Multiagent Systems Magdi S. Mahmoud, 2020-03-20 Multiagent systems MAS are one of the most exciting and the fastest growing domains in the

intelligent resource management and agent oriented technology which deals with modeling of autonomous decisions making entities Recent developments have produced very encouraging results in the novel approach of handling multiplayer interactive systems In particular the multiagent system approach is adapted to model control manage or test the operations and management of several system applications including multi vehicles microgrids multi robots where agents represent individual entities in the network Each participant is modeled as an autonomous participant with independent strategies and responses to outcomes They are able to operate autonomously and interact pro actively with their environment In recent works the problem of information consensus is addressed where a team of vehicles communicate with each other to agree on key pieces of information that enable them to work together in a coordinated fashion The problem is challenging because communication channels have limited range and there are possibilities of fading and dropout The book comprises chapters on synchronization and consensus in multiagent systems It shows that the joint presentation of synchronization and consensus enables readers to learn about similarities and differences of both concepts It reviews the cooperative control of multi agent dynamical systems interconnected by a communication network topology Using the terminology of cooperative control each system is endowed with its own state variable and dynamics A fundamental problem in multi agent dynamical systems on networks is the design of distributed protocols that guarantee consensus or synchronization in the sense that the states of all the systems reach the same value It is evident from the results that research in multiagent systems offer opportunities for further developments in theoretical simulation and implementations This book attempts to fill this gap and aims at presenting a comprehensive volume that documents theoretical aspects and practical applications

Factors Influencing Individual Taxpayer Compliance Behaviour Ken Devos, 2013-09-30 This volume provides a comprehensive analysis of why taxpayers behave the way they do It reveals the motivations for why some taxpayers comply with the law while others choose not to comply Given the current global financial climate there is a need for governments worldwide to increase their revenue collections via improving taxpayer compliance Research into what shapes and influences taxpayer behavior is critical in that any marginal improvement in understanding and dealing with this behavior can potentially have a dramatic impact upon government revenue Based on Australian data derived from the data bases of the Australian Taxation Office as an example this book presents findings that provide lessons for tax systems around the world Regardless of the type of tax system in place taxpayers of all nationalities are concerned about how their tax authorities deal with non compliance and in particular how the tax authorities go about encouraging compliance and ensuring a fair tax system for all The book presents empirical evidence concerning taxpayer compliance behavior with particular attention being drawn to the moral values of taxpayers the perceived fairness of the tax system and the deterrent measures undertaken by revenue authorities which influence that behavior Other issues examined include the degree to which tax penalties operate as an effective deterrent to curbing behavior and how taxpayers level of general tax knowledge and awareness also impacts upon their actions

Cartron, 2019-04-01 During World War II many escape line organizations contributed to the Allied cause by funneling hundreds of servicemen trapped behind enemy lines out of occupied Europe As the Germans tightened their noose around the escape lines and infiltrated them the risk of discovery only grew for the servicemen who in ever increasing numbers needed safe passage across the Pyrenees In early 1944 two important escape line organizations operated in Toulouse in southwestern France handing over many fugitives to French passeur Jean Louis Bazerque Charbonnier Along with several of his successful missions Charbonnier's only failure as a passeur is recounted in gripping detail in So Close to Freedom This riveting story recounts how Charbonnier tried to guide a large group of fugitives most of them downed Allied airmen along with a French priest two doctors a Belgian Olympic skater and others to freedom across the Pyrenees Tragically they were discovered by German mountain troopers just shy of the Spanish border Jean Luc E Cartron offers the first detailed account of what happened showing how Charbonnier operated his ties with the Francoise previously Pat O Leary escape line organization and how the group was betrayed and by whom So Close to Freedom sheds light not only on the complex and precarious work of escape lines but also on the concrete nerve racking experiences of the airmen and those helping them It shows the desperation of all those seeking passage to Spain the myriad dangers they faced and the lengths they would go to in order to survive **Naval Aviation News** , 1955
