The Ethics Of Creativity:

The Ethics of Creativity Brian G. Henning, 2011-12-09 Foreword by Daniel A Dombrowski A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants nonhuman animals and the systems of which they are a part Although nearly all environmental philosophies have long since rejected modernity s conception of individuals as isolated and independent substances few have replaced this worldview with an alternative that is adequate to the organic processive world in which we find ourselves In this context Brian G Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics Additionally inspired by classical American philosophers such as William James John Dewey and Charles Sanders Pierce and environmental philosophers such as Aldo Leopold Peter Singer Albert Schweitzer and Arne Naess Henning develops an ethical theory of which the seminal insight is called The Ethics of Creativity By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems The Ethics of Creativity correctly emphasizes the well being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes In this way The Ethics of Creativity has the potential to be a unique voice in contemporary moral philosophy **The Ethics of Creativity** S. Moran, D. Cropley, J. Kaufman, 2014-03-28 The Ethics of Creativity illuminates the thorny issues that arise when novel creative ideas collide with what we believe to be right or good This book tackles questions of when creativity and ethics tend to coincide and when conflict and how both might be harnessed to support a brighter future for all **Ethical Ripples of Creativity** and Innovation Seana Moran, 2016-04-08 If we are going to promote creativity as an ideal to strive toward shouldn t we make sure we also instil ethical anticipation so our creative contributions produce a better world rather than chaos and waste Creativity drives cultural development We all directly or indirectly collaborate in the creation of culture and we are jointly responsible for the way that culture develops The goals and decisions we make as both creators and adopters pave pathways into the future for us all Instead of merely reflecting on past events Ethical Ripples of Creativity and Innovation educates for proflection through cases that present what might be scenarios for creative contributions that are emerging into mainstream culture stimulating real time thinking about creativity in action This book offers the opportunity to strengthen ethical anticipation by considering the possibilities streaming from current creative offerings that affect our bodies emotions C.G. Jung and Nikolai Berdyaev: Individuation and the Person Georg selves and social interactions Nicolaus, 2010-09-13 This book explores C G Jung s psychology through the perspective of the existential philosopher Nikolai Berdyaev drawing striking parallels between Jung s theory of individuation and Berdyaev s understanding of the person Placing Jung and Berdyaev firmly within the context of secular humanism Nicolaus draws on their personal experiences of individuation to show how both writers seek to enable a renewal of our self understanding as persons in a post religious

society Topics of discussion include the foundations of Berdyaev's personalism Jung's psychological interpretation of the Christian God image individuation and the ethics of creativity C G Jung and Nikolai Berdyaev Individuation and the Person offers a fresh perspective on the ethical implications of Jung's theory and serves also as an introduction to Berdyaev's thought As such this book will appeal to analytical psychologists scholars engaged with Jungian thought and all those interested in the interface between spirituality and depth psychology Whiteheadian Ethics Mihály Tóth, Theodore Walker, 2009-03-26 For deliberations on the ethical and meta ethical implications of Alfred North Whitehead's process philosophy here are abstracts and papers from the Ethics Section of the 6th International Whitehead Conference held at the University of Salzburg in Salzburg Austria in July 2006 In accordance with the conference schedule there are three subsections The subsection on Metaphysics of Morals and Moral Theory includes contributions from Franklin I Gamwell Does Morality Presuppose God John W Lango abstract only Duane Voskuil Ethics Dipolar Necessities and Theistic Implications and Theodore Walker Ir Neoclassical Cosmology and Matthew 22 36 40 The subsection on Evaluating Moral Practices includes contributions from Frederick Ferr abstract only Seung Gap Lee Hope for the Earth A Process Eschatological Eco ethics for South Korea Mary Elizabeth Mullino Moore Compassion Creativity and Form The Ethics of Institutions and George W Shields Ruse Altruism and Process Philosophy The subsection on Ethics and Aesthetic Values includes contributions from Stephen T Franklin abstract only Brian G Henning Is There an Ethics of Creativity Mih ly T th Art of Life and the Ethics of Life Forming and Guorong Yang Problems and Perspectives in the Emerging of Global Society A History of Russian Philosophy V. V. Zenkovsky, 2003 The Contribution of Fiction to Organizational Ethics Howard Harris, Michael Schwartz, 2014-09-05 Stories are essential to any organization They help organizations define who they are what they do and how they do it In this issue we consider how fiction has questioned the moral rules and examined such situations and in doing so how it has contributed to our understanding of organizational ethics The ^ACreativity Reader Vlad Petre Glaveanu,2019-05-13 The Creativity Reader brings together a prestigious group of international experts who were tasked with choosing introducing and commenting on seminal texts focused on creativity invention genius and imagination from the period of 1850 to 1950 This volume is at once retrospective and prospective it revisits old ideas assesses their importance today and explores their potential for the future History Russian Philosophy V2 V Zenkovsky, 2014-06-23 First published in 2003 This is volume II in the history of Russian philosophy written in 1953 it takes in the work of Vladimir Solovyov V D Kudryatsev Nesmelov Tareyev M I Karinski Fyodorov as well as the twentieth century moves into Materialism Neo Marxism and the Religio philosophic renaissance and finally the metaphysics of total unity Working Paper Series ,1984 Nietzsche and Morality Brian Leiter, Neil Sinhababu, 2007-02-15 Nietzsche was surprisingly neglected by most English language moral philosophers until recently This volume capitalizes on a growth of interest in Nietzsche's work on morality from two sides from scholars of the history of philosophy and from contributors to current debates on ethical theory In eleven new essays

