## **Terminal Degrees The Job Crisis In Higher Education:**

Terminal Degrees Emily K. Abel, 1984      Higher Education: Handbook of Theory and Research J.C. Smart, 2006-01-18

Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community Each annual volume contains manuscripts on such diverse topics as research on college students and faculty governance and planning advances in research methodology economics and finance and curriculum and instruction The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world It encompasses Comprehensive reviews of contemporary and emerging issues in postsecondary education Hundreds of citations in a wide range of scholarly journals including all leading journals of higher education and many other social science and professional journals An indispensable resource for administrators researchers and policymakers Published annually since 1985      The Lost Soul of Higher Education Ellen Schrecker, 2010 Schrecker the

leading historian of the McCarthy era witch hunts examines both the key fronts in the present battles over higher ed and their historical parallels in previous eras offering a deeply researched chronicle of the challenges to academic freedom set against the rapidly changing structure of the academy itself The Lost Soul of Higher Education tells the interwoven stories of successive well funded ideological assaults on academic freedom by outside pressure groups aimed at undermining the legitimacy of scholarly study viewed alongside decades of eroding higher education budgets a trend that has sharply accelerated during the recent economic downturn

**Neoliberalizing the University: Implications for American Democracy** Sanford Schram, 2017-10-02 This collection brings together essays to address the crisis of Higher Education today focusing on its neoliberalization Higher Education has been under assault for several decades as neoliberalism's preference for market based reforms sweeps across the US political economy The recent push for neoliberalizing the academy comes at a time when it is ripe for change especially as it continues to confront growing financial pressure particularly in the public sector The resulting cutbacks in public funding especially to state universities led to a variety of debilitating changes increases in tuition growing student debt more students combining working and schooling declining graduation rates for minorities and low income students increased reliance on adjuncts and temporary faculty and most recently growing interest in mass processing of students via online instruction While many serious questions arise once we begin to examine what is happening in higher education today one particularly critical question concerns the implications of these changes on the relationship of education to as yet still unrealized democratic ideals The 12 essays collected in this

volume create important resources for students faculty citizens and policymakers who want to find ways to address contemporary threats to the higher education democracy connection This book was originally published as a special issue of New Political Science     *Higher Education: Handbook of Theory and Research* John C. Smart, 2007-05-16 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world     *Universities and the Public Sphere* Brian Pusser, Ken Kempner, Simon Marginson, Imanol Ordorika, 2012-05-22 Universities have been propelled into the center of the global political economy of knowledge production by a number of factors mass education academic capitalism the globalization of knowledge the democratization of communication in the era of the Internet and the emergence of the knowledge and innovation economy The latest book in the International Studies in Higher Education series *Universities and the Public Sphere* addresses the vital role of research universities as global public spheres sites where public interaction conversation and deliberation take place where the nature of the State and private interests can be openly debated and contested At a time of increased privatization open markets and government involvement in higher education the book also addresses the challenges facing the university in its role as a global public sphere In this volume international contributors challenge prevalent views of the global marketplace to create a deeper understanding of higher education's role in knowledge creation and nation building In nearly every national context the pressures of globalization neo liberal economic restructuring and new managerial imperatives challenge traditional norms of autonomy academic freedom access and affordability The authors in *Universities and the Public Sphere* argue that universities are uniquely suited to have transformative democratic potential as global public spheres     **Composition in the Age of Austerity** Nancy Welch, Tony Scott, 2016-04-01 In the face of the gradual saturation of US public education by the logics of neoliberalism educators often find themselves at a loss to respond let alone resist Through state defunding and many other reforms fueled by austerity politics a majority of educators are becoming casual labor in US universities while those who hang onto secure employment are pressed to act as self supporting entrepreneurs or do more with less Focusing on the discipline of writing studies this collection addresses the sense of crisis that many educators experience in this age of austerity The chapters in this book chronicle how neoliberal political economy shapes writing assessments curricula teacher agency program administration and funding distribution Contributors also focus on how neoliberal political economy dictates the direction of scholarship because the economic and political agenda shaping the terms of work the methods of delivery

and the ways of valuing and assessing writing also shape the primary concerns and directions of scholarship Composition in the Age of Austerity offers critical accounts of how the restructuring of higher education is shaping the daily realities of composition programs The book documents the effects and implications of the current restructuring examines how cherished rhetorical ideals actually leave the field unprepared to respond effectively to defunding and corporatizing trends and establishes points of departure for collective response      **Community College Faculty** J. Levin,S. Kater,Richard L.

