurology and the development of one's sense of self She brilliantly places this activity which serves as a mind body bridge within the frameworks of neurophenomenology and non linear dynamics Her psychoneurointracrine hypothesis is a tour de force one that is holistic integrating intracrinology with psychology and neurology This hypothesis undercuts the current assumption that the mind is an epiphenomenon of the brain creating a paradigm that impacts science's understanding of behavior experience consciousness and human agency Stanley Krippner PhD Affiliated Distinguished Faculty California Institute of Integral Studies San Francisco CA In her fascinating book Susan Gordon develops a novel theory about the biological connection between mind brain and organism Drawing on empirical research on the role of the female hormonal system in basal states of self and mood she shows that the biochemistry of the endocrine system must be viewed as an indispensable foundation for the emergence of embodied self awareness The homeostasis and hormonal balance of the organism is integral to the sense of well being and the development of meaning but

it is also continually modulated and influenced by the subject's experience of his or her world. In this way she makes a decisive contribution to a theory of embodiment that goes far beyond a computational theory of the brain to focus on the biochemical organismic processes at the root of the mind.
