The European Community Progress Or Decline

Guillaume Favre

The European Community Progress Or Decline:

Decision-making in the European Community Emil Joseph Kirchner, 1992 In this first major assessment of EC decision making at the highest levels for ten years Emil Kirchner examines the Council Presidency's role in European integration The author demonstrates how the EC Council Presidency plays a crucial role in the integration process enhanced by the Single European Act and the two Intergovernmental Conferences on EMU and Political Union He evaluates the balance and distribution of power between national and Community actors and asks whether the Council Presidency is primarily an instrument to maintain national control of EC decision making rather than a device for promoting integration He sheds light on the negotiations which led to the SEA and the two Intergovernmental Conferences and argues for a new interpretation of the relationship between the EC and its constituent states EC decision making is not characterised by a transfer of powers from the national to the EC level but by a sharing of competences between national and Community institutions and a pooling of sovereignties among member governments that is analogous to co operative federalism Decision making in the European Community will be vital reading for political scientists and students interested in the EC and for all those seeking to understand European integration potentially the 1990s most important political development

Understanding Attitudes to the European Community Miles Hewstone, 2011-04-14 This 1986 study presents an insightful perspective on public attitudes towards the European Community It contains a review of the findings from public opinion surveys of the time on this issue but goes beyond straightforward description to provide a real understanding of European attitudes A variety of social psychological theories are used to test a model of the structure underlying Community attitudes The original data reported in the present study parallel the findings from much larger representative and long term surveys of public opinion Thus Miles Hewstone is able to derive from his research a wide ranging analysis of cross national differences in attitudinal support the Community's impact on its citizens and the likely trends in attitude and voting behaviour At a time when the entry of Spain and Portugal had further expanded the Community's membership such issues were particularly timely and this clear and penetrating study especially welcome

International Economic Institutions M.A. van Meerhaeghe, 2013-03-14 What made me write this book was a feeling that students of international economics needed to fill out their knowledge of the theory with work on the practice of the major international economic organizations many of which are having a growing influence on the national economies of their members There was no single volume given over to a concise treatment of these organizations The annual reports of the international organizations themselves can be consulted of course but as a rule these are not noted for being brief and to the point the items of importance have to be fished out of a sea of useless detail nor do they go in for criticism of their own activities In selecting the organizations to be dealt with in the book I was guided by the influence they exert I have left out those whose activities consist mainly in the drafting of recommendations to which however meritorious they may be little or no attention is paid Some of them are included in the Introduction which provides a summary of a number of institutions not discussed separately in the body of the work There are however two exceptions the Organization for Economic Cooperation and Development OECD as the organization replacing the Organization for European Economic Cooperation OEEC and the United Nations Conference on Trade and Development UNCTAD whose meetings have succeeded in drawing much attention of the press

HL 115 - The EU and Russia: Before and Beyond the Crisis in Ukraine Great Britain. Parliament.

House of Lords. European Union Committee, 2015 The continuing crisis in Ukraine means that the EU's relationship with Russia has reached a critical juncture and that the EU and its Member States need fundamentally to reassess it In this report the Committee considers the factors that have contributed to the decline in the EU Russia relationship attempt to draw lessons for the future and consider how the EU and its Member States should respond to a changed geopolitical landscape The Committee also asks how the EU and Member States should engage with Russia in the future based on a sober assessment of the Russia that exists today The majority of the evidence was received between July and December 2014 and the Committee wrote this report in January and February 2015 The Committee's purpose has not been to analyse events in Ukraine as they unfold but rather to consider the causes of the conflict and the implications that go beyond the immediate crisis

