Shifu, Soul of Chinese Anarchism Edward S. Krebs, 1998-10-01 The most comprehensive study of Shifu available this valuable work explores the life and political milieu of a central figure in Republican China Born in 1884 Shifu was brought down in 1915 by overwork poverty and tuberculosis Yet during that short span he became the most influential anarchist of his time Drawing on a wealth of primary source material Krebs provides an intellectual biography of this committed revolutionary and analyzes the importance of Shifu's thought during the New Culture May Fourth years as his followers fought for influence with the Marxists and later over the issue of alliance with the Nationalists Placing Shifu's life within the dynamic intellectual and political currents of the time the author describes Shifu's early work as an assassin within the anti Qing movement Examining the influence on Shifu of Confucianism and Buddhism Krebs highlights reform Buddhism's close relationship with revolutionary activism Most significantly Shifu's unflagging work to propagate anarchism during the early years of the Republic and his interactions with other socialists reveal a hitherto unknown level of activity among socialist revolutionaries This important book thus offers fresh insights not only into the anarchist movement itself but into the broader history of Chinese socialism as well

recently this perspective has been challenged by mainland New Confucians and Sinicized Marxists alike. The former advocate a constitutionalism that is based upon and loyal to the Confucian tradition while the latter has sought to theorize the current Chinese constitutional order and reclaim its legitimacy. This book presents a discussion of these three approaches analyzing their respective strengths and weaknesses and looking to the likely outcome. The study provides a clear picture of the current ideological debates in China while developing a platform for the three schools and their respective constituencies to engage in dialogue, pluralize the conceptions of constitutionalism in academia and shed light on the political path of China in the 21st Century. The consequences of this Chinese contribution to the global constitutionalism debate are significant. Notions of the meaning of democratic organization of the nature of the division of authority between administrative and political organs of the nature and role of political citizenship of the construction of rights are all implicated. It is argued that China's constitutional system when fully theorized and embedded within the global discourse might serve as the German Basic Law did in its time as a model for states seeking an alternative approach to the legitimate construction of state political structures and institutions.

A History of Chinese Philosophy Youlan Feng, 1983. Since its original publication in Chinese in the 1930s, this work has been accepted by Chinese scholars as the most important contribution to the study of their country's philosophy. In 1952, the book was published by Princeton University Press in an English translation by the distinguished scholar of Chinese history, Derk Bodde, the dedicated translator of Fung Yu-lan's huge history of Chinese philosophy. New York Times Book Review. Available for the first time in paperback, it remains the most complete work on the subject in any language. Volume I covers the period of the philosophers from the beginnings to around 100 B.C., a philosophical period as remarkable as that of ancient Greece. Volume II discusses a period lesser known in the West, the period of classical learning from the second century B.C. to the twentieth century.

Multimodal Approaches to Chinese-English Translation and Interpreting Meifang Zhang, Dezheng (William) Feng, 2020-12-29. Nowadays, discourse analysis deals with not only texts but also paratexts and images, so do translation and interpreting studies. Therefore, the concept of multimodality has become an increasingly important topic in the subject areas of linguistics, discourse analysis, and translation studies. However, up to now, not much research has been done systematically on multimodal factors in translation and interpreting, and even less in exploring research models or methodologies for multimodal analysis in translation and interpreting. This book aims to introduce and apply different theories of the multimodal discourse analysis to the study of translations with case studies on Chinese classics such as the Monkey King, Mulan, and The Art of War, as well as on interpretations of up-to-date issues including the Chinese Belt and Road Initiatives and Macao tourism. The chapters reflect the first attempts to apply multimodal approaches to translation and interpreting with a special focus on Chinese-English translations and interpreting. They provide new understandings of transformations in the multimodal translation process and useful reference models for researchers who are interested in doing research of a similar kind, especially for those who are interested in looking into
