Lord Byron,1838 On Capitalism and Inequality Robert U. Ayres,2020-05-29 Capitalism is under attack Defenders say that capitalism has raised billions of people from poverty But a central activity of capitalism today Wall Street style is speculation gambling using other people s money and privatizing the profits while socializing the debts Skeptics argue that capitalism has redistributed the wealth of the planet in favor of a very few meanwhile leaving the planet in bad shape and leaving billions of people out in the cold Wealth is now extremely mal distributed opportunity is far from equal and upward social mobility has declined significantly in recent decades This book reviews the evidence and arguments pro and con in considerable detail The evidence is mixed The main virtue of capitalism is its emphasis on competition as a driver of innovation and thus of economic growth It is true that economic growth has accelerated in recent centuries and it is true that billions of people have been lifted from poverty But it is not necessarily true that intense winner take all competition in the marketplace is the explanation for growth Neoclassical economic theory posits that self interest is the primary motive for all economic decisions leaving little room for cooperation and even less for altruism The theory applies to an unrealistic model of human behavior known as Homo economicus or economic man whose characteristic activity is buying or selling The reason for using the adjective word social as in socialism or social service or social democracy is essentially to deny those postulates of standard economic theory Real humans are not rational utility maximizers whatever that is and very often do things that are not in their own personal best interests This can happen because other interests such as family loyalty professional religious or patriotic duty may take precedence Real people rarely behave like Homo economicus who has rivals but no friends He or she does not trust anyone hence cannot cooperate with others and can never create or live in a viable social system or marriage Yet social systems ranging from families and tribes to firms cities and nations do and must exist or civilization cannot exist A viable social system must not allow winner takes all It must reallocate some of the societal wealth being created by competitive activities to support the young the old and the weak because all of those people have equal rights if not the same luck or the same skills Both competition and cooperation have important roles to play A hybrid

capitalism involving both is the only viable solution The book ends with a specific suggestion namely Universal Basic Income or UBI
