Early Modern English Literature and the Poetics of Cartographic Anxiety Chris Barrett, 2018-03-02 The Cartographic Revolution in the Renaissance made maps newly precise newly affordable and newly ubiquitous In sixteenth century Britain cartographic materials went from rarity to household d cor within a single lifetime and they delighted inspired and fascinated people across the socioeconomic spectrum At the same time they also unsettled upset disturbed and sometimes angered their early modern readers Early Modern English Literature and the Poetics of Cartographic Anxiety is the first monograph dedicated to recovering the shadow history of the many anxieties provoked by early modern maps and mapping in the sixteenth and seventeenth centuries A product of a military arms race often deployed for security and surveillance purposes and fundamentally distortive of their subjects maps provoked suspicion unease and even hostility in early modern Britain in ways not dissimilar from the anxieties provoked by global positioning enabled digital mapping in the twenty first century At the same time writers saw in the resistance to cartographic logics and strategies the opportunity to rethink the way literature represents space and everything else This volume explores three major poems of the period Edmund Spenser s *The Faerie Queene* 1590 1596 Michael Drayton s *Poly Olbion* 1612 1622 and John Milton s *Paradise Lost* 1667 1674 in terms of their vexed and vexing relationships with cartographic materials and shows how the productive protest staged by these texts redefined concepts of allegory description personification bibliographic materiality narrative temporality analogy and other elemental components of literary representations **The Majesty of Islamic Art and Architecture** Sharmin Khan, Kheir Al-Kodmany, Mohd Khalid Hassan, M. Farhan Fazli, 2024-08-22 The book systematically delves into the complex intersection of Islam with art and architecture unraveling the profound philosophical and aesthetic foundations that serve as the bedrock for Islamic artistic expressions Commencing with comparative analyses of geometric patterns in traditional and contemporary Indo Islamic architecture it unveils the enduring significance of these patterns in India s architectural legacy Moving through the pages the narrative unfolds the intricacies of the Mughal era thoroughly examining the role of geometric ornamentation in Mughal buildings and its transformative impact on the grandeur of Mughal architecture Additionally the discourse navigates the spiritual and metaphysical dimensions inherent in Islamic gardens dissecting their elements through Quranic references and elucidating their sacred connections **Landscapes** Hilary P.M. Winchester, 2013-10-29 Landscapes is a timely and well written analysis of the meaning of cultural landscapes The book delves into the layers of meaning that are invested in ordinary landscapes as well as landscapes of spectacle and power Landscapes is a powerful and vivid application of the new cultural geography to case studies not previously visited within cultural geography texts *People and Land* Jione Havea, 2019-11-06 Empires rise and expand by taking lands and resources and by enslaving the bodies and minds of people Even in this modern era the territories geographies and peoples of a number of lands continue to be divided occupied harvested and marketed The legacy of slavery and the scapegoating of

people persists in many lands and religious institutions have been co-opted to own land to gather people to define proper behavior to mete out salvation and to be silent. The contributors to *People and Land* writing from under the shadows of various empires from and in between Africa, Asia, the Americas, the Caribbean, and Oceania refuse to be silent. They give voice to multiple causes to assess and transform the usual business of theology and hermeneutics to expose and challenge the logics and delusions of coloniality to tally and demand restitution of stolen commodified and capitalized lands to account for the capitalizing, touristic, and forced movements of people and to scripturalize the undeniable ecological crises and our responsibilities to the whole life system watershed. This book is a protest against the claims of political and religious empires over land, people, earth, minds, and the future.

The Bible, Protestantism, and the Rise of Natural Science Peter Harrison, 2001-07-26 An examination of the role played by the Bible in the emergence of natural science *Urkommunismus. Fear of the Word* Armando Verdiglione, 2019-03-22 The *Urkommunismus* the ideal place, the common place, the utopia, the pure place of origin presides over every mysterious, therefore political, penal, social, financial, institutional, corporate doctrine and dictates its canons, formulas, algorithms. It is the reference of every bureaucracy in its sacrificial, penal, ceremonial. On the principle of nothingness, every regime unravels the fear of the word to confiscate life. Ideally and really. Both to the East and to the West. In this book the analysis and reading are performed of the writings called founding which mark our age, weighing down in its models and its offices. Geography and Enlightenment David N. Livingstone, Charles W. J. Withers, 1999-12-15 *Geography and Enlightenment* explores both the Enlightenment as a geographical phenomenon and the place of geography in the Enlightenment. From wide-ranging disciplinary and topical perspectives, contributors consider the many ways in which the world of the long eighteenth century was brought to view and shaped through map and text, exploration and argument within and across spatial and intellectual borders. The first set of chapters charts the intellectual and geographical contexts in which

Enlightenment ideas began to form including both the sites in which knowledge was created and discussed and the different means used to investigate the globe Detailed explorations of maps created during this period show how these new ways of representing the world and its peoples influenced conceptions of the nature and progress of human societies while studies of the travels of people and ideas reveal the influence of far flung places on Enlightenment science and scientific credibility The final set of chapters emphasizes the role of particular local contexts in Enlightenment thought Contributors are Michael T Bravo Paul Carter Denis Cosgrove Stephen Daniels Matthew Edney Anne Marie Claire Godlewska Peter Gould Michael Heffernan David N Livingstone Dorinda Outram Chris Philo Roy Porter Nicolaas Rupke Susanne Seymour Charles Watkins and Charles W J Withers The Voyage of Bran, Son of Febal, to the Land of the Living ,1897 Grass Creek/Cody Wilderness United States.
