The First Years of Yangyi Commune David Crook, Isabel Crook, 2003-09-01 First Published in 1998 Over a fifth of mankind live in people's communes This study is strictly limited as to time and place due the vast area of research It deals with the first two years of one commune Yangyi which is in Shexian the southernmost county of Hopei Province in the dry and rugged Taihang Range

Prosperity's Predicament Isabel Brown Crook, Christina Kelley Gilmartin, 2013-09-26 This classic in the annals of village studies will be widely read and debated for what it reveals about China's rural dynamics as well as the nature of state power markets the military social relations and religion Built on extraordinarily intimate and detailed research in a Sichuan village that Isabel Crook began in 1940 the book provides an unprecedented history of Chinese rural life during the war with Japan It is an essential resource for all scholars of contemporary China

Social Exchange and Political Process in Maoist China Victor Nee, 1991

East Wind Tom Buchanan, 2012-04-19 East Wind offers the first complete archive based account of the relationship between China and the British Left from the rise of modern Chinese nationalism to the death of Mao Tse tung Beginning with the Hands Off China movement of the mid 1920s Tom Buchanan charts the mobilisation of British opinion in defence of China against Japanese aggression 1931 1945 and the role of the British left in relations with the People's Republic of China after 1949 He shows how this relationship was placed under stress by the growing unpredictability of Communist China above all by the Sino Soviet dispute and the Cultural Revolution which meant that by the 1960s China was actively supported only by a dwindling group of enthusiasts The impact of the suppression of the student protests in Tiananmen Square June 1989 is addressed as an epilogue East Wind argues that the significance of the left's relationship with China has been unjustly overlooked There were many occasions such as the mid 1920s the late 1930s and the early 1950s when China demanded the full attention of the British left It also argues that there is nothing new in the current fascination with China's emergence as an economic power Throughout these decades the British left was aware of the immense unrealised potential of the Chinese economy and of how China's economic growth could transform the world In addition to analysing the role of the political parties and pressure groups of the left Buchanan

sheds new light on the activities of many well known figures in support of China including intellectuals such as Bertrand Russell R H Tawney and Joseph Needham Many other interesting stories emerge concerning less well known figures which show the complexity of personal links between Britain and China during the twentieth century Empires at War Francis Pike,2011-02-28 As the major geopolitical power bloc Asia with 4 billion people two thirds of the world s population a huge land mass and the fastest growing economies has shifted the global political balance Empires at War gives a dramatic narrative account of how Modern Asia came into being Ranging over the whole of Asia from Japan to Pakistan the modern history of this important region is placed in the context of the struggle between America and the Soviet Union Francis Pike shows that America s domination of post war Asia was a continuation of a 100 year competition for power in the region He also argues cogently that contrary to the largely Western centric viewpoint Asian nations were not simply the passive and biddable entities of the superpowers but had a political development which was both separate and unique with a dynamic that was largely independent of the superpower conflict And in conclusion the book traces the unwinding of American influence and the end of its Empire a crucial development in international history which is already having repercussions throughout the world Peasants and Revolution in Rural China Chang Liu,2007-05-14 This book explores rural political change in China from 1850 to 1949 to help us understand China s transformation from a weak decaying agrarian empire to a unified strong nation state during this period Based on local gazetteers contemporary field studies government archives personal memoirs and other primary sources it systematically compares two key macro regions of rural China the North China plain and the Yangzi delta to demonstrate the ways in which the forces of political change shaped by different local conditions operated to transform the country It shows that on the North China plain the village community composed mainly of owner cultivators was the focal point for political mobilization whilst in the Yangzi delta absentee landlordism was exploited by the state for local control and tax extraction However these both set the stage in different ways for the communist mobilization in the first half of the twentieth century Peasants and Revolution in Rural China is an important addition to the literature on the history of the Chinese Revolution and will be of interest to anyone seeking to understand the course of Chinese social and political development **World Yearbook of Education 1968** Mark Blaug,David G. Scanlon,2013-09-05 First Published in 2005 In this World Year Book new ground is broken by concentrating on an aspect and type of education which has been until recent years largely ignored by academic educationists The needs of technological and industrializing societies impose the necessity for matching educational output with professional manpower requirements written in the Introduction to the 1967 volume on Educational Planning This looks at the education and training provided by enterprises having regard to the economic and educational histories of the countries concerned but endeavouring to bear in mind the philosophical and theoretical questions raised The authors in this 1968 World Year Book of Education show that there are unifying themes in analyses of educational growth in both the developing and industrially advanced nations

