Steroid Hormone Action:

Steroid and Sterol Hormone Action Thomas C. Spelsberg, Rajiv Kumar, 2012-12-06 The purpose of this book is to focus attention on recent developments in steroid and steroi hormone action Many authors have generously contributed to the book As a result there is a great diversity of opinion A majority of the chapters deal with steroid or sterol hormone receptors This is not meant to imply that receptor mediated mechanisms are the sole or even the most important mechanisms by which steroid hormones act in the cell There is wealth of evidence showing that other non receptor events are important also Steroid hormone recep tor research and the study of nuclear events mediated by steroids are presently the most intensely studied aspects of sterol hormone action and our selection of topics reflects this trend We have also included chapters on vitamin 0 sterols and thyroid hormone in the book as there is pood evidence that these hormones act in a manner similar to other classical steroids 1 IMMUNOCHARACTERIZATION OF THE NUCLEAR ACCEPTOR SITES FOR THE AVIAN OVIDUCT PROGESTERONE RECEPTOR A GOLDBERGER M HORTON T C SPELSBERG Department of Biochemistry and Molecular Biology Mayo Clinic and Mayo Graduate School of Medicine Rochester MN 55905 INTRODUCTION It is well known that steroid hormones certain vitamins and sterols enter target cells and bind to specific protein receptors in the cyto plasm or nucleus 1 4 This binding is saturable high affinity and steroid specific Steroid Hormone Action and Cancer K. Menon, 2012-12-06 This volume is an outgrowth of a symposium held at the University of Michigan Ann Arbor Michigan October 27 29 1975 This symposium was organized to bring together basic scientists and clinicians for the purpose of exchanging new ideas and the latest information in the area of Steroid Hormone Action and Cancer The design of the symposium included both formal plenary sessions and informal roundtable discussion groups the chapters of this volume being drawn primarily from these proceedings During the last quarter of a century considerable progress has been made toward understanding the molecular mechanisms in volved in steroid hormone action It now appears that the mechan sim of action of the four major classes of steroid hormones is qualitatively similar Research during the past decade has demonstrated steroid hormone receptors in a variety of normal and neoplastic tissues Receptor containing neoplasms have been shown to be hormone dependent and undergo regression when treated with hormone antagonists Natural and synthetic steroids also have been employed for many years to successfully treat various types of cancer for example estrogens androgens and progestagens for breast cancer estrogens and progestagens for prostatic carcinoma progestagens for endometrial carcinoma and corticoids for leu kemias All of these neoplasms have now been found to possess receptors for the steroids empirically used in their treatment Molecular Mechanism of Steroid Hormone Action Virinder K. Moudgil, 1985

Steroid Hormone Action Malcolm G. Parker,1993 This volume provides a detailed overview of the mechanisms by which steroid hormones regulate gene activity in target cells It should be of interest to molecular biologists endocrinologists pharmacologists and clinicians interested in gene regulation hormones and steroid antagonists Steroid Hormone Action

Neuroplasticity, Development, and Steroid Hormone Action Robert J. Handa, Shinji Hayashi, Ei Terasawa, Mitsuhiro Kawata, 2001-07-30 A compilation of cutting edge research Neuroplasticity Development and Steroid Hormone Action explores the effects of steroid hormones on brain development function and aging The experimental approaches used by the authors ranges from molecular to behavioral and endocrine to neuroplastical It contains scientific photographs line drawings tables color illustrations and graphs this interesting and timely text covers the neuroplastic effects of steroid hormones throughout the lifetime of various animal models such as bees fish lizards turtles birds mice rats and primates

Steroid Hormone Action Gordon Ringold, 1988-09-15 Steroid hormones and growth factors are important in the regulation of normal and neoplastic cell function This volume surveys what we know of steroid receptor structure and function from basic molecular biology of steroid hormone action to clinical implications of steroid metabolism Topics covered include steroid receptors and their genes steroid production receptor activation and the physiological effects of steroid action from alterations in glycoprotein processing to control of cell differentiation Gene Regulation by Steroid Hormones A.K. Roy, J.H. Clark, 2012-12-06 Within the last two decades endocrinological research has taken a definite tum toward biochemistry and molecular biology This has resulted in a new discipline called molecular endocrinology Studies on the mechanism of hormone action have continued to make headlines with fundamental discoveries in receptor action and gene regulation Recently the insect endocrino logists have also begun to explore the molecular mechanism of steroid hor mone action taking advantage of the vast number of Drosophila mutants the library of Drosophila gene and several well characterized cell lines The availability of the recombinant DNA technology has provided a truly revolu tionary tool in the hands of the molecular endocrinologists Gene Regula tion by Steroid Hormones is compiled and presented in this frontier spirit and we hope that this volume will serve not only the active investigators in the field but will also be very useful to students and researchers with a gen eral interest in regulatory biology. The book is an offshoot of the Conference on Molecular Mechanism of Steroid Hormone Action held at the Meadow Brook Mansion of Oakland University in the fall of 1978 We wish to acknowledge the financial assist ance from the National Science Foundation and Oakland University The conferees will never forget the warmest hospitality of Dr LOWELL EKLUND and his staff at the Meadow Brook center and we also wish to express per sonal gratitude to many of our students and colleagues for helping us to make the conference a great success
