Caves and Karst of the Greenbrier Valley in West Virginia William B. White, 2017-11-20 The focus of this book is on the more than 2000 caves of the Greenbrier Valley of West Virginia of which the 14 with lengths greater than 10 km have an aggregate length of 639 km The major caves form the core part of sub basins which drain to big springs and ultimately to the Greenbrier River Individual chapters of this book describe each of the major caves and its associated drainage basin The caves are formed in the Mississippian Greenbrier Limestone in a setting of undulating gentle folds Fractures lineaments and confining layers within the limestone are the main controlling factors The caves underlie an extensive sinkhole plain which may relate to a major erosion surface The caves are habitat for both aquatic and terrestrial organisms which are cataloged and described as are the paleontological remains found in some of the caves The sinkhole plain of the Greenbrier karst and the underlying complex of cave systems are the end result of at least a ten million year history of landscape evolution which can be traced through the evolving sequence of cave passages and which is described in this book *The Caves of Burnsville Cove, Virginia* William B. White, 2015-04-20 This book highlights some of the most difficult and persistent exploration ever undertaken in the United States in Burnsville Cove a small limestone valley in west central Virginia while at

the same time reviewing the scientific discoveries made in the area s 116 km of caves in the course of 50 years Overall the book offers a unique combination of exploration and science by a conservation organization specifically dedicated to the preservation and study of the caves *Pyramids of the Giza Plateau* Charles Rigano,2014 The most remarkable piece of ground in the World as Flinders Petrie described the Giza Plateau Here the Pyramid Complexes of Khufu Khafre and Menkaure have stood for 4 600 years The Giza pyramids have been scientifically studied for the last 300 years now for the first time all three are brought together in one book Virtually all contemporary pyramid books address only Khufu s Great Pyramid This book provides a complete detailed look at all three Giza pyramids and their complexes the Sphinx subsidiary pyramids temples boat pits and enclosures The descriptions are supplemented by almost 300 photos and drawings to provide the reader a detail look which can only be surpassed by being there in person with a very knowledgeable guide But it is not just descriptions as the complexes are today but how the early explorers entered the pyramids and what they found In addition Charles Rigano provides new ideas on How Khufu was interred in his Great Pyramid How the first robbers gained entry and robbed Khufu s pyramid How Caliph Al Mamun in 820AD really penetrated the Great Pyramid Why Heterpheres tomb is at Giza Why there is a field of stone bases near Khafre s Pyramid The initial smaller plan for Khafre s Pyramid Conclusive evidence that ties the Sphinx to Khafre How Menkaure s Burial Chamber and Inclined Passage were built In this book Charles Rigano combines both his on site examinations and study of more than 200 references from the early explorers to the recent Egyptologists to form a complete picture of the Pyramid Complexes This material is available nowhere else in a single volume *The Manchester Man* George Linnaeus Banks,2024-06-18 Reprint of the original first published in 1876
