In Defence of Atheism Michel Onfray, 2011-05-26 In the twenty first century religion is making a comeback bringing in its wake extremism of all kinds From Christian anti abortion campaigns to suicide bombers claiming the righteousness of Islam we are witnessing a resurgence of fundamentalism Michel Onfray's response to the threat of a post modern theocracy is to lay down the principles of an authentic atheism exposing the fiction that is God he

proposes instead a new philosophy of reason that celebrates life and humanity In Defence of Atheism demonstrates that organised religion is motivated by worldly historical and political power that the three dominant monotheisms Christianity Islam and Judaism exhibit the same hatred of women reason the body the passions that religion denies life and glorifies death Onfray exposes some uncomfortable truths Judaism invented the extermination of a people Jesus never existed historically Christianity was enforced with extreme violence by Constantine Islam is anti Semitic misogynist warlike and incompatible with the values of a modern democracy Christian Thought in the Twenty-First Century Douglas H. Shantz, Tinu Ruparell, 2012-04-01 In this volume some of the outstanding Christian scholars of our day reflect on how their minds have changed how their academic fields have changed over the course of their careers and the pressing issues that Christian scholars will need to address in the twenty first century This volume offers an accessible portrait of key trends in the world of Christian scholarship today Christian Thought in the Twenty First Century features scholars from Great Britain Canada the United States and Switzerland The contributors represent a wide variety of academic backgrounds from biblical studies to theology to religious studies to history English literature philosophy law and ethics This book offers a personal glimpse of Christian scholars in a self reflective mode capturing their honest reflections on the changing state of the academy and on changes in their own minds and outlooks The breadth and depth of insight afforded by these contributions provide rich soil for a reader's own reflections and an agenda that will occupy Christian thinkers well into the twenty first century

Bird on an Ethics Wire Margaret Somerville, 2015-11-01 Our physical ecosystem is not indestructible and we have obligations to hold it in trust for future generations The same is true of our metaphysical ecosystem the values principles attitudes beliefs and shared stories on which we have founded our society In Bird on an Ethics Wire Margaret Somerville explores the values needed to maintain a world that reasonable people would want to live in and pass on to their descendants Somerville addresses the conflicts between people who espouse progressive values and those who uphold traditional ones by casting her attention on the debates surrounding birth abortion and reproductive technologies and death euthanasia and shows how words are often used as weapons She proposes that we should seek to experience amazement wonder and awe to enrich our lives and help us to find meaning Such experiences Somerville believes can change how we see the world and live our lives and affect the decisions we make especially regarding values and ethics They can help us to cope with physical or existential suffering and ultimately put us in touch with the sacred in either its secular or religious form which protects what we must not destroy Experiencing amazement wonder and awe Somerville concludes can also generate hope without which our spirit dies Both individuals and societies need hope a sense of connection to the future if the world is to make the best decisions about values in the battles that constitute the current culture wars **Thieves of Virtue** Tom Koch, 2014-08-29 An argument against the lifeboat ethic of contemporary bioethics that views medicine as a commodity rather than a tradition of care and caring Bioethics emerged in the 1960s from a conviction that physicians and researchers needed the guidance of philosophers in handling the issues raised by technological advances in medicine It blossomed as a response to the perceived doctor knows best paternalism of the traditional medical ethic and today plays a critical role in health policies and treatment decisions Bioethics claimed to offer a set of generally applicable universally accepted guidelines that would simplify complex situations In Thieves of Virtue Tom Koch contends that bioethics has failed to deliver on its promises Instead he argues bioethics has promoted a view of medicine as a commodity whose delivery is predicated not on care but on economic efficiency At the heart of bioethics Koch writes is a lifeboat ethic that assumes scarcity of medical resources is a natural condition rather than the result of prior economic political and social choices The idea of natural scarcity requiring ethical

triage signaled a shift in ethical emphasis from patient care and the physician's responsibility for it to neoliberal accountancies and the promotion of research as the preeminent good. The solution to the failure of bioethics is not a new set of simplistic principles. Koch points the way to a transformed medical ethics that is humanist, responsible, and defensible.

