**Class and Conflict in the Fishers' Community in Indonesia** Rilus A. Kinseng, 2020-01-14 This book analyses social conflict among fishers in Indonesia by implementing class theory thus adopting a new approach to analysing fishers conflicts in Indonesia In using this approach the book enables a comprehensive understanding of the nature of fishers social conflicts It demonstrates that the primary cause triggering conflict among fishers in Indonesia is not exploitation but domination This domination causes injustice in terms of access among fishers which in turn threatens their livelihood The author unpacks the influence of political parties and how macro economic conditions and public policy have become contextual variables of these class conflicts in the fisheries community The book presents the unique characteristics of class conflicts among fishers compared to class conflicts in industrial sectors underpinned by Marxist theory This book will be relevant to fisheries policy makers in Indonesia and abroad researchers and students in anthropology sociology and development economics as well as community and rural development specialists and conservationists

**Thinking Like a Planet** J. Baird Callicott, 2013 Bringing together ecology evolutionary moral psychology and environmental ethics J Baird Callicott counters the narrative of blame and despair that prevails in contemporary discussions of climate ethics and offers a fresh more optimistic approach Whereas other environmental ethicists limit themselves to what Callicott calls Rational Individualism in discussing the problem of climate change only to conclude that essentially there is little hope that anything will be done in the face of its perfect moral storm in Stephen Gardiner s words Callicott refuses to accept this view Instead he encourages us to look to the Earth itself and consider the crisis on grander spatial and temporal scales as we have failed to in the past Callicott supports this theory by exploring and enhancing Aldo Leopold s faint sketch of an Earth ethic in Some Fundamentals of Conservation in the Southwest a seldom studied text from the early days of environmental ethics that was written in 1923 but not published until 1979 after the environmental movement gathered strength

Shapiro, Joseph P. Tomain, 2024-05-09 How Government Built America challenges growing anti government rhetoric by highlighting the role government has played in partnering with markets to build the United States

*The Culture of Feedback* Daniel Belgrad,2019-08-30 When we want advice from others we often casually speak of getting some feedback But how many of us give a thought to what this phrase means The idea of feedback actually dates to World War II when the term was developed to describe the dynamics of self regulating systems which correct their actions by feeding their effects back into themselves By the early 1970s feedback had become the governing trope for a counterculture that was reoriented and reinvigorated by ecological thinking The Culture of Feedback digs deep into a dazzling variety of left of center experiences and attitudes from this misunderstood period bringing us a new look at the wild side of the 1970s Belgrad shows us how ideas from systems theory were taken up by the counterculture and the environmental movement eventually influencing a wide range of beliefs and behaviors particularly related to the question of what is and is not intelligence He tells the story of a generation of Americans who were struck by a newfound interest in and respect for plants animals indigenous populations and the very sounds around them threading his tapestry with cogent insights on environmentalism feminism systems theory and psychedelics The Culture of Feedback repaints the familiar image of the 70s as a time of Me Generation malaise to reveal an era of revolutionary and hopeful social currents driven by desires to radically improve and feed back into the systems that had come before

**Existential Threats** Lisa Vox,2017-07-03 In Existential Threats Lisa Vox explores the growth of dispensationalist premillennialism alongside scientific understandings of the end of the world and contends that these two allegedly competing visions have converged to create an American apocalyptic imagination

**The Nature of the Religious Right** Neall W. Pogue,2022-04-15 In The Nature of the Religious Right Neall W Pogue examines how white conservative evangelical Christians became a political force known for hostility toward environmental legislation Before the 1990s this group used ideas of nature to help construct the religious right movement while developing theologically based eco friendly philosophies that can be described as Christian environmental stewardship On the twentieth anniversary of Earth Day in 1990 members of this conservative evangelical community tried to turn their eco friendly philosophies into action Yet this attempt was overwhelmed by a growing number in the leadership who made anti environmentalism the

accepted position through public ridicule conspiracy theories and cherry picked science Through analysis of rhetoric political expediency and theological imperatives *The Nature of the Religious Right* explains how ideas of nature played a role in constructing the conservative evangelical political movement why Christian environmental stewardship was supported by members of the community for so long and why they turned against it so decidedly beginning in the 1990s **Crabgrass Crucible** Christopher C. Sellers,2012-06-18 Although suburb building created major environmental problems Christopher Sellers demonstrates that the environmental movement originated within suburbs not just in response to unchecked urban sprawl Drawn to the countryside as early as the late nineteenth century new suburbanites turned to taming the wildness of their surroundings They cultivated a fondness for the natural world around them and in the decades that followed they became sensitized to potential threats Sellers shows how the philosophy science and emotions that catalyzed the environmental movement sprang directly from suburbanites lives and their ideas about nature as well as the unique ecology of the neighborhoods in which they dwelt Sellers focuses on the spreading edges of New York and Los Angeles over the middle of the twentieth century to create an intimate portrait of what it was like to live amid suburban nature As suburbanites learned about their land became aware of pollution and saw the forests shrinking around them the vulnerability of both their bodies and their homes became apparent Worries crossed lines of class and race and necessitated new ways of thinking and acting Sellers argues concluding that suburb dwellers through the knowledge and politics they forged deserve much of the credit for inventing modern environmentalism **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70 **The Corporate Planet** Joshua Karliner,1997 Citing case histories such as Chevron Shell and Mitsubishi CORPORATE WATCH editor Joshua Karliner brilliantly exposes how transnationals aided by free trade agreements World Bank policies and massive consumer campaigns play central roles in environmental destruction This important and timely book is a significant contribution to the battle against irresponsible corporate behavior *More* Robert M.
