The English Religious Lexis:

The English Religious Lexis Thomas Chase, 1988 This text forms part of the Historical Thesaurus of English project at the University of Glasgow It provides a detailed semantic classification of the English religious vocabulary from Anglo Saxon times to the present

Current Methods in Historical Semantics Kathryn Allan, Justyna A. Robinson, 2011-12-23 Innovative data driven methods provide more rigorous and systematic evidence for the description and explanation of diachronic semantic processes The volume systematises reviews and promotes a range of empirical research techniques and theoretical perspectives that currently inform work across the discipline of historical semantics In addition to emphasising the use of new technology the potential of current theoretical models e g within variationist sociolinguistic or cognitive frameworks is explored along the way

An Introduction to Religious Language Valerie Hobbs, 2020-12-10 Religious language is all around us embedded in advertising politics and news media This book introduces readers to the field of theolinguistics the study of religious language Investigating the ways in which people talk to and about God about the sacred and about religion itself it considers why people make certain linguistic choices and what they accomplish Introducing the key methods required for examining religious language Valerie Hobbs acquaints readers with the most common and important theolinguistic features and their functions Using critical corpus assisted discourse analysis with a focus on archaic and other lexical features metaphor agency and intertextuality she examines religious language in context Highlighting its use in both expected locations such as modern day prayer and politics and unexpected locations including advertising sport healthcare and news media Hobbs analyses the shifting and porous linguistic boundaries between the religious and the secular With discussion questions and further readings for each chapter as well as a companion website featuring suggested answers to the reflection tasks this is the ideal introduction to the study of religious language

A Thesaurus of Old English, Volume 1, 2021-10-01 A Thesaurus of Old English is conceptually arranged and presents the vocabulary of Anglo Saxon England within ordered categories This allows the user to approach the materials of the Thesaurus by subject rather than through an alphabetic index as is the case for many thesauri The provision of brief indications of meaning at all levels of this scheme allows word senses to follow on from ideas explained so that this thesaurus incorporates information about word meaning and could be described as an inside out dictionary with meanings first and then words In addition to providing hitherto unavailable information for linguists historians of language authors students of English and textual scholars A Thesaurus of Old English is a rich resource for investigating social and cultural history showing the development of concepts through the words that refer to them The Thesaurus can be consulted online at the University of Glasgow website

Language Contact and Semantic Development in Late Medieval English Louise Sylvester, Megan Tiddeman, Richard Ingham, Kathryn Allan, 2025-09-22 The multilingual context of medieval Britain has been a focus of historical linguistic scholarship for some time but Middle English has often been examined in isolation This book analyzes a large dataset of English vocabulary from

the late Middle Ages a time when the language was gaining new importance with attention paid to parallel lexical developments in French and Latin It explores lexical and semantic innovations and losses and its findings challenge the notion that native and borrowed words were in competition during the period The book presents a new picture of ongoing bilingualism in the late medieval period and a growth in vocabulary that heralded the beginnings of standardization in English A Thesaurus of Old English: Introduction and thesaurus Jane Roberts,2000 **Perspectives on Variation**

Nicole Delbecque,Johan van der Auwera,Dirk Geeraerts,2011-06-24 The significant advances witnessed over the last years in the broad field of linguistic variation testify to a growing convergence between sociolinguistic approaches and the somewhat older historical and comparative research traditions Particularly within cognitive and functional linguistics the evolution towards a maximally dynamic approach to language goes hand in hand with a renewed interest in corpus research and quantitative methods of analysis Many researchers feel that only in this way one can do justice to the complex interaction of forces and factors involved in linguistic variability both synchronically and diachronically The contributions to the present volume illustrate the ongoing evolution of the field By bringing together a series of analyses that rely on extensive corpuses to shed light on sociolinguistic historical and comparative forms of variation the volume highlights the interaction between these subfields Most of the contributions go back to talks presented at the meeting of the Societas Linguistica Europaea held in Leuven in 2001 The volume starts with a global typological view on the sociolinguistic landscape of Europe offered by Peter Auer It is followed by a methodological proposal for measuring phonetic similarity between dialects designed by Paul Heggarty April McMahon and Robert McMahon Various papers deal with specific phenomena of socially and conceptually driven variation within a single language For Dutch Jos Tummers Dirk Speelman and Dirk Geeraerts analyze inflectional variation in Belgian and Netherlandic Dutch Reinhild Vandekerckhove focuses on interdialectal convergence between West Flemish urban dialects and Arjan van Leuvensteijn studies competing forms of address in the 17th century Dutch standard variety The cultural and conceptual dimension is also present in the diachronic lexicosemantic explorations presented by Heli Tissari Clara Molina and Caroline Gevaert for English expressions referring to the experiential domains of love sorrow and anger respectively the history of words is systematically linked up with the images they convey and the evolving conceptualizations they reveal The papers by Heide Wegener and by Marcin Kilarski and Grzegorz Krynicki constitute a plea against arbitrariness of alternations at the level of nominal morphology dealing with marked plural forms in German and with gender assignment to English loanwords in the Scandinavian languages respectively their distributional accounts bring into the picture a variety of motivating factors The four cross linguistic studies that close the volume focus on the differing ways in which even closely related languages exploit parallel morphosyntactic patterns They share the same methodological concern for combining rigorous parametrization and quantification with conceptual and discourse functional explanations While Griet Beheydt and Katleen Van den Steen confront the use of formally defined competing constructions in two

