The Crisis of External Dependence Rehman Sobhan,1993 The Crisis of External Dependence Rehman Sobhan,1982

Foreign Aid and Bangladesh Mohammad Mizanur Rahman,2024-08-12 Foreign Aid and Bangladesh offers a rich combination of aid history from the evolution of aid as a global agenda after WWII to the rise of different multilateral bilateral and emerging donors and their policy shifts and a nuanced perspective of aid partnerships at the country level Drawing on first hand experiences and insights the author deeply investigates the realities of a longstanding aid recipient Bangladesh and argues that without a political economy approach one cannot understand the realpolitik of development aid As an emerging economy from the global south Bangladesh has been a longstanding partner and recipient of international aid since 1971 Bangladesh has also been active in the global discussions leading to redefining the new narrative and arguments for the new aid regime since the beginning of this century Building on the analysis of Bangladesh s aid relations the book shows that there has not been any qualitative shift in aid behavior in the new aid regime that set new norms after the end of the Cold War to ensure recipients ownership and welcomed an expanding aid landscape by integrating emerging economies from the Global South for achieving better development results The book analyzes the role of different actors in the development partnership both traditional and emerging donors such as China and India and their partnership practices It examines different forms of aid and their changing perspective particularly technical assistance Based on more than two decades of research and profound insider observations the book debunks the myth that Southern providers could be more benign to their partners The arguments placed in the book expose that there is no difference between traditional and emerging donors in ensuring donors business and strategic interests While donors continue to ensure their interests in providing aid the Realpolitik of the situation in the recipient country shows that there is a specific economic and political agenda in pursuing aid Presenting a comprehensive picture of Bangladesh s aid partnership through the lens of new development partnership principles and narratives of development aid this book will be of interest to scholars and researchers of aid and development studies and political science as well as South Asian Studies Donor officials civil servants and national and international policy communities will also benefit from this book *Foreign Aid: New Perspectives* K. L. Gupta,2012-12-06 Foreign aid has been an area of active scholarly investigation since the end of the Second World War but particularly since the early 1950s when a large number of the erstwhile colonies became independent Few areas of public policy involving the developed and developing countries have aroused more passion and ideological debate than foreign aid In spite of the massive amount of research in the field there is still not enough work in two areas the first involves the mechanisms through which aid influences the economies of the donor and the recipient countries and the second country specific assessments of the effectiveness of foreign aid *Foreign Aid New Perspectives* is aimed at making a contribution in

these two areas The contents of this volume are divided into four parts Part I deals with some theoretical aspects of foreign aid while the second part analyzes some general policy aspects Part III turns to the donor experience and includes one paper on the Danish experience The last part considers the recipient experience and consists of five case studies *The Political Economy of NGOs* Jude L. Fernando, 2011-07-08 This book explores the paradoxical relationship between NGOs and capitalism showing that supposedly progressive organisations often promote essentially the same policies and ideas as existing governments It examines how a diverse group of NGOs have shaped state formation in Bangladesh and Sri Lanka It argues that rather than influencing state formation for the better NGOs have been integrated into the capitalist system and their language adopted to give traditional exploitative social relations a transformative appearance This enlightening study will give pause to those who see NGOs as drivers of true social change and will encourage students of development studies to make a deeper analysis of state formation

The Aid Lab Naomi Hossain, 2017 From an unpromising start as the basket case to present day plaudits for its human development achievements Bangladesh plays an ideological role in the contemporary world order offering proof that the neo liberal development model works under the most testing conditions How were such rapid gains possible in a context of chronically weak governance The Aid Lab subjects this so called Bangladesh paradox to close scrutiny evaluating public policies and their outcomes for poverty and development since Bangladesh's independence in 1971 Countering received wisdom that its gains owe to an early shift to market oriented economic reform it argues that a binding political settlement a social contract to protect against the crises of subsistence and survival united the elite the masses and their aid donors in the wake of the devastating famine of 1974 This laid resilient foundations for human development fostering a focus on the poorest and most precarious and in particular on the concerns of women In chapters examining the environmental political and socioeconomic crisis of the 1970s the book shows how the lessons of the famine led to a robustly pro poor growth and social policy agenda empowering the Bangladeshi state and its non governmental organizations to protect and enable its population to thrive in its engagements in the global economy Now a middle income country Bangladesh's role as the world's laboratory for aided development has generated lessons well beyond its borders and Bangladesh continues to carve a pioneering pathway through the risks of global economic integration and climate change