Wagoner,2006-01-31 John S Levin Susan T Kater and Richard L Wagoner collectively argue that as community colleges organize themselves to respond to economic needs and employer demands and as they rely more heavily upon workplace efficiencies such as part time labor they turn themselves into businesses or corporations and threaten their social and educational mission      **Learning and Work and the Politics of Working Life** Terri Seddon,Lea Henriksson,Beatrix

Niemeyer,2009-12-04 Questions debates about compliance in work education and lifelong learning and affirms the importance of the politics of working life in a globalised world      **College For Sale** Wesley Shumar,2013-10-23 This text provides a framework for understanding higher education in the US and other western countries since the 1970s whereby the logic of the market place has increasingly come to dominate all arenas and in context the education system The author calls this process commodification and he describes the transformation of universities in the US and elsewhere as they attempt to accomodate the enforced changes on their academic lives and those of their students The book chronicles changes with the increasing focus on career and the movement towards the instrumental functions of education the financial crisis and the development of a more corporate approach to education of consumption that produce universities heavy with expensive well equipped and powerful administrations and decreasing numbers of ever more disenfranchised faculty

*Critical Perspectives on Activity* Peter Sawchuk,Newton Duarte,Mohamed Elhammoumi,2006-01-16 The last two decades have seen an international explosion of interest in theories of mind culture and activity This unique collection is the first to explicitly reach back to the tradition s original critical impulse within which the writings of Karl Marx played such a central role Each author pushes this impulse further to address leading contemporary questions It includes a diverse array of international scholars working from the fields of education psychology philosophy sociology anthropology communications industrial relations and business studies Broken into three main sections education work and everyday life each chapter builds from an analysis of practice and learning as social cultural participation and historical change in relation to the concept of activity contradiction and struggle This book offers insight into an important complex of overlapping practices and institutions to shed light on broader debates over such matters as the knowledge economy and lifelong learning      *The Futures of Legal Education and the Legal Profession* Hilary Sommerlad,Sonia Harris-Short,Steven Vaughan,Richard Young,2015-03-26 We are currently witnessing an unprecedented transformation in the legal profession and legal education The Legal Services Act 2007 and the Legal Aid Sentencing and Punishment of Offenders Act 2012 have both enabled and

necessitated dramatic structural changes to the profession as well as impacting on its ethos and ethicality The recent Legal Education and Training Review LETR promises similarly dramatic change to the provision of legal education reflecting the shifting landscape of both the legal professional market and Higher Education in general These transformative changes bring both exciting opportunities and challenges with which everyone involved in the law from University lecturers to Senior Partners in leading law firms to the judiciary must grapple This edited collection comprises a selection of papers presented at the 2nd conference of CEPLE Birmingham Law School's Centre for Professional Legal Education and Research The aim of the Conference and thus this collection was to bring together leading academic scholars senior figures from professional practice policy makers and representatives of the regulatory authorities to reflect on the key issues arising from this transformative moment As such this volume of essays covers diverse ground from curriculum development to professional theory enriched and enhanced by the range of backgrounds and perspectives of its contributors

*In View of Academic Careers and Career-Making Scholars* Victor N. Shaw, 2008-03-01 This volume connects career making to the general social context in which it takes place career making individuals to the large institutional establishment in which they operate and specifically career academicians to the overall knowledge enterprise from which they draw their intellectual inspiration on which they build their career achievements and to which they contribute their personal talents The main purpose is to explore what academic institutions the knowledge enterprise and the society as a whole can and ought to do to enhance productivity facilitate performance and improve experience of individual academicians in their career making endeavor Although various innovative ideas are presented to improve normal procedures or standard processes throughout academia answers to this focal question often lie in different levels of organizational units involved in academic operation That is what should a department do for its faculty a college for its departments a university for its colleges an association for its member organizations or a government for its academic institutions in the best interest of the latter Similarly although reformative measures are proposed to the attention of established entities or institutionalized systems change within the existing situation or practice to a large degree depends upon how people in various social roles relate to each other in attitude as well as in behavior when they perform their specific job In other words what should a professor do for graduate students a senior scholar for junior colleagues a chair for faculty members a dean for chairs a university chancellor for deans an editor for authors or an association president for the general membership from the due perspective of the latter The logic or legitimacy of examining this focal question and its organizational unit and social role is clear a shining academician owes much to the support of his or her assistants students and followers a rising university builds on the productivity of its individual divisions and a thriving knowledge enterprise depends upon the success of individual career making scholars Beyond its own functionality and success by division of labor the higher level or the larger system has an inescapable responsibility to ensure that individual players or components therein grow develop and perform to the best of their potential In content this volume

