techno journey commencing with the background history of computing to contrast with HCI in today's techno world filling the gap in the literature that only sparsely covers the vast number of human dimensions or social context of computer usage. The human dimensions of HCI are but one piece of the complicated computer usability or techno puzzle that involves two distinct and quite separate contexts. One relates to the human dimension or social context of computing while the other relates to the machine side with people's perspectives molded around the performance of the technical computing components. The literature deals more often with the latter. It is really only in more recent times that a voice has risen for computer usability issues that involve the human dimensions. Because of this duality of people and computer machinery the author's techno saga travels through carefully devised chapters. She therefore separates the human side from the machine side of the HCI equation identifying why there is currently an imbalance of sensible solutions for effective HCI. Publisher ed
