# The Existence Of Mind

**Charles Southwell**

## **The Existence Of Mind:**

On the Existence of God Robert Geis, 2009-11-11 The existence of God raises many questions Geis work addresses queries that arise from the gratuitous claims of empiricism in Hume unfounded assumptions in Kant presumptions of science and the improbabilities it identifies in Darwinism By focusing on number and proportion as intrinsic to material and atomic constituency any argument from chance as instrumental to the cosmos emergence and sustainability becomes invalidated The arguments from contingency and the nature of intellection provide more clarity than the ratio Anselmi for acknowledging a transcendent causality taking the reader to the problem of evil and present day nihilism These concepts present great but not insuperable difficulty for theism Geis argues that evil when one uses it as a means to the betterment of oneself and the world takes on the role commensurate with the doctrine of an omnibenevolent deity Accordingly one can use evil as a means to a greater understanding of God Providence and eternal destiny

**The Existence of Time** Jean de Climont, 2019-05-29 This essay is an history of time theories since the Antiquity

**On the existence of the supreme being** Robert Anchor Thompson, 1855

The Existence of Mind Richard J. Bernier, 2008-01-01 In philosophy of mind mind body or substance dualism holds that the mind is a real non material entity distinct from the brain Though this position was once the standard view of most Western thinkers it is now often regarded as thoroughly discredited This book seeks to identify the major arguments that have been raised to refute substance dualism and in turn offers a robust defence of dualism as the most plausible model of the mind brain relationship as well as some replies to the opposing arguments The author maintains that perspectives as diverse as epistemology phenomenology and even evolutionary biology converge in support of substance dualism and that it is the view most compatible with the ethical and anthropological claims of Christian theology This work will be of interest to those working in philosophy of mind psychology and neuroscience as well as to scholars of theology and religion

**Five Proofs of the Existence of God** Edward Feser, 2017-08-25 This book provides a detailed updated exposition and defense of five of the historically most important but in recent years largely neglected philosophical proofs of God's existence the Aristotelian the Neo Platonic the Augustinian the Thomistic and the Rationalist It also offers a thorough treatment of each of the key divine attributes unity simplicity eternity omnipotence omniscience perfect goodness and so forth showing that they must be possessed by the God whose existence is demonstrated by the proofs Finally it answers at length all of the objections that have been leveled against these proofs This work provides as ambitious and complete a defense of traditional natural theology as is currently in print Its aim is to vindicate the view of the greatest philosophers of the past thinkers like Aristotle Plotinus Augustine Aquinas Leibniz and many others that the existence of God can be established with certainty by way of purely rational arguments It thereby serves as a refutation both of atheism and of the fideism that gives aid and comfort to atheism

*The Existence of the World* Reinhardt Grossmann, 2019-03-06 Originally published in 1992 The history of Western philosophy can be seen as a battle between those that insist that the physical

universe exists and those would claim that there is a much larger world which contains atemporal and nonspatial things as well. The central part of this book and the battle concerns the existence of universals. Starting with the mediaeval definition of the issue found in Porphyry and Boethius, the author then considers modern and contemporary versions of the battle. He concludes that what is at stake between naturalists and ontologists is the existence and nature of a number of important categories like structures, relations, sets, numbers, and so on. Immortality triumphant. The existence of a God and human immortality philosophically considered, etc John Bovee DODS, 1852      The Existence of Mind John Beloff, 1964      **On the Existence of the Self** Chittaranjan Naik, 2021-08-13. Today most scientists and philosophers have come to regard the notion of the self as a kind of illusion, as a theoretical construct similar to the notion we have of the center of gravity. There are two reasons for this phenomenon: the first is due to the view propagated by the empirical sciences that all things in the universe, including the presence of consciousness, can be explained solely from physical causes, and the second is due to the philosophical arguments marshaled against substance ontology by David Hume and Emmanuel Kant, and the consequent discarding of the idea of self as substance. This book confronts both these views in two separate parts of the book and shows them to be untenable. It provides a fresh proof of the self's existence by demonstrating that the goal-oriented actions of living beings cannot be explained solely through the laws of physics, and that these actions point to a unique power possessed by the self, known in Indian philosophy as *kriya shakti*. This proof, along with the Direct Perception Theory presented by the author in his ground-breaking first book *Natural Realism and Contact Theory of Perception*, effectively dismantles the idea that the physical universe forms a causal closure and opens the doors to a domain of knowledge beyond empirical science.

