**Virtually Human** Martine Rothblatt,2014-09-09 *Virtually Human* explores what the not too distant future will look like when cyberconsciousness simulation of the human brain via software and computer technology allows our consciousness to be present forever Meet Bina48 the world s most sentient robot commissioned by Martine Rothblatt and created by Hanson

Robotics Bina48 is a nascent Mindclone of Martine's wife that can engage in conversation answer questions and even have spontaneous thoughts that are derived from multimedia data in a Mindfile created by the real Bina. If you're active on Twitter or Facebook share photos through Instagram or blogging regularly you're already on your way to creating a Mindfile a digital database of your thoughts memories feelings and opinions that is essentially a back up copy of your mind. Soon this Mindfile can be made conscious with special software Mindware that mimics the way human brains organize information create emotions and achieve self awareness. This may sound like science fiction A.I. artificial intelligence but the nascent technology already exists. Thousands of software engineers across the globe are working to create cyberconsciousness based on human consciousness and the Obama administration recently announced plans to invest in a decade long Brain Activity Map project. Virtually Human is the only book to examine the ethical issues relating to cyberconsciousness and Rothblatt with a Ph.D. in medical ethics is uniquely qualified to lead the dialogue.