consists of sixteen chapters Chapter 1 identifies main pathways and stages in academic careers Chapters 2 5 focuses on the career process exploring major requirements that an academician has to work on and fulfill in his or her career making endeavor These requirements include educational preparation job search institutional placement and professional networking Chapters 6 15 centers on the career structure examining essential elements that a scholar has to build and maintain in his or her career identity These elements range from the academic degree position publication teaching presentation service grants awards and membership in academic associations to tenure The last chapter capitalizes on the curriculum vitae as a miniature of the academic personality that a career professional must present to the community of scholarship

*Higher Education in Crisis* William C. Barba, 1995 Since New York is a leader in the nation's higher education arena most of the issues and concerns faced in New York have direct implications throughout the entire United States Financing college access quality time to degree and demographic changes in student and faculty populations are a sampling of the concerns raised in this volume These are issues that transcend local and state boundaries and offer a challenge to higher education at the end of the 20th century

**The Lost Promise** Ellen Schrecker, 2021-12-17 The Lost Promise is a magisterial examination of the turmoil that rocked American universities in the 1960s with a unique focus on the complex roles played by professors as well as students The 1950s through the early 1970s are widely seen as American academia's golden age when universities well funded and viewed as essential for national security economic growth and social mobility embraced an egalitarian mission Swelling in size schools attracted new types of students and professors including radicals who challenged their institutions calcified traditions But that halcyon moment soon came to a painful and confusing end with consequences that still afflict the halls of ivy In *The Lost Promise* Ellen Schrecker our foremost historian of both the McCarthy era and the modern American university delivers a far reaching examination of how and why it happened Schrecker illuminates how US universities explosive growth intersected with the turmoil of the 1960s fomenting an unprecedented crisis where dissent over racial inequality and the Vietnam War erupted into direct action Torn by internal power struggles and demonized by conservative voices higher education never fully recovered resulting in decades of underfunding and today's woefully inequitable system As Schrecker's magisterial history makes blazingly clear the complex blend of troubles that disrupted the university in that pivotal period haunts the ivory tower to this day

[Navigating the Academic Career](#) Victor N. Shaw, 2013-03-01 There is an urgent need to provide academic professionals with individual institutional and contextual accounts of their careers and career making endeavors An individual account makes academicians think about what they do and how they might do it better An institutional account makes academicians reflect upon the organizational environment in which they function and ponder what they might do to improve it A contextual account connects academicians and their work to knowledge the knowledge enterprise and the larger social structure so that they know and understand the impact they and their career making efforts have on themselves academia and general social

processes This book examines academic careers and career making activities with respect to their main aspects milestones and general pathways In content it divides into four identifiable parts Part I focuses on professional preparation It examines education degree reeducation job search and job change Part II centers on organizational employment It investigates position research teaching service and tenure Part III revolves around professional networking It looks into publication conference presentation application for grants and awards and membership in academic associations Part IV rises above specific issues It explores general career pathways and overall scholarly identity *Contingent Work* Kathleen

Barker, Kathleen Christensen, 2019-06-30 The successful 1997 strike by the Teamsters against UPS and the overwhelming support the American public gave the strikers highlighted the impact of contingent work an umbrella term for a variety of tenuous and insecure employment arrangements such as temping independent contracting employee leasing and some self employment and part time or part year work This new book contends that contingent work represents a profound deviation from the employment relations model that dominated most of this century s labor relations It delineates essential features of contingent work from both the worker s and the organization s point of view Articulating a variety of perspectives from various disciplines the contributors examine the business forces driving contingent work and assess the consequences of working contingently for the individual family and community taking into account issues of race class and gender They ask how current labor and employment laws need to be rewritten to provide contingent workers with the same comprehensive protections offered to permanent employees In the final chapter the editors comment on the status of research on contingent work and chart future research directions **Education Under Siege** Stanley Aronowitz, Henry A.
