

The Grundrisse

Richard J. Bernstein

The Grundrisse:

Grundrisse Karl Marx, 1993-11-07 Written during the winter of 1857-8 the Grundrisse was considered by Marx to be the first scientific elaboration of communist theory A collection of seven notebooks on capital and money it both develops the arguments outlined in the Communist Manifesto 1848 and explores the themes and theses that were to dominate his great later work Capital Here for the first time Marx set out his own version of Hegel's dialectics and developed his mature views on labour surplus value and profit offering many fresh insights into alienation automation and the dangers of capitalist society Yet while the theories in Grundrisse make it a vital precursor to Capital it also provides invaluable descriptions of Marx's wider ranging philosophy making it a unique insight into his beliefs and hopes for the foundation of a communist state For more than seventy years Penguin has been the leading publisher of classic literature in the English speaking world With more than 1 700 titles Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors as well as up to date translations by award winning translators

The Grundrisse Karl Marx, 1971 *Marx's Grundrisse* Karl Marx, 1980 *Karl Marx's Grundrisse* Marcello Musto, 2008-07-25 Written between 1857 and 1858 the Grundrisse is the first draft of Marx's critique of political economy and thus also the initial preparatory work on Capital Despite its editorial vicissitudes and late publication Grundrisse contains numerous reflections on matters that Marx did not develop elsewhere in his oeuvre and is therefore extremely important

Marx's 'Grundrisse' Simon Choat, 2016-07-28 The Grundrisse is widely regarded as one of Marx's most important texts with many commentators claiming it is the centrepiece of his entire oeuvre It is also however a notoriously difficult text to understand and interpret In this the first guide and introduction to reading the Grundrisse Simon Choat helps us to make sense of a text that is both a first draft of Capital and a major work in its own right As well as offering a detailed commentary on the entire text this guide explains the Grundrisse's central themes and arguments and highlights its impact and influence The Grundrisse's discussions of money labour nature freedom the role of machinery and the development and dynamics of capitalism have influenced generations of thinkers from Anglo American historians such as Eric Hobsbawm and Robert Brenner to Continental philosophers like Antonio Negri and Gilles Deleuze as well as offering vital insights into Marx's methodology and the trajectory of his thought Contemporary examples are used throughout this guide both to illuminate Marx's terminology and concepts and to illustrate the continuing relevance of the Grundrisse Readers will be offered guidance on Philosophical and Historical Context Key Themes Reading the Text Reception and Influence

Time, Labor, and Social Domination Moishe Postone, 1993-04-30 Moishe Postone undertakes a fundamental reinterpretation of Karl Marx's mature critical theory. He calls into question many of the presuppositions of traditional Marxist analyses and offers new interpretations of Marx's central arguments. He does so by developing concepts aimed at grasping the essential character and historical development of modern society and also at overcoming the familiar dichotomies of structure and action, meaning and material life. These concepts lead him to an original analysis of the nature and problems of capitalism and provide the basis for a critique of actually existing socialism. According to this new interpretation, Marx identifies the core of the capitalist system with an impersonal form of social domination generated by labor and the industrial production process, which are characterized as expressions of domination generated by labor itself and not simply with market mechanisms and private property. Proletarian labor and the industrial production process are characterized as expressions of domination rather than as means of human emancipation. This reinterpretation entails the form of economic growth and the structure of social labor in modern society to the alienation and domination at the heart of capitalism. This reformulation, Postone argues, provides the foundation for a critical social theory that is more adequate to late twentieth-century capitalism.

The Eye of the Master Matteo Pasquinelli, 2023-10-10 A social history of AI that finally reveals its roots in the spatial computation of industrial factories and the surveillance of collective behaviour. What is AI? A dominant view describes it as the quest to solve intelligence, a solution supposedly to be found in the secret logic of the mind or in the deep physiology of the brain, such as in its complex neural networks. The Eye of the Master argues to the contrary: that the inner code of AI is shaped not by the imitation of biological intelligence but the intelligence of labour and social relations as it is found in Babbage's calculating engines of the industrial age as well as in the recent algorithms for image recognition and surveillance. The idea that AI may one day become autonomous or sentient, as someone thought of Google's LaMDA, is pure fantasy. Computer algorithms have always imitated the form of social relations and the organisation of labour in their own inner structure and their purpose remains blind automation. The Eye of the Master urges a new literacy on AI for scientists, journalists, and new generations of activists who should recognise that the mystery of AI is just the automation of labour at the highest degree, not intelligence per se.

