Language Learning and Teaching Joshua J. Thoms, Kristen Michelson, 2024-10-15 Rapid changes in communication
channels tools and conventions of interaction over the last two decades have paved the way for increasingly digital learning
environments In second language L2 education shifts toward digital learning and teaching were intensified during the
pandemic and many such formats are here to stay At the same time a growing interest in socially oriented pedagogies in L2
learning and teaching is prompting many L2 researchers and practitioners to investigate new research areas and explore
post communicative language teaching pedagogies that engage learners more deeply with cultural texts using a range of
semiotic and linguistic resources Digital Social Reading DSR is a pedagogical approach that affords technology mediated
collaborative reading where texts are read through a digital platform that allows two or more readers to highlight the same
virtual copy of a text and discuss it through a digital interface that affords synchronous or asynchronous margin dialogues
anchored in specific passages This book offers empirical studies demonstrating how DSR can foster and illuminate learner
interactions that mediate learning and also work that focuses on language teaching perspectives in DSR environments