Contemporary China - An Introduction Michael Dillon, 2008-11-19 This book presents an up to date and clear guide to the often bewildering changes which have taken place in China in the late twentieth and early twenty first centuries China Michael Dillon, 2010-07-30 China's transformation in the last few decades has been perhaps the most remarkable and most controversial development in modern history Barely a century removed from the struggling and out dated Qing Empire China has managed to reinvent itself on an unprecedented scale from Empire to Communist state to hybrid capitalist superpower Yet the full implications of China's rapid march to modernity are not widely understood particularly the effects of China's meteoric rise on the nation's many ethnic minorities China A Modern History is the definitive guide to this complex contemporary phenomenon Deng Xiaoping's 1980s policy of reform and opening which saw China enter the world market is only the most recent in a series of dramatic shifts that have transformed Chinese society over the past 150 years China A Modern History explores these contrasts in detail while also highlighting the enduring values which have informed Chinese identity for millennia Beginning with the waning years of the Qing dynasty Dillon compellingly recounts the 19th century period of national humiliation when China became a virtual colony of the Western powers and Japan Nationalists brought down the humbled Celestial Empire in 1911 ushering in a long period of discord from which Mao's Chinese Communist Party emerged bloodily triumphant in 1949 In a society still overwhelmingly agricultural Mao's colossal structural changes propelled China to superpower status but at an enormous human toll By Mao's death in 1976 programmes like the Great Leap Forward and the Cultural Revolution had once more brought China to the brink of total collapse It was at this moment that against all odds China recast itself yet again this time under the visionary leadership of Deng Xiaoping as a nation of Socialism with Chinese characteristics Informed by both ancient and contemporary values China has entered the new century on a powerful footing commanding unprecedented financial and industrial resources prepared to meet the West on its own terms Michael Dillon's China A Modern History is essential reading for those interested in the past present and future course of one of the world's great nations Clearly and compellingly written this will stand as the best introduction to this spectacular and still unfinished story *Genealogical and Personal History of Western Pennsylvania* John Woolf Jordan, 1915 **China in the Age of Xi Jinping** Michael Dillon, 2021-04-29 This book presents a concise introduction to China in the Xi Jinping era It is intended as a first book for those coming new to the subject providing the essential information that most people need to know without going into excessive detail Its coverage includes the economy society

politics and international relations China's history especially the twentieth century and Taiwan and Hong Kong as well as the People's Republic of China It will also be useful for more advanced students who need to understand developments in China outside their own primary disciplines The book provides an up to date and clear guide to the changes which have taken place in China in the late twentieth and early twenty first centuries including the recent further changes which are taking place under Xi Jinping's regime It draws on the enormous body of empirical and theoretical research that is being carried out by economists political scientists and sociologists on China but is itself written in non technical and accessible language It does not assume any previous knowledge of China and explanations of Chinese terms are provided throughout the book It includes a map a chronology a glossary of Chinese terms biographical notes on key figures and a guide to further reading **Water**

Beings Veronica Strang, 2023-04-19 Looking to the vast human history of water worship a crucial study of our broken relationship with all things aquatic and how we might mend it Early human relationships with water were expressed through beliefs in serpentine aquatic deities rainbow colored feathered or horned serpents giant anacondas and dragons Representing the powers of water these beings were bringers of life and sustenance world creators ancestors guardian spirits and lawmakers Worshipped and appeased they embodied people's respect for water and its vital role in sustaining all living things Yet today though we still recognize that water is life fresh and saltwater ecosystems have been critically compromised by human activities This major study of water beings and what has happened to them in different cultural and historical contexts demonstrates how and why some but not all societies have moved from worshipping water to wreaking havoc upon it and asks what we can do to turn the tide Power over Property Matthew Noellert, 2020-10-13 Following the end of World War II in 1945 the Chinese Communist Party CCP spent the next three decades carrying out agrarian reform among nearly one third of the world's peasants This book presents a new perspective on the first step of this reform when the CCP helped redistribute over 40 million hectares of land to over three hundred million impoverished peasants in the nationwide land reform movement This land reform the founding myth of the People's Republic of China 1949 present and one of the largest redistributions of wealth and power in history embodies the idea that an equal distribution of property will lead to social and political equality Power Over Property argues that in practice however the opposite occurred the redistribution of political power led to a more equal distribution of property China's land reform was accomplished not only through the state's power to define the distribution of resources but also through village communities prioritizing political entitlements above property rights Through the systematic analysis of never before studied micro level data on practices of land reform in over five hundred villages Power Over Property demonstrates how land reform primarily involved the removal of former power holders the mobilization of mass political participation and the creation of a new social political hierarchy Only after accomplishing all of this was it possible to redistribute land This redistribution moreover was determined by political relations to a new structure of power not just economic relations to the means of production The experience of China

s land reform complicates our understanding of the relations between economic social and political equality On the one hand social equality in China was achieved through political not economic means On the other hand the fundamental solution was a more effective hierarchy of fair entitlements not equal rights This book ultimately suggests that focusing on economic equality alone may obscure more important social and political dynamics in the development of the modern world

Collective Killings in Rural China during the Cultural Revolution Yang Su,2011-02-21 The violence of Mao s China is well known but its extreme form is not In 1967 and 1968 during the Cultural Revolution collective killings were widespread in rural China in the form of public execution Victims included women children and the elderly This book is the first to systematically document and analyze these atrocities drawing data from local archives government documents and interviews with survivors in two southern provinces This book extracts from the Chinese case lessons that challenge the prevailing models of genocide and mass killings and contributes to the historiography of the Cultural Revolution in which scholarship has mainly focused on events in urban areas
