The External School In Carolingian Society:

The External School in Carolingian Society Hildebrandt, 2021-09-20 This study explores one means of imparting Latin literacy in early medieval society the so called external school often presumed to have been a common feature of medieval monastic education It questions the prevalence of this institution and whether the external school can be used as evidence of relatively widespread literacy among the non clerical Carolingian population in particular By precisely defining and chronicling external schooling M M Hildebrandt invites the reader to reconsider conventional notions about the nature of the Carolingian educational program The author examines the intention of monastic founders and writers regarding education the effects of missionary activities on the religious training of non monks the attempts made by royal and ecclesiastical leaders to rationalize external schooling and the impact of ninth century political and economic turmoil on the development of this institution The scope of this book makes it of interest as a contribution to the current debate concerning the character of medieval literacy as well as a source book for the study of early medieval monastic education *The External School in Carolingian Society* M. M. Hildebrandt, 1992 This study defines and chronicles the so called external school a monastic institution often presumed to have trained non monastic students in Latin literacy Through an examination of the intentions of political and ecclesiastical leaders the effects of missionary activities and the role of prayer confraternities it places a long misunderstood feature of monastic life in a political social and economic context **Carolingian Catalonia** Cullen J. Chandler, 2019-01-10 Traces the political development of the Carolingian Spanish March and revises traditional interpretations of Catalonia s political and constitutional history **Schools and Schooling in Late Medieval Germany** David Sheffler, 2008-06-30 Historians have traditionally studied late medieval education backward through the eyes of religious and political reformers critical of that which preceded them This has led to significant distortions Histories written from this perspective tend to overemphasize the novelty of early modern educational reforms at the expense of evident continuities and focus on conflict between ecclesiastical and lay authorities rather than cooperation This book focuses instead on the medieval experience of education through a detailed reconstruction of the educational landscape of late medieval Regensburg The resulting picture provides new insights into the relationship between civic authorities and ecclesiastical institutions the role of education in social and economic mobility and the connections between local communities and broader European educational structures **Learning and Culture in Carolingian Europe** John J. Contreni, 2024-10-28 Nine of the ten essays in this collection appeared first between 1995 and 2005 Centered in the Carolingian age they explore how the seventh century Visio Baronti was read in the ninth century and how social and cultural imperatives transformed the life of scholarship schools and learning in Carolingian Europe Several essays consider the significance of numerical and scientific studies in the Carolingian curriculum including the impact of Bede s scientific works in the schools and on the thought of John Scottus Eriugena Another reconstructs Eriugena s early career in light of his

Glossae divinae historiae Carolingian biblical culture is the subject of two essays including a reading of Haimo of Auxerre's commentary on Ezechiel that highlights the unfinished and unpublished commentary's critique of Carolingian society A poem in the Anthologia Latina long ascribed to Octavian the Roman emperor is restored to the monastic culture of the ninth century Finally an article on the Laon Formulary originally published in French in 1973 is here translated and revised

Churches and Education Morwenna Ludlow, Charlotte Methuen, Andrew Spicer, 2019-07-04 Brings together the work of a wide range of scholars to explore the history of churches and education *Cistercian Architecture and Medieval Society* Maximilian Sternberg, 2013-08-15 In *Cistercian Architecture and Medieval Society* Maximilian Sternberg offers an account of the social functions of the built environment in medieval monasticism Few medieval monuments hold so privileged a place in the modern imagination as Cistercian abbeys yet Sternberg suggests it is precisely our own peculiarly modern fascination with the idea of Cistercian aesthetics that has hindered a full view of the complex social meanings of their architecture This book draws attention instead to the practical and symbolic means by which architecture helped the Cistercians to negotiate the dense web of relations that in actuality bound them to other spheres of medieval society It explores the permeability of monastic boundaries and considers their effectiveness in reconciling a simultaneous need for interaction and distance between monastic communities and these other social spheres **Heresy and Dissent in the Carolingian Empire**

Matthew Bryan Gillis, 2017-02-09 *Heresy and Dissent in the Carolingian Empire* recounts the history of an exceptional ninth century religious outlaw Gottschalk of Orbais Frankish Christianity required obedience to ecclesiastical superiors voluntary participation in reform and the belief that salvation was possible for all baptized believers Yet Gottschalk a mere priest developed a controversial Augustinian based theology of predestination claiming that only divine election through grace enabled eternal life Gottschalk preached to Christians within the Frankish empire including bishops and non Christians beyond its borders scandalously demanding they confess his doctrine or be revealed as wicked reprobates Even after his condemnations for heresy in the late 840s Gottschalk continued his activities from prison thanks to monks who smuggled his pamphlets to a subterranean community of supporters This study reconstructs the career of the Carolingian Empire's foremost religious dissenter in order to imagine that empire from the perspective of someone who worked to subvert its most fundamental beliefs Examining the surviving evidence including his own writings Matthew Gillis analyzes Gottschalk's literary and spiritual self representations his modes of argument his prophetic claims to martyrdom and miraculous powers and his shocking defiance to bishops as strategies for influencing contemporaries in changing political circumstances In the larger history of medieval heresy and dissent Gottschalk's case reveals how the Carolingian Empire preserved order within the church through coercive reform The hierarchy compelled Christians to accept correction of perceived sins and errors while punishing as sources of spiritual corruption those rare dissenters who resisted its authority *Early Carolingian Warfare* Bernard S. Bachrach, 2011-03-08 Without the complex military machine that his forebears had built up over the

