Bureau of Naval Personnel, 1966 *Exact Solutions and Scalar Fields in Gravity* Alfredo Macías, Jorge L. Cervantes-Cota, Claus

Lämmerzahl,2007-05-08 Divided into four parts this book covers recent developments in topics pertaining to gravity theories including discussions on the presence of scalar fields Part One is devoted to exact solutions in general relativity and is mainly concerned with the results of rotating null dust beams and fluids Also included is a panoramic vision of new research directions in this area which would require revising certain theorems and their possible extensions within gravity theories new aspects concerning the Ernst potentials double Kerr spacetimes and rotating configurations In particular there is a detailed discussion of totally symmetric and totally geodesic spaces in which a method for generating 2 1 dimensional solutions from 3 1 dimensional solutions is given Part Two deals with alternative theories of gravity all of which include scalar fields and gauge fields Here quantum and cosmological effects which arise from both gravity theories in four and higher dimensions and from metric affine theories are investigated Part Three is devoted to cosmological and inflationary scenarios Local effects such as the influence of scalar fields in protogalactic interactions numerical studies of the collapse of molecular cores as well as the inverse inflationary problem and the blue eigenvalue spectrum of it are considered Moreover the role of scalar fields as dark matter and quantum cosmology in the Bergman Wagoner and Gowdy theories together with the relation of the conformal symmetry and deflationary gas universe are likewise presented The last part of the book includes some mixed topics which are still in the experimental stage Among them are the foundation of the Maxwell theory a discussion on electromagnetic Thirring problems a note on the staticity of black holes with non minimally coupled scalar fields and a study of the Lorentz force free charged fluids in general relativity Thus this book is the most up to date comprehensive collection of papers on the subject of exact solutions and scalar fields in gravity and is a valuable tool for researchers in the area

Dynamics And Mission Design Near Libration Points - Vol I: Fundamentals: The Case Of Collinear Libration Points Gerard Gomez,Jaume Llibre,R Martinez,Carles Simo,2001-04-02 In this book the problem of station keeping is studied for orbits near libration points in the solar system The main focus is on orbits near halo ones in the Earth Moon Sun system Taking as starting point the restricted three body problem the motion in the full solar system is considered as a perturbation of this simplified model All the study is done with enough generality to allow easy application to other primary secondary systems as a simple extension of the analytical and numerical computations

Ecer,Jacques Periaux,1995-01-30 This volume contains the papers presented at the Parallel Computing Fluid Dynamics 93 Conference Paris 1993 A wide range of topics are covered including networked computers data parallel programming domain decomposition Euler and Navier Stokes solvers Researchers in this area will find this volume a useful reference in this rapidly developing field *Research on the Nature of Mineral-Forming Solutions* N. P. Yermakov,2013-10-22 Research on the Nature of Mineral Forming Solutions is the first book on the subject of fluid inclusions This book contains observational data and studies of mineral forming solutions done in the Soviet Union The description and natural classification of inclusion in minerals according to their composition and state are discussed Gaseous liquefied and solidified inclusions that are found in minerals and their significance are considered important in determining the presence and availability of the mineral For example any earlier or contemporaneous minerals that are found only in their host crystals can be determined by analyzing the presence of solid inclusions The origin and genetic classifications of liquid and gaseous inclusions being both abundant in hypogene ore deposits are explained Other less common methods in the study of inclusions besides homogenization of inclusions by heating under the microscope are forwarded The authors believe that exact measurements of the homogenization temperature are possible and therefore can serve as a precise indicator in understanding the process of formation of individual crystals and

hydrothermal deposits Other studies of the All Union Research Institute of Piezo optical Mineral Raw Materials are also discussed This collection of monographs will prove invaluable to mineralogists geologists and research chemists studying minerals and ore deposits
