Evolvable Systems: From Biology to Hardware Andy M. Tyrrell, Pauline C. Haddow, Jim Torresen, 2007-10-08 The idea of evolving machines whose origins can be traced to the cybernetics movement of the 1940s and 1950s has recently resurged in the form of the nascent field of bio inspired systems and evolvable hardware The inaugural workshop Towards Evolvable Hardware took place in Lausanne in October 1995 followed by the First International Conference on Evolvable Systems From Biology to Hardware ICES held in Tsukuba Japan in October 1996 The second ICES conference was held in Lausanne in September 1998 with the third and fourth being held in Edinburgh April 2000 and Tokyo October 2001 respectively This has become the leading conference in the field of evolvable systems and the 2003 conference promised to be at least as good as if not better than the four that preceded it The fifth international conference was built on the success of its predecessors aiming at presenting the latest developments in the field In addition it brought together researchers who use biologically inspired concepts to implement real systems in artificial intelligence artificial life robotics VLSI design and related domains We would say that this fifth conference followed on from the previous four in that it consisted of a number of high quality interesting thought provoking papers

 performance computing communities over the past two decades with eld programmable gate arrays FPGAs as the leading
 techn ogy at the helm of innovation in this discipline Achieving orders of magnitude performance and power improvements
 using FPGAs over traditional microp cessorsis not uncommon for well suited applications But even with two decades of
 research and technological advances FPGA design still presents a subst ial challenge and often necessitates hardware
 design expertise to exploit its true potential Although the challenges to address the design productivity sues are steep the
 promise and the potential of the RC technology in terms of performance power size and versatility continue to attract
 application design engineers and RC researchers alike The International Symposium on Applied Reconfigurable Computing
 ARC aims to bring together researchers and practitioners of RC systems with an emphasis on practical applications and
