

# Spring Eye Patterns

Bright, clear and warm colors (such as light brown, green and hazel)

Sunburst design with a golden or white ring surrounding the pupil.

May have flecks and orange/brown dots called jewels as well. (Some sources say this indicates an autumn influence, but other sources say it can either indicate a health issue or that it's just a genetic result of parents with different eye colors.)

A circular doughnut shape like structure called Halo may exist around the pupil.

- If a Warm undertone is dominant, your eye pattern may contain both a halo and speckles.
- If your dominant characteristic is Light, your eye pattern can have a halo and cloudiness.
- If your Bright features are dominant, your eye pattern can contain both spokes/streams and a halo.
- If you have only a halo and you have cool skin undertones, check with summer credentials.

Here are some spring eyes with influence of other season's eye patterns.