International Relations Theory and South Asia (OIP) E. Sridharan, 2014-11-13 Drawing upon international relations theory this volume conceptualizes possible solutions to the various conflicts in South Asia It analyses the bilateral conflicts between India and Pakistan and other multilateral problems specific to this region Bringing together scholarship from several South Asian countries it offers a well rounded formulation of conflict resolution and cooperation building The volume employs a strong theoretical rubric empirical research and exhaustive fieldwork Its centralizing approach to sustain the diversity of perspectives and arguments makes it an indispensable contribution to strategic studies

Civil Society in Asia Dr Fahimul Quadir, Professor Yutaka Tsujinaka, 2015-07-28 Notwithstanding Bangladesh's recent

success in both creating a market friendly structure of economic governance and holding periodic elections its political system continues to be marked by clientelism rampant corruption and widespread violence The country faces the major challenges of fostering a culture of democracy human rights and the rule of law as the politics of mutual distrust have re emerged with renewed strength into a dysfunctional political landscape This volume examines the failure of liberal democracy to take root and asks despite the presence of a vibrant civil society why is Bangladesh still struggling to institutionalize democracy Providing much needed analytical context to explore the theoretical and empirical dimensions of the role of civil society in the democracy and development of Bangladesh the volume brings together well established international authors to explore key ideas and debates from a wide range of disciplines Through this the contributors raise intriguing questions about the prospects for liberal democracy and social development in a Muslim majority country

Their Future Michael Gubser, 2025-05-27 A compelling examination of how economic development projects ignore local history and the effects of this shortsightedness Foreign aid planners rarely consider the history of the societies in which they work an oversight noted in the development literature but rarely examined Aid programs costing billions of dollars operate largely in a historical vacuum divorced from the knowledge of what succeeded or failed in the past Michael Gubser chronicles the varieties of ahistoricism in international development theory and practice since 1945 He traces the history of development ideas analyzing key theoretical and policy statements to highlight the marginalization of history in favor of technical solutions to economic and social problems and he examines aid programs in several developing countries to show how Western models of social and economic development have been applied and misapplied *Money Talks* Erica R. Gould, 2006 analyzes the changes in conditions placed on International Monetary Fund loans to states over the last fifty years and argues that the changes can be explained by shifts in the sources of the IMF's funding **How the World Hunger**

Problem Was not Solved Christian Gerlach, 2024-02-14 The world food crisis 1972-1975 gave rise to new development concepts To eradicate world hunger small peasants were supposed to use modern inputs like high yielding seeds fertilizer pesticides and irrigation This would turn subsistence producers into business owners transform rural areas invigorate national economies and the crisis stricken world economy and thus stabilize capitalism Together with an in depth account of the world food crisis this book analyses how this global scheme largely failed It shows its diverse initiators their reasoning and motives its political breakthrough the degrees to which it was implemented globally and nationally in the following decades and its socioeconomic effects in rural areas Despite internationally coordinated policies and coercive means the scheme failed on all levels situation analysis design policies incapable institutions including big business implementation and peasants responses Selective realization in certain regions and for certain crops and the appropriation of funds by local elites often aggravated inequality and hunger Case studies are about Bangladesh Indonesia Tanzania and Mali The book shows limits to global social engineering imperialism and state control It is aimed at students scholars activists and non specialists

interested in development and the world food problem The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Development of Aid Gerard Van Bilzen, 2015-01-12 Aid to developing countries started well before World War II but was undertaken as an ad hoc activity or was delivered by private organizations This changed after the War In his Inaugural Address in 1949 the American President Harry Truman announced a bold new programme for making the benefits of our scientific advances and industrial progress available for the improvement and growth of underdeveloped nations the so called Point IV Plan At that time it was thought that this support would be needed only for a limited number of years comparable to the Marshall Plan assistance to Europe But reality proved to be different providing aid was a very long term affair Since the Fifties the aid provided has changed at different occasions In the beginning aid concentrated on constructing infrastructure such as roads railways dams and harbours in order to promote industrial development In the Sixties aid to agriculture was added and in the Seventies aid to social sectors Basic Needs was also provided The Eighties brought worldwide debt problems Major donors applied structural adjustment policies some called this the lost decade *la década perdida* The Nineties saw the arrival of the first environmental considerations and asked for attention for the role of women and good governance The form of aid changed from projects to programmes and budget support Describing the different aid forms of the last 65 years and analysing why aid changed from time to time are the subjects of this book Professionals and students in the area of international cooperation will benefit from studying this history as at this moment old concepts are reappearing or applied by new donors like China Is the pendulum really swinging back as Louis Emmerij at one point suggested