**Immortality and the Existence of God** David Apolloni, 2024-08-15. Immortality and the Existence of God: Reformulating the Arguments of Plato, Anselm, and G. del. defends a modern version of Plato's argument for the immortality of the soul. The self is essentially conscious and hence essentially living. It is therefore deathless and cannot receive death. But then it also cannot become something else, nor can it be destroyed, since that would be receiving death also. So the self is immortal and immaterial. The book then considers materialist theories of the mind and rejects them. It formulates an argument from introspection which the author believes establishes substance dualism. The argument for immortality and the Ontological Argument for the existence of God are parallel in that attempt to establish the existence of necessary beings. Since immortality makes sense within a theistic context, the second half of the book defends a version of G. del.'s Ontological Argument for God's existence, utilizing experience of the moral good and that mutual entailment of the attributes of God to argue that these attributes, including necessary existence, are logically coherent. In the final chapter, the author uses the central arguments in the book to support accounts of the afterlife from those who have had near-death experiences. **The existence of God** Origen Bachelier, 1822      The Existence Principle Q.B. Gibson, 2012-12-06. When we ask whether something exists, we expect a yes or no answer, not a further query about what kind of existence, how much of it, whether we

mean existence for you or existence for me or whether we are asking about some property which it might have In this book this simple requirement is defended and pursued into its various and sometimes surprising implications In the course of this pursuit such questions arise as Do appearances exist Do unknowable things exist Do past and future exist Does God necessarily exist This novel and non technical approach to important philosophical questions will be of interest to senior students of philosophy and indeed to all general readers with philosophical interests

**Lectures on the Philosophy of the Human Mind** Thomas Brown,1836      *The Oracle of reason: or, Philosophy vindicated (ed. by C. Southwell)*. Charles Southwell,      Revisiting Aquinas' Proofs for the Existence of God Robert Arp,2016-02-02 Edited and introduced by Robert Arp Revisiting Aquinas Proofs for the Existence of God is a collection of new papers written by scholars focusing on the famous Five Proofs or Ways Quinque Viae for the existence of God put forward by St Thomas Aquinas 1225 1274 near the beginning of his unfinished tome Summa Theologica It is not an exaggeration to say that not only is Aquinas Summa a landmark text in the history of Western philosophy and Christianity but also that the Five Proofs discussed therein namely the arguments that conclude to the Unmoved Mover Uncaused Cause Necessary Being Superlative Being and Intelligent Director are as compelling today as they were in the 13th Century Written in a debate format with different scholars arguing for and against each Proof the papers in the book consist of arguments utilizing various combinations of contemporary science and philosophical ideas to bolster the positions The result is a revisiting of Aquinas Proofs that is relevant stimulating enlightening and refreshing

**The Elements of Mind** Henry Jamyn Brooks,1902      **The Mind of God** James W. Peterson,2011-02 The path to true human happiness is governed by the laws of nature including the nature of man It took me over 18 years to discover them by the time you get to the end of this book you will know the path I took This is a report of my journey to discover who I am and why I am here I have discovered that the purpose and course of my life is determined in the same manner as yours It matters not who you are or what your particular circumstance is It doesn't matter if you have lost a child to death or not It doesn't even matter if you have children or not It matters not if you are a murderer or a saint gay or straight male or female first world citizen or jungle savage plant or animal The purpose for living is the same for all living things This book is the result of my search for what the true content of The Mind of God is and how by once acquiring the content of The Mind of God it can be applied to one's own benefit By reading this book you will be exposed to the method of human knowledge acquisition and it will forever change the content of your mind It is said that a mind once expanded by a new idea can never return to its original size Prepare yourself for a mind expanding experience

**Lectures on the Philosophy of the Human Mind** Thomas Brown,2020-08-01 Reproduction of the original Lectures on the Philosophy of the Human Mind by Thomas Brown      *Christian theism: the testimony to the existence and character of the Supreme being* Robert Anchor Thompson,1863      **Essays on the Powers of the Human Mind** Thomas Reid,1827