The Borders of the European Union in a Conflictual World Antonina Bakardjieva Engelbrekt, Per Ekman, Anna Michalski, Lars Oxelheim, 2024-05-01 This open access book examines the implications for the EU of a radically changed international context characterized by systemic rivalry competition over norms and regulations and growing strategic tension Globalization that once tied national economies together and internationalized social phenomena such as education research and innovation and tourism has gone in reverse An opposite trend is driving the world into distinct spheres of competing models of governance regulation technological development and communication Facing the most extensive rupture of economic and inter state relations since the onset of the Cold War the management of the EU's internal and external borders is taking on a completely new meaning The open access book brings together scholars from economics law and political

science to provide up dated assessments and policy advice on the insecurity in the neighborhood and war in Ukraine the EU s role in the future European security architecture weaponized energy dependence and the global competition on norms

The European Crisis and the Transformation of Transnational Governance Christian Joerges,Carola Glinski,2014-11-13 The debate on law governance and constitutionalism beyond the state is confronted with new challenges In the EU confidence in democratic transnational governance has been shaken by the authoritarian and unsocial practices of crisis management The ambition of this book which builds upon many years of close co operation between its contributors is to promote a viable interdisciplinary alternative to these developments Conflicts law constitutionalism is a concept of transnational governance which derives democratic legitimacy from the supranational control of the external impact of national decision making on the one hand and the co operative responses to problem interdependencies on the other The first section of the book contrasts Europe s new modes of economic governance and crisis management with the conditionality of international investments and reflects upon the communalities and differences between emergency Europe and global exceptionalism Subsequent sections substantiate the probl matique of executive and technocratic rule explore conflict constellations of prime importance in the fields of environmental and labour law and discuss the impact and limits of liberalisation strategies Throughout the book European and transnational developments are compared and evaluated *The Future of the European Union* Konstanty Adam Wojtaszczyk,Tadeusz Wallas,Paweł Stawarz,2023-09-08 The monograph *The Future of the European Union* as well as the publication that precedes it *European Integration Conditions Essence and Consequences* have been compiled as part of the project *Quo vadis Unio a racja stanu Polski* under the DIALOG research programme between 2019 and 2023 It is the result of contributions by Europeanists political scientists lawyers economists cultural scholars and historians who study the issues of European integration The content presented in both publications reflects the research outcomes and views of the individual authors The first of these publications was designed as an attempt to summarise the integration process to date and its legal and institutional dimension which is the contemporary European Union The publication *The Future of the European Union* consists of five parts *The Concepts of Reforms of the European Union* *The Future Modernisation of the Institutional System of the European Union* *Selected EU Policies Future Prospects* *The European Union the External Determinants of Further Development* *The Perspectives on the Theoretical Dimension of European Studies* We hope that the issues raised in this monograph will be of interest to potential readers especially academics and students interested in European integration issues Insight into these issues may also be useful to government officials and NGO activists as well as to a wide audience interested in European issues These objectives may be more achievable after reading both of these monographs dedicated to European integration issues **The European Union as a Security Community** Panos Tsakaloyannis,1996 **The European Union's International Promotion of LGBTI Rights** Markus Thiel,2021-08-31 This book critically analyzes the European Union s promotion of LGBTI rights in the international

arena Lesbian Gay Bisexual Transgender and Intersex rights are heavily contested across the globe with over 70 countries criminalizing same sex relations and at least 10 imposing the death penalty The book details how the EU based on different member state positions attempts to jointly formulate and implement guidelines for the external promotion of LGBTI rights It also problematizes the various normative and policy based Eurocentric prescriptions to further these rights Drawing on an international political sociology framework infused with queer theoretical thought the author investigates the apparent normative tensions emerging from Europe s promotion of LGBTI rights as liberal human rights and the ensuing pushback by culturally and politically conservative states He examines the compatibility of EU institutional and member states conceptions of LGBTI rights and the more general question of the EU s normative agenda setting power on the world stage He then explores the external policy areas in which LGBTI rights promotion is formulated and diffused namely in development and foreign aid in enlargement and neighbourhood policies and in other international organizations In conclusion the author suggests viewing the contention surrounding LGBTI rights within broader governance contexts and thus reimagining rights promotion in a more holistic manner This book will be of great interest to students and scholars of LGBTI and Human Rights European Politics and International Relations
