*Winnicott and Labor's Eclipse of Life* Nathan Gerard, 2023-09-11 Nathan Gerard draws upon the pathbreaking insights of pediatrician and psychoanalyst D W Winnicott to offer a new set of ideas in the novel domain of contemporary work life and its discontents Locating Winnicott within a broad landscape of critical scholarship that dissects work's perils the book positions Winnicott as both a radical critic and creative advocate for building a different kind of work life one that might make room for the presence of self By shuffling the discourse on neoliberal subjectivity to reclaim what Winnicott calls unit status of the separate self Gerard differentiates Winnicott from the relational tradition by advocating for Winnicott's non relational aspects Through such analysis the book

reveals how work and home have become two sides of the same impoverished coin each contributing to a legitimately bad environment that perpetuates self absence and annihilates one's unique sense of feeling real and alive Winnicott and Labor's Eclipse of Life will be of interest to readers of Winnicott and psychoanalysis organization and management studies and anyone hoping to deepen their engagement with the dynamics of contemporary work life

**Traveling through Time** M Gerard Fromm, 2022-02-16

Bullets don t just travel through skin and bone They travel through time These words were tattooed onto the shoulder of a

young woman whose father was shot during The Troubles in Northern Ireland This wrenching volatile but also binding truth is the subject of this book It s a truth about traumatic experiences that happen to a family but also to a society and to the organizations that link these intimate units with the larger context of history and culture It s also a truth about the way trauma plays out over time including between generations Grounded in Erik Erikson s way of looking at things the book is a journal of encounters between clinical psychoanalysis and other disciplines and an inquiry into what might be learned there for both Sometimes that learning has to do with trauma the way in which what can t be emotionally contained thought about or spoken in one part of a system is passed along with disorganizing sometimes heartbreaking consequences to another After a reflection on dignity the book examines intergenerational trauma in families including Erikson s It then illustrates how trauma to organizations slips below the threshold of awareness and yet continues to wear down its members The final section examines aspects of the larger society including radicalization war trauma the pandemic and cultural healing What emerges is the sober yet hopeful truth that what people discover by taking their own emotional experiences seriously though that might markedly differ from what is accepted in the everyday world is a primary path toward recovery from trauma
