Conflict and Creativity at Work Albert Low,2008 Contributes to the tide of activism that is calling for higher ethical standards and corporate social responsibility within the corporate world It offers a new way to look at a company work a product and company organization Nobel prizewinner Milton Friedman says that the only social responsibility a company has is to make a profit Albert Low questions this basic assumption and provides an alternative view a company is a complex field of interacting and conflicting forces out of which a product emerges The interests of the stockholder make up just one set of these forces The corporate system arises out of the natural creativity of human beings and is expressed in the work that we do Therefore to understand a company its organisation and its reason for being we must understand creativity and work what they involve and their importance to our mental health This new understanding of social responsibility is imperative for the very survival of our way of life Business Ethics quotes Thomas Donahue US Chamber of Commerce President as saying There is something fundamentally out of balance when short term considerations become so dominant The book offers a new way to look at the corporate system and long term corporate social responsibility Depression is widespread throughout western society A contributing factor is the way the corporate system operates People are now adjuncts to the system and the result is alienation and impotence China and India are looming as major industrial competitors and their employees are very well motivated To compete in the West we must revise the present antiquated corporate philosophy that asserts that the interests of the stockholder are the only interests that the corporation can legally serve and adopt policies that promote corporate social responsibility *Safety Can't Be Measured* Andrew S. Townsend,2016-04-08 The British Prime Minister has avowed to kill off the health and safety culture which he described as a monster Nonetheless industries face ever increasing public expectation and legislative pressure to improve safety when actually rates of safety improvement have slowed to a standstill In *Safety Can t Be Measured* Andrew Townsend suggests the main reason for the stagnation of safety improvement is the failure to recognise the evolution in accident causation and to evolve with it He severely criticises some aspects of current day management of occupational safety and contends that everyone is trying to continuously improve something in which improvement cannot be measured so the received wisdom underpinning safety management and regulation is not evidence based and much of it is misguided What is measured is the absence of safety through incidents injuries and the occurrence of ill health We cannot continue to justify these ways of doing things and claiming success by association without admitting there might be other explanations In this series of short chapters occupational health and safety is put in context by demystifying the research regulation and management of health and safety Using evidence Townsend challenges orthodox dogma by demonstrating that currently unused data could help deduce how safety really works and thus support alternative thought processes from which new approaches to risk reduction and safety management could emerge *The Complete Idiot's Guide to Knowledge Management* Melissie Clemmons Rumizen,2002 Discusses management models and concepts

strategies for sharing knowledge and ways to implement the concept within a company
