The Man Who Can Change the World Through Education Pravin Bhatia, 2016-09-06 The word education comes from the Latin word *educare*, which means to draw out information, ideas, and excellence from students. But most teachers pump information into students, and the results have not been pretty. Many students can't think creatively, and they end up living mediocre lives. Dr. Ranchhodas Mohota has developed a technique to upgrade the minds of the students, and you'll find out what it is and how to use it in this book. It will help you develop the intelligence of students while bolstering their creativity, concentration, and admirable qualities such as positive thinking, courage, and persistence. More than six million students have been helped by this technique, which is simple to implement and easy to use. The technique incorporates all the parameters of education incorporated in India's National Curriculum Framework that it adopted in 2005. The prevalent system of teaching continues to fail, and schools and universities still churn out graduates who are not academically gifted. Give students tools to succeed with the teaching technique in *The Man Who Can Change the World Through Education*.
