Equivalent Fractions Shapes 1

One way we can find **equivalent fractions** is to draw pictures and then name those pictures with fractions. We start with the same size wholes and divide those wholes into different equal-size parts. This will give us the numerals for our denominators. Then, we carefully shade an equal portion of each picture and count how many parts in each picture are shaded. This will give us our numerators. We will then have two (or more) equivalent fractions!

STEP 1: Draw same size wholes.

STEP 2: Divide wholes into equal-size parts.

STEP 3: Carefully shade an equal portion of each picture. Name the fractions.