leading philosophers aim both to advance philosophical understanding of Nietzsche's ethical views his normative and meta ethics his moral psychology his views on free will and the nature of the self and to make Nietzsche a live participant in contemporary debates in ethics and cognate fields Philosophers on the University Ronald Barnett, Amanda Fulford, 2020-02-26 This book shows the significance of the thinking of philosophers and other key thinkers in understanding the university and higher education Through those explorations it widens and substantially adds to the emerging philosophy of higher education It builds on the historical literature on the idea of the university and provides higher education scholars with highly accessible introductions to the thinking of key philosophers and thinkers alerting them to a set of literature that otherwise might not be encountered Until very recently most of the debate on higher education both in the public domain and in the scholarly literature has been conducted with little regard to the philosophical literature This is odd for two reasons Firstly much of the historical literature on the idea of the university over the past two hundred years has been written by philosophers and their thinking has largely gone unmined Second and perhaps even more importantly many of the issues in the higher education debate are either philosophical in their nature or require reflective thinking and there lies to hand huge resources in the philosophical literature that can help in working through those issues Issues such as what is to count as knowledge in the university wisdom voice democracy culture what it is to be a student or academic academic freedom communication work and disciplinarity cry out for the kind of insights that the philosophical literature very broadly understood can offer This book attempts precisely to do this to show how the work of key thinkers can help in deepening the higher education debate Each chapter focuses on an individual thinker giving both an insight into the thinker in guestion and accessibly drawing out something of their thinking and showing its significance in understanding the university and higher education The editors provide a full length introduction that marks out this large territory and prepares the ground for the reader The book impressively builds a rich meshwork of careful and thorough thinking around the university and higher education by way of introducing 14 important philosophers on timely subjects such as culture and the university higher education and democracy and the role of the university The volume is a great contribution to the important task of deepening the debate about higher education and the university through introducing important philosophers in ways that might help the university and higher education work through some of the issues and challenges that it is currently facing As such this book is essential reading for anyone wanting to wander and wonder deeper into the core purposes and possibilities of higher education in the good companionship of outstanding thinkers and distinguished academics on these matters A playground for philosophical thought and adventure Rikke Toft N rg rd Associate Professor Aarhus University Denmark This book is an excellent introduction to a wide range of famous thinkers and what they have to say about the university and higher education today It goes beyond the contemporary preoccupation with metrics based on managerialism and takes a much needed philosophical look at what higher education should be or should aspire to be Assoc Prof Stephen Loftus Foundational

The Elgar Companion to Innovation and Knowledge Creation Harald Bathelt, Patrick Cohendet, Sebastian Henn, Laurent Simon, 2017-11-24 This unique Companion provides a comprehensive overview and critical evaluation of existing conceptualizations and new developments in innovation research It draws on multiple perspectives of innovation knowledge and creativity from economics geography history management political science and sociology The Companion brings together leading scholars to reflect upon innovation as a concept Part I innovation and institutions Part II innovation and creativity Part III innovation networking and communities Part IV innovation in permanent spatial settings Part V innovation in temporary virtual and open settings Part VI innovation entrepreneurship and market making Part VII and the governance and management of innovation Part VIII The Ethics of Becoming a Good Teacher Ying Ma,2023-09-22 This book explores Aristotelian and Confucian wisdom traditions to understand education and what counts as a good teacher in an embodied dialogic approach The book creates a dialogue between ancient ideas and the author's lived experiences as a teacher in cross cultural landscapes today to ruminate on the important themes of educational purpose teacher excellence teacher student relationships and teaching skill It asks fundamental educational questions including Why Do We Educate Eudaimonia and Dao What Do We Educate Phronesis Philia and Ren and How Do We Educate Techne and Liuyi Moving beyond the dominant epistemological concerns such as how to teach more effectively to help students gain better marks in schools it constitutes an ethical inquiry that illuminates the values purposes concerns and hopes that animate genuinely educational work Using a comparative approach to wisdom traditions from both the East and the West it addresses parochialism and challenges Eurocentric research paradigms Embedded in the messy ground of teaching in intergenerational and cross cultural narratives the author s own experiences as a student teacher daughter of a teacher mother of a student

