The Eternal Return:

The Eternal Return Greg Fraser, 2009 **God and Eternity** James C. Barlow, 2009 What exactly is Time Time has often been counterpoised by the notion of Eternity as just that place wherever it is that is timeless Recently some physicists have sought to comprehend the universe as just one among many or has denied the existence of Time outright Through a use of Friedrich Nietzsche's thought of the Eternal Recurrence of All Things once made compatible with Christian orthodoxy's notion of time and eternity when combined with the latest in modern physics the author posits here a new theory of Time that can account for human freedom in the midst of a deterministic world while at the same time explaining the Uncertainty Principle and how Reality became what it is With Time given ontological priority all of our suspicions about lack of objectivity in scientific method are revealed as justified while the hitherto indecipherable nature of the cosmos and the role a Deity might have in it are explained **God and Eternity** is a brilliant intellectual tour de force that puts natural theology on an equal footing with post modern wonderment and enlightenment at an historical moment when a host of crucial questions are being asked anew JAMES BARLOW is Associate Professor of Philosophy at St Andrew's College and Seminary Lexington North Carolina and a Mathematics instructor at Nunavut Arctic College in Canada He has studied and taught in the Philippines and Alaska in the United States He currently lives in Iqaluit on South Baffin Island capital of the territory of Nunavut Canada

Deleuze and Becoming Samantha Bankston,2017-11-16 Deleuze s concept of becoming provides the key to his notoriously complex metaphysics yet it has not been systematized until now Bankston tracks the concept of becoming and its underlying temporal processes across Deleuze s writings arguing that expressions of becoming s appear in two modes of temporality an appropriation of Nietzsche s eternal return the becoming of the event and Bergsonian duration the becoming of sensation Overturning the criticisms launched by i ek and Badiou with conceptual encounters between Bergson Nietzsche Leibniz Borges Klossowski and Proust the newly charted concept of double becoming provides a roadmap to the totality of Deleuze s philosophy Bankston systematizes Deleuze s multi mirrored universe where form and content infinitely refract in a vital kaleidoscope of becoming **The New Nietzsche** David B.