Cutting to the Core David Benatar, 2006-03-06 When the benefits of surgery do not outweigh the harms or where they do not clearly do so, surgical interventions become morally contested. *Cutting to the Core* examines a number of such surgeries, including infant male circumcision and cutting the genitals of female children. [Handbook of Research on Technoself: Identity in a Technological Society](#) Luppici, Rocci, 2012-10-31

This book provides insights to better enhance the understanding of technology's widespread intertwinement with human identity within an advancing technological society. Provided by publisher **Muslim-Christian Engagement in the Twentieth Century** Charles Fletcher, 2014-10-21

Christian-Muslim dialogue grows increasingly important, but little is known about individual Muslim dialogical thinkers. Born in Palestine in 1921, Ismail al-Faruqi was a leading figure in the development of conversation and debate across faiths in North America in the second half of the twentieth century and was actively engaged in interfaith study and dialogue. Al-Faruqi founded the Islamic Studies programme at Temple University, Pennsylvania, where several distinguished Muslim intellectuals have taught, such as Seyyid Hossein Nasr, Mahmoud Ayoub, and Hasan Hanafi. Along with Kenneth Cragg and Wilfred Cantwell Smith, al-Faruqi was an active participant in Muslim-Christian dialogues in the 1970s and the 1980s. Charles Fletcher here presents the first study dedicated to Ismail al-Faruqi's theory and practice of interfaith dialogue. Analysing al-Faruqi's sometimes provocative ideas on the comparative study of religion, dialogue, and practical engagement, the author provides an illuminating study of the life and thought of this important scholar. Tracing the development of al-Faruqi's ideas and practice of interfaith dialogue, Fletcher shows how Muslim intellectuals engaged in such attempts viewed their role as representatives of the worldwide Muslim community. With perceptive insights into the history of contemporary Muslim-Christian dialogue, this book will be invaluable for all those interested in interfaith relations, comparative religious studies, North American Muslims, and Islamic studies. [Worldviews](#) John Valk, 2021-10-01

This book investigates the concept of worldview in its numerous aspects and how worldviews impact, shape, and influence individuals, communities, societies, and cultures. It explores various worldviews, religious, spiritual, and secular, using a comprehensive approach to highlight their breadth, depth, and scope. John Valk argues that everyone has a worldview and that worldview is often shaped and influenced by individual circumstances and situations. While worldviews have similar structures to one another, they vary in content, including differences in metanarratives, teachings, ethics, and more. In the course of explaining how worldviews respond to life's ultimate and existential challenges, the book poses ontological questions to highlight various worldviews on the nature of being and the human, and epistemological questions pertaining to sources of knowledge and certainty. Inviting readers to reflect on their own worldviews as they explore the worldviews of others, Valk also reveals how certain universal worldviews

beliefs are interpreted in particular contexts *Flesh and Blood* George C. Denniston, Frederick Mansfield Hodges, Marilyn Fayre Milos, 2013-03-09 Who owns your sex organs Different cultures today and in different epochs have given a variety of answers to this question It may seem self evident that every individual owns and has sovereignty over his or her own body parts such as the head legs nose stomach pancreas and other body parts The sex organs however seem to be an exception Even though they are as much an integral part of the individual as a leg or a liver the sex organs are unique in that many cultures have established laws and taboos over the use and even the mere display of the sex organs Thus certain cultures have placed constraints over the individual s ownership of his or her sex organs and actively regulate and restrict the individual s access and use of those organs In other cultures the question of ownership of the sex organs is more decisively answered In any culture where circumcision to any degree of either the male or female is practiced permitted encouraged or even merely tolerated it is clear that the individual is not considered to own his own sex organs In the United States today the medical establishment has created an is considered acceptable and desirable that anyone for environment where it any reason can authorize or execute the amputation of the foreskin from a male child s penis