Germanic and two Romance languages respectively Torsten Leuschner as well as Gisela Harras and Kirsten Proost analyze how a particular speaker's attitude is expressed differently in various Germanic languages Corpora Across the Centuries, 2023-11-27 This is the first book to give an overall survey of the ongoing projects in diachronic computerized corpora of English The volume is based on the papers read at the First International Colloquium for English Diachronic Corpora held at Cambridge in March 1993 Twelve historical English corpora completed and in preparation are introduced in the volume Most of these can be described as multi-genre corpora a few concentrate either on one genre only or on the works of a single author Chronologically these corpora span more than twelve centuries from the beginnings of documented Old English up to our days Besides Southern British English corpus projects on Older Scots Early American English and Irish English are introduced Some of the reports contain discussions of such important questions as genre division normalization and problems of sampling In addition to corpus compilation projects the volume contains reports on major projects in the field of the history of English utilizing corpora and specialized software Two linguistic atlases Early Middle English Older Scots and two dictionary projects Early Modern English and Samuel Johnson are introduced as well as the English Historical Thesaurus with a separate paper on the Old English Thesaurus The volume also contains up to date information on software specially developed for historical corpus work LEXA on different kinds of network resources and on the Text Encoding Initiative TEI

Love, Sex, and Marriage Julie Coleman, 2022-06-13 If the language we use influences and reflects the way that we see the world then the fields of LOVE SEX and MARRIAGE will show how speakers of English view their closest social and emotional relationships Love Sex and Marriage provides a classification of English terms for these three fields from the earliest written records of the language until the present day This volume makes it possible to trace changing attitudes towards social and sexual ties and to understand those ties as earlier speakers of English did through the language they used The terms are arranged by meaning and are listed chronologically within semantic fields with their dates of usage Notes on individual terms provide further

information about their connotations and development Language does not exist in isolation from the people who speak it so background information about changes in social conditions religious beliefs and medical advancements is also included A brief introduction to basic semantic terminology explains the principles behind the classification and an alphabetical index facilitates the location of individual terms

Medieval English in a Multilingual Context Sara M. Pons-Sanz, Louise Sylvester, 2023-11-14 This edited book examines the multilingual culture of medieval England exploring its impact on the development of English and its textual manifestations from a multi disciplinary perspective The book offers overviews of the state of the art of research and case studies on this subject in sub disciplines of linguistics including historical linguistics onomastics lexicology and lexicography sociolinguistics code switching and language contact and also includes contributions from literary and socio cultural studies material culture and palaeography The authors focus on the variety of languages in use in medieval Britain including English Old Norse Norn Dutch Welsh French and Latin making the argument that understanding the impact of medieval multilingualism on the development of English requires multidisiplinarity and the bringing together of different frameworks in linguistics and cultural studies to achieve more nuanced answers This book will be of interest to academics and students of historical linguistics and medieval textual culture

Explanation and Linguistic Change Willem F. Koopman, 1987 This volume presents the outcome of a workshop held in Amsterdam in 1985 on the nature even possibility of explanation in Historical Linguistics why changes take place and others do not and why they occur at a particular time and place The workshop and this volume aim to explore questions such as i are the factors which explain the actuation of a change different from those that explain its implementation ii is it possible to give a typology of changes iii should linguistic explanation hope to meet the same requirements as explanation in the pure sciences iv are all linguistic changes necessarily the product of variation v should there be a formal theory of change apart from a general thoery of grammar

Diachronic Developments in English News Discourse Minna Palander-Collin, Maura Ratia, Irma Taavitsainen, 2017-08-15 The history of English news discourse is characterised by intriguing multilevel developments and the present cannot be separated from them For example audience engagement is by no means an invention of the digital age This collection highlights major topics that range from newspaper genres like sports reports advertisements and comic strips to a variety of news practices All contributions view news discourse in a specific historical period or across time and relate language features to their sociohistorical contexts and changing ideologies The varying needs and expectations of the newspaper producers writers and readers and even news agents are taken into account The articles use interdisciplinary study methods and move at interfaces between sociolinguistics journalism semiotics literary theory critical discourse analysis pragmatics and sociology

Religious Fundamentalisms and the Human Rights of Women C. Howland, 1999-09-03 Dialogue on the conflict between religious fundamentalism and women s rights is often stymied by an all or nothing approach fundamentalists claim of absolute religious freedom while some feminists dismiss religion entirely as being so imbued with

patriarchy as to be eternally opposed to women's rights This ignores though the experiences of religious women who suffer under fundamentalism and fight to resist it perceiving themselves to be at once religious and feminist In *Religious Fundamentalisms and the Human Rights of Women* Howland provides a forum for these different scholars both religious and nonreligious to meet and seek common ground in their fight against fundamentalism Through an examination of international human rights national law grass roots activism and theology this volume explores the acute problems that contemporary fundamentalist movements pose for women's equality and liberty rights