The IMF, World Bank and Policy Reform Alberto Paloni, Maurizio Zanardi, 2012-10-12 The debate on whether or not the International Monetary Fund and World Bank and their intervention strategies are a positive force for change in the developing world continues to rage Featuring both macroeconomic and microeconomic approaches this book brings together an international team of contributors and centres upon three broad themes the ideology of the IMF and World Bank poverty reduction conditionality In exploring these themes this book will be a valuable reference for postgraduate students and professionals in the fields of development studies and political economy

Elusive Development Yusif A. Sayigh, 2002-03-11 The oil boom prompted a massive inflow of capital into the Arab region But whilst the investment this facilitated clearly had benefits for the region the developmental achievements of the boom decade are demonstrably unable to match the magnitude of the resources directed to development and the reasonable expectations invested in it Professor Yusif Sayigh draws a powerful and painful lesson from this experience applicable to other areas you cannot buy development it must be soundly oriented and sought with resolve by society's leaderships and a people enjoying a large measure of freedom and political participation

Relations of NDA and UPA with Neighbours Raj Kumar Singh, 2010

South Asian Economic Development Moazzem Hossain, Rajat Kathuria, Iyanatul Islam, 2010 South Asia's

developing nations have been enjoying moderate to high growth over the past decade before the global recession began This new edition provides an up to date guide to the growing markets in South Asia It offers an analysis of the changes and consequences of high sustainable growth investigating what has been achieved in the region during the last ten years from a macroeconomic viewpoint identifying new challenges and clearly defining what has driven the boom The first part of the textbook presents an analysis of how South Asia is rated against Southeast and East Asia in recent decades in economic and social terms The second part of the text focuses on South Asia s economic development over 1990s and mid 2000s and the third and final part identifies those major governance issues which were responsible for South Asia s underperformance both socially and economically It is widely recognised that globalisation enhanced global trade and that trade further increased the region s prosperity Embracing the view that economists can no longer regard themselves as technocratic guardians of neutral policy advice the book advocates for a shift in focus from policy reform per se to the more challenging task of implementing institutional reform that will invigorate the capability of the political leadership to bring about rapid sustained and poverty reducing growth in South Asia The central task would be to re direct the focus of governments in South Asia in order to ensure that the core functions of the state stable non distortionary policy climate a secure foundation of law investment in basic education health and infrastructure protection of the vulnerable and adapting with the climate change are efficiently provided At the same time the reform agenda must be sensitive to the goal of ensuring that durable democratic institutions traditions and values are preserved This is a fundamental challenge but one that must be met in order to secure the emergence of a prosperous South Asia in the early part of the twenty first century This textbook will be useful for students and researchers in Development Economics Business Economics Development Studies and Asian Studies

Subalterns and Raj Crispin Bates,2013-09-16 Subalterns and Raj presents a unique introductory history of India with an account that begins before the period of British rule and pursues the continuities within that history up to the present day Its coverage ranges from Mughal India to post independence Pakistan Bangladesh and Sri Lanka with a focus on the ordinary people of India and South Asia Subalterns and Raj examines overlooked issues in Indian social history and highlights controversies between historians Taking an iconoclastic approach to the elites of South Asia since independence it is critical of the colonial regime that went before them This book is a stimulating and controversial read and with a detailed guide to further reading and end of chapter bibliographies it is an excellent guide for all students of the Indian subcontinent

Governance for Development N. Islam,2016-04-29 Analyzing Bangladesh s governance problems and drawing insights that will be relevant to other developing countries this book sharpens our understanding of governance and suggests political and administrative reforms to improve governance and facilitate faster development Participatory Development Ponna Wignaraja,1991 Tackling the problems of Third World development from a different perspective this study offers a new approach in which people at the grass roots level in South Asia become both the subjects and the objects of a participatory

process of development designed to improve living conditions
