notions that loom large in these debates Highlighting both theoretical and empirical perspectives this volume brings together a distinguished group of environmental sociologists who critique and extend current thinking on what it means to live in a risk society

Ecological Modernisation Around the World Arthur P.J. Mol, David A. Sonnenfeld, 2014-04-08 The idea of ecological modernisation originated in Western Europe in the 1980s gaining attention around the world by the late 1990s At the core of this social scientific and policy oriented approach is the view that contemporary societies have the capability of dealing with their environmental crises Experiences in some countries demonstrate that modern institutions can incorporate environmental interests into their daily routines Elsewhere economic and political interests dominate development trajectories and environmental deterioration continues challenging the premises of ecological modernisation This volume brings together research on ecological modernisation practices around the world Studies on Western Central and Eastern Europe the USA and Southeast Asia examine the applicability of this approach to advanced industrial countries transitional economies and developing countries respectively Authors critically examine the premises of ecological modernisation theory assess its value for understanding past and present environmental transformations and outline paths for designing future sustainable development Taken together the studies in collected this volume offer significant refinements extensions and critiques of ecological modernisation theory and suggest important directions for future research on social and policy dimensions of environmental change

The Scramble for the Poles Klaus Dodds, Mark Nuttall, 2016-01-11 In August 2007 a Russian flag was planted under the North Pole during a scientific expedition triggering speculation about a new scramble for resources beneath the thawing ice But is there really a global grab for Polar territory and resources Or are these activities vastly exaggerated In this rich and wide ranging book Klaus Dodds and Mark Nuttall look behind the headlines and hyperbole to reveal a complex picture of the so called scramble for the poles Whilst anxieties over the potential for conflict and the destruction of what is often perceived as the world's last wildernesses have come to dominate Polar debates and are to some extent justified their study also highlights longer historical and geographical patterns and processes of human activity in these remote territories Over the past century Polar landscapes have been probed drilled fished tested on and dug up as their indigenous populations have struggled to protect their rights and interests No longer remote places or themselves poles apart from one another the contemporary geopolitics of the Polar regions has lessons for us all as we confront a warming world where access to resources is a concern for states big and small

American Disasters Steven Biel, 2001-11 Ranging widely essayists here examine the 1900 storm that ravaged Galveston Texas the Great Chicago Fire of 1871 the Titanic sinking the Northridge earthquake the crash of Air Florida Flight 90 the 1977 Chicago El train crash and many other devastating events These catastrophes elicited vastly different responses and thus raise a number of important questions How for example did African Americans feminists and labor activists respond to the Titanic disaster Why did the El train

crash take on such symbolic meaning for the citizens of Chicago In what ways did the San Francisco earthquake reaffirm rather than challenge a predominant faith in progress The Sociology of Community Connections John G.

Bruhn,2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a place and to the fragmentation of connections due to an extreme value of individualism in the Western world particularly in the United States Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decade of the 20th century Nonetheless people exist in groups and connections are vital to their existence and in the daily performance of activities The second edition of the Sociology of Community Connections will identify and help students understand community connectedness in the present and future **The United States and West Africa** Alusine Jalloh, Toyin Falola, 2008 The first volume devoted to interrogating the complex relationship both historic and contemporary between the United States and West Africa Over the last several decades historians have conducted extensive research into contact between the United States and West Africa during the era of the transatlantic trade Yet we still understand relatively little about more recent relations between the two areas This multidisciplinary volume presents the most comprehensive analysis of the U S West African relationship to date filling a significant gap in the literature by examining the social cultural political and economic bonds that have in recent years drawn these two world regions into increasingly closer contact Beginning with examinations of factors that linked the nations during European colonial rule of Africa and spanning to discussions of U S foreign policy with regard to West Africa from the Cold War through the end of the twentieth century and beyond these essays constitute the first volume devoted to interrogating the complex relationship both historic and contemporary between the United States and West Africa Contributors Abdul Karim Bangura Karen B Bell Peter A Dumbuya Kwame Essien Andrew I E Ewoh Toyin Falola Osman Gbla John Wess Grant Stephen A Harmon Harold R Harris Olawale Ismail Alusine Jalloh Fred L Johnson III Stephen Kandeh Ibrahim Kargbo Bayo Lawal Ayodeji Olukoju Adebayo Oyebade Christopher Ruane Anita Spring Ibrahim Sundiata Hakeem Ibikunle Tijani Ken Vincent and Amanda Warnock Alusine Jalloh is associate professor of history and founding director of The Africa Program at the University of Texas at Arlington Toyin Falola is the Jacob and Frances Sanger Mossiker Chair in the Humanities and University Distinguished Teaching Professor at the University of Texas at Austin Energy Law, Climate Change and the Environment Martha M.