crucially unpacks and concretizes ancient concepts and reactivates them in concrete situations A sense of a whole without completeness a conception of the good without closure and an aspiration without achievement continue to haunt the search for an ultimate answer to the question what counts as a good teacher It will appeal to scholars teachers and teacher educators with an interest in narrative inquiry and educational research as well as those in the field of curriculum studies and the philosophy of education A History of Russian Philosophy Valery A. Kuvakin, 1994-02 For the first time since the break up of the USSR and with the help of 21 leading historians of Russian philosophy from Moscow State University including M N Gromov Z A Kamensky M A Maslin B G Safronov and V V Serbinenko Valery A Kuvakin presents a comprehensive two volume work capturing the rich philosophical heritage of this diverse culture These scholars discuss its interpretation of the universe the essence of history and human existence the ideals of knowledge and a decent life the destiny of Russia and the life of the world community from the 10th century through the early 20th century These discussions are augmented with selected excerpts from original works which served as examples of the main schools of thought Affirmation of Life Bernard REGINSTER, Bernard Reginster, 2009-06-30 While most recent studies of Nietzsche's works have lost sight of the fundamental question of the meaning of a life characterized by inescapable suffering Bernard Reginster's book The Affirmation of Life brings it sharply into focus Reginster identifies overcoming nihilism as a central objective of Nietzsche s philosophical project and shows how this concern systematically animates all of his main ideas **Morality: The Ethics of Machine Decision-Making** Ahmad Musa,2024-12-27 In a world increasingly driven by technology the decisions made by machines are no longer just an afterthought they shape our lives our societies and our futures Algorithmic Morality The Ethics of Machine Decision Making dives deep into the complex and often controversial realm of artificial intelligence and machine learning exploring the ethical implications of algorithms that decide everything from hiring practices to judicial outcomes This thought provoking book examines the profound questions of fairness accountability and transparency that arise when machines are tasked with making decisions that impact human lives Through a mix of case studies expert insights and real world examples it probes the moral dilemmas that technology presents such as bias in algorithms the potential for unintended consequences and the limits of machine autonomy Algorithmic Morality also challenges readers to confront the broader philosophical questions surrounding the role of technology in a rapidly changing world Can machines be trusted to act ethically Who is responsible when algorithms go wrong And how can we ensure that technological progress is aligned with the values of society This book is a must read for anyone interested in understanding the intersection of ethics technology and society It is an essential resource for students professionals and anyone concerned with the future of AI and the moral compass that guides it The Psychology of Innovation in Organizations David H. Cropley, Arthur J. Cropley, 2015-07-22 In today s highly competitive market organizations increasingly need to innovate in order to survive Drawing on a wealth of psychological research in the field of creativity David H Cropley and Arthur J Cropley

illustrate practical methods for conceptualizing and managing organizational innovation. They present a dynamic model of the interactions between four key components of creativity product person process and press which function as building blocks of innovation This volume sheds new light on the nature of innovative products and the processes that generate them the psychological characteristics of innovative people and the environments that facilitate innovation It also fills a significant gap in the current literature by addressing the paradoxical quality of organizational innovation which may be both helped and hindered by the same factors The authors demonstrate that with proper measurement and management organizations can effectively encourage individuals to produce and take advantage of novel ideas The SAGE Handbook of Curriculum. **Pedagogy and Assessment** Dominic Wyse, Louise Hayward, Jessica Pandya, 2015-12-03 The research and debates surrounding curriculum pedagogy and assessment are ever growing and are of constant importance around the globe With two volumes containing chapters from highly respected researchers whose work has been critical to understanding and building expertise in the field The SAGE Handbook of Curriculum Pedagogy and Assessment focuses on examining how curriculum is treated and developed and its impact on pedagogy and assessment worldwide The Handbook is organised into five thematic sections considering The epistemology and methodology of curriculum Curriculum and pedagogy Curriculum subjects Areas of the curriculum Assessment and the curriculum The curriculum and educational policy The SAGE Handbook of Curriculum Pedagogy and Assessment's breadth and rigour will make it essential reading for researchers and postgraduate students around the world