Praxis and Action Richard J. Bernstein, 2011-06-03 From the Introduction: This inquiry is concerned with the themes of praxis and action in four philosophic movements: Marxism, existentialism, pragmatism, and analytic philosophy. It is rare that these four movements are considered in a single inquiry, for there are profound differences of emphasis, focus, terminology, and approach represented by these styles of thought. Many philosophers believe that similarities among these movements are superficial and that a close examination of them will reveal only hopelessly unbridgeable cleavages. While respecting the genuine fundamental differences of these movements, this inquiry is undertaken in the spirit of showing that there are important common themes and motifs in what first appears to be

a chaotic babble of voices I intend to show that the concern with man as an agent has been a primary focal point of each of these movements and further that each contributes something permanent and important to our understanding of the nature and context of human activity

The Formation of the Economic Thought of Karl Marx Ernest Mandel, 2016-09-06 A clear and compact guide to Marx's road to *Das Kapital* Ernest Mandel traces the development of Marx's economic ideas from the Economic and Philosophical Manuscripts to the completion of the Grundrisse In a series of crystalline chapters he provides an overview of subjects central to Marxist economic theory Mandel focuses on Marx's concept of alienation which gained much currency among Marxists in the twentieth century and traces the development of debates surrounding the labour theory of value and Marx's writings on communism and crisis These discussions remain pertinent today and these texts vital to all those who wish to interpret and to change the world

Marx's Concept of the Alternative to Capitalism

Peter Hudis, 2012-07-25 This is the first book length study of Marx's concept of the alternative to capitalism It shows that his critique of capital flowed from a commitment to a specific vision of the kind of human relations that define a new society

The Mismeasure of Wealth Patrick Murray, 2016-09-07 The Mismeasure of Wealth Essays on Marx and Social Form gathers Patrick Murray's essays reinterpreting Marx and Marxian theory published since his Marx's Theory of Scientific Knowledge 1988 along with a previously unpublished essay and an introduction Murray's essays concentrate on Marx the historical materialist the investigator of historically specific social forms of wealth and labour There is no production in general the production of wealth always involves specific social forms and purposes that matter in many ways Marx's attention to the dynamics and far reaching consequences of historically specific social forms in particular those that are constitutive of the capitalist mode of production sets him off from classical political economy and traditional Marxism In probing Marx's dialectical accounts of the commodity value money surplus value wage labour and capital The Mismeasure of Wealth establishes Marx's singular relevance for critical social theory today

Marx's Concept of Money Anitra

Nelson, 2012-11-12 This work relates Marx's theory of money to his overall political economy and places it firmly within the wider context of his political and philosophical thought It has for some time been held that there exists an epistemological break between the early humanist and later scientific Marx However in this ground breaking study Anitra Nelson links Marx's concept of money to his early key concepts with particular reference to alienation

The Nature of Capital Richard

Marsden, 1999-08-26 Original in conception and bold in its diagnosis this work will be welcomed by students of and researchers in economics social theory Marx Foucault and postmodernity

(De)Automating the Future, 2024-09-02 Much has been written about the prospects of automation in recent years While many have raised concerns over the threat of technological mass unemployment others have anticipated a fully automated communist utopia which will provide material abundance to everyone De Automating the Future gathers chapters that critically investigate automation's ambivalences from interdisciplinary Marxist perspectives The contributions raise questions about automation's affordances for

postcapitalism its transformation of manual and mental labour and its role in the intensification of class antagonisms and exploitation *Marxian Totality* Kaveh Boveiri, 2024-08-19 The present volume represents the first book length monograph on the Marxian concept of totality as seen from a philosophical and sociopolitical perspective Drawing on a large number of classical and contemporary works Boveiri elucidates the distinctive features of Marxian totality with a particular focus on its methodology The work has four fundamental elements or moments First it develops arguments against undialectical conceptions of totality Then it presents a critical reading of Hegelian totality focused on *The Science of Logic* Its penultimate section examines the shortcomings of two well known conceptions of totality one by Georg Lukács another by Karel Kosík before a final section examines in detail the developmental characteristics of Marxian totality The volume concludes with a chapter dealing with methodological implications
