every human person and by corollary that of any of our ETI brothers and sisters With modern technological capabilities to monitor the various emotional and mental states of test subjects and the ability to measure and experimentally probe the electric and magnetic fields generated within the human body we sometimes are tempted to view the human soul as some form of corruptible energy field We long for a rekindling of a sense of mystery regarding the ephemeral reality of the human soul This book is motivated as an attempt to restore a sense of mystery in the minds and hearts of any and all persons who will read this post regarding that aspect of our human nature that seems to be beyond validation by modern science technology and medicine and which seems to defy certain and precise explanation by philosophers theologians and clergyman alike

**De Anima (On the Soul)** Aristotle,2004-07-29 For the Pre Socratic philosophers the soul was the source of movement and sensation while for Plato it was the seat of being metaphysically distinct from the body that it was forced temporarily to inhabit Plato's student Aristotle was determined to test the truth of both these beliefs against the emerging sciences of logic and biology His examination of the huge variety of living organisms the enormous range of their behaviour their powers and their perceptual sophistication convinced him of the inadequacy both of a materialist reduction and of a Platonic sublimation of the soul In *De Anima* he sought to set out his theory of the soul as the ultimate reality of embodied form and produced both a masterpiece of philosophical insight and a psychology of perennially fascinating subtlety
