**Ahab's Rolling Sea** Richard J.

King,2019-11-11 In this invigorating study a maritime historian delves into the environmental and scientific concerns beneath the surface of Melville's epic tale *Nature*. One of the most profound and enduring works of American fiction, Herman Melville's *Moby Dick* is also a landmark of nature writing. In conversation with the works of Emerson and Thoreau, this epic of the sea draws on Melville's own travels to the Pacific. The author spent more than three years at sea before writing his masterpiece in 1851. *Ahab's Rolling Sea* is a chronological journey through the natural history of Melville's novel. From white whales to whale intelligence, giant squids, barnacles, albatross, and sharks, Richard J. King examines what Melville knew from his own experiences and the sources available to a reader in the mid 1800s, exploring how and why Melville might have twisted what was known to serve his fiction. King then climbs to the crow's nest, setting Melville in the context of the American perception of the ocean in 1851, at the very start of the Industrial Revolution and just before the publication of *On the Origin of Species*. King compares Ahab's and Ishmael's worldviews to how we see the ocean today, an expanse still immortal and sublime but also in crisis. Featuring a coffer of illustrations and an array of interviews with contemporary scientists, fishers, and whale watch operators, *Ahab's Rolling Sea* offers new insight into a cherished masterwork, its adventurous author, and our own evolving relationship with the briny deep.

**Seafaring Women** David Cordingly,2002-03-12 For centuries the sea has been regarded as a male domain, but in this illuminating historical narrative, maritime scholar David Cordingly shows that an astonishing number of women went to sea in the great age of sail. Some traveled as the wives or mistresses of captains; others were smuggled aboard by officers or seamen. And Cordingly has unearthed stories of a number of young women who dressed in men's clothes and worked alongside sailors for months, sometimes years, without ever revealing their gender. His tremendous research shows that there was indeed a thriving female population, from pirates to the sirens of myth and legend, on and around the high seas. A landmark work of women's history, disguised as a spectacularly entertaining yarn, *Women Sailors and Sailor's Women* will surprise and delight.

Blackford,2011-12-30 In the spring of 2007 National Geographic warned The oceans are in deep blue trouble From the northernmost reaches of the Greenland Sea to the swirl of the Antarctic Circle we are gutting our seas of fish There were legitimate grounds for concern After increasing more than fourfold between 1950 and 1994 the global wild fish catch reached a plateau and stagnated despite exponential growth in the fishing industry As numerous scientific reports showed many fish stocks around the world collapsed creating a genuine global overfishing crisis Making Seafood Sustainable analyzes the ramifications of overfishing for the United States by investigating how fishers seafood processors retailers government officials and others have worked together to respond to the crisis Historian Mansel G Blackford examines how these players took steps to make fishing in some American waters especially in Alaskan waters sustainable Critical to these efforts Blackford argues has been government and industry collaboration in formulating and enforcing regulations What can be learned from these successful experiences Are they applicable elsewhere What are the drawbacks Making Seafood Sustainable addresses these questions and suggests that sustainable seafood management can be made to work The economic and social costs incurred in achieving sustainable resource usage are significant but there are ways to mitigate them More broadly this study illustrates ways to manage commonly held natural resources around the world land water oil and so on in sustainable ways *Wise Highs* ,