course of the eighth century it would have been impossible for Charlemagne to revive the Roman empire in the West Early Carolingian Warfare is the first book length study of how the Frankish dynasty beginning with Pippin II established its power and cultivated its military expertise in order to reestablish the regnum Francorum a geographical area of the late Roman period that includes much of present day France and western Germany Bernard Bachrach has thoroughly examined contemporary sources including court chronicles military handbooks and late Roman histories and manuals to establish how the early Carolingians used their legacy of political and military techniques and strategies forged in imperial Rome to regain control in the West Pippin II and his successors were not diverted by opportunities for financial enrichment in the short term through raids and campaigns outside of the regnum Francorum they focused on conquest with sagacious sensibilities preferring bloodless diplomatic solutions to unnecessarily destructive warfare and disdained military glory for its own sake But when they had to deploy their military forces their operations were brutal and efficient Their training was exceptionally well developed and their techniques included hand to hand combat regimented troop movements fighting on horseback with specialized mounted soldiers and the execution of lengthy sieges employing artillery In order to sustain their long term strategy the early Carolingians relied on a late Roman model whereby soldiers were recruited from among the militarized population who were required by law to serve outside their immediate communities The ability to mass and train large armies from among farmers and urban dwellers gave the Carolingians the necessary power to lay siege to the old Roman fortress cities that dominated the military topography of the West Bachrach includes fresh accounts of Charles Martel s defeat of the Muslims at Poitiers in 732 and Pippin s successful siege of Bourges in 762 demonstrating that in the matter of warfare there never was a western European Dark Age that ultimately was enlightened by some later Renaissance The early Carolingians built upon surviving military institutions adopted late antique technology and effectively utilized their classical intellectual inheritance to prepare the way militarily for Charlemagne s empire

The

Formation of Christian Europe Owen M. Phelan, 2014-10-23 The Formation of Christian Europe analyses the Carolingians efforts to form a Christian Empire with the organizing principle of the sacrament of baptism Owen M Phelan argues that baptism provided the foundation for this society and offered a medium for the communication and the popularization of beliefs and ideas through which the Carolingian Renewal established the vision of an imperium christianum in Europe He analyses how baptism unified people theologically socially and politically and helped Carolingian leaders order their approaches to public life It enabled reformers to think in ways which were ideologically consistent publically available and socially useful Phelan also examines the influential court intellectual Alcuin of York who worked to implement a sacramental society through baptism The book finally looks at the dissolution of Carolingian political aspirations for an imperium christianum and how by the end of the ninth century political frustrations concealed the deeper achievement of the Carolingian Renewal

The Song of Songs in the Early Middle Ages Hannah W. Matis, 2019-01-28 In The Song of Songs in the Early Middle Ages Hannah W Matis examines how the Song of Songs the collection of Hebrew love poetry was understood in the Latin West as an allegory of Christ and the church This reading of the biblical text was passed down via the patristic tradition established by the Venerable Bede and promoted by the chief architects of the Carolingian reform Throughout the ninth century the Song of Songs became a text that Carolingian churchmen used to think about the nature of Christ and to conceptualize their own roles and duties within the church This study examines the many different ways that the Song of Songs was read within its early medieval historical context

Intercessory Prayer and the Monastic Ideal in the Time of the Carolingian Reforms Renie S. Choy, 2016-11-17 In early medieval Europe monasticism constituted a significant force in society because the prayers of the religious on behalf of others featured as powerful currency The study of this phenomenon is at once full of potential and peril rightly drawing attention to the wider social involvement of an otherwise exclusive group but also describing a religious community in terms of its service provision Previous scholarship has focused on the supply and demand of prayer within the medieval economy of power patronage and gift exchange Intercessory Prayer and the Monastic Ideal in the Time of the Carolingian Reforms is the first volume to explain how this transactional dimension of prayer factored into monastic spirituality Renie S Choy uncovers the relationship between the intercessory function of monasteries and the ascetic concern for moral conversion in the minds of prominent religious leaders active between c 750 820 Through sustained analysis of the devotional thought of Benedict of Aniane and contemporaneous religious reformers during the reigns of Charlemagne and Louis the Pious Choy examines key topics in the study of Carolingian monasticism liturgical
