Stigand,2015-08-06 Excerpt from Central African Game and Its Spoor This handbook is intended as a help or guide to the young or inexperienced sportsman who intends making a hunting trip to Central Africa Spoor cannot be put on paper to exactly resemble the real thing In drawing these spoor the outlines have been well defined and it must be noted that they are taken from picked specimens distinct impressions in the soil As may be surmised the finding and sketching of these spoor and dang has cost not a little time and trouble and in the case of the lesser known or scarcer animals much questioning of native hunters before the information has been deemed reliable enough to be put on paper It will take months and perhaps years of hard experience to tell at a glance to what animal a footprint belongs and the authors themselves have often felt the want of some fairly reliable handbook while in the field especially on going to a new country and meeting with species they have not seen before Before one can question a native a certain knowledge of the language is necessary and this in itself takes much study The authors therefore have given the native names of the different game Many of the ideas and conclusions put forward by the authors may not meet with the approval of perhaps older and more experienced sportsmen but at the same time they are the result of experience and differences of opinion concerning the habits of animals arise between most sportsmen no two holding exactly the same views It will be noticed that the words generally often or usually are of frequent occurrence in describing the habits of animals We think it the greatest mistake to say that any animal will do this or that as the behaviour of no two animals is any more alike than that of two human beings Moreover the same animal may have totally different habits in different localities About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do

*Central African Game and Its Spoor* Chauncy Hugh Stigand, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1906 edition Excerpt 51 is almost useless for it is tempered too highly and the blade is so thick that after it has got blunt it cannot be sharpened properly without the aid of a grindstone Never buy a knife with a folding handle for after a little wear the spring weakens and it is apt to close on one's hand and besides if the knife was wanted in an emergency it would be useless for it takes two hands to open it A few common butcher's skinning knives should be included to give the natives for skinning game These can be bought for about 1s For skinning small birds nothing is better than a small penknife it can be hung on the belt swivel and should be provided with a shackle for this purpose If a man is going in for collecting birds he should bring out a small .410 collector's gun with cartridges loaded with No 10 shot and a few No 6 for the larger specimens If a rook rifle is taken a 220 or 250 bore is large enough for it will mainly be used for killing birds for the pot and small mammalia such as cats etc The cartridges for the rook rifle should be loaded with smokeless powder in preference to black as it makes less noise and some of the bullets should have hollow points which increase their killing power When one is on a trip after big game it is not advisable to fire off shot guns in the vicinity for this would be likely to scare away the game whereas the report of a small rook rifle would not be heard at a great distance It is also useful for practice on off days and helps to keep one's eye in A pair of good field glasses is a necessity and doubtless the latest form of prism glasses will be chosen A magnifying power of eight diameters is strong enough for all purposes The native hunter could carry the

**The Hunting and Spoor of Central African Game with Life-Size Illustrations of Most of the Game Tracks** Denis D. Lyell, 2010-11 Originally published in early 1900s This well illustrated book contains life size illustrations of most of the game tracks found in Central Africa Detailed chapters deal with Fair Hunting Rifles Tracking Game Hunting Game Notes on most of the Big Game Species The Carnivora Coloration in Animals Notes on Hunting Equipment etc A invaluable guide for the naturalist or hunter Many of the earliest big game hunting books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive We are republishing many of these classic works in affordable high quality modern editions using the original text and artwork

*The empire of nature* John M. MacKenzie, 2017-03-01 This study assesses the significance of the hunting cult as a major element of the imperial experience in Africa and Asia Through a study of the game laws and the beginnings of conservation in the 19th and early 20th centuries the author demonstrates the racial inequalities which existed between Europeans and indigenous hunters Africans were denied access to game and the development of game reserves and national parks accelerated this process Indigenous hunters in Africa and India were turned into poachers and only Europeans were permitted to hunt In India the hunting of animals became the chief recreation of military officers and civilian officials a source of display and symbolic dominance of the

environment Imperial hunting fed the natural history craze of the day and many hunters collected trophies and specimens for private and public collections as well as contributing to hunting literature Adopting a radical approach to issues of conservation this book links the hunting cult in Africa and India to the development of conservation and consolidates widely scattered material on the importance of hunting to the economics and nutrition of African societies

**Abominable Snowmen** Ivan T. Sanderson,2006 Do Abominable Snowmen exist Prepare yourself for a shock In the opinion of one of the world s leading naturalists not one but possibly four separate kinds of yeti still walk the earth Factual reports of wild strange hairy men have emanated from every continent except Australia and the Antarctic Do they really live on the fringes of the towering Himalayas and the edge of myth haunted Tibet They do but we are far more likely to catch one in the impenetrable Klamath Forests of Northern California Now at last Ivan Sanderson who has been accumulating material for 30 years on this subject explains in clear language just why no Snowman has ever been captured and kept for a zoo or a museum though one was caught during the last century in Canada

[Conservation in Africa](#) David Anderson,Richard H. Grove,1987 This book provides a new inter disciplinary look at the practice and policies of conservation in Africa Bringing together social scientists anthropologists and historians with biologists for the first time the book sheds some light on the previously neglected but critically important social aspects of conservation thinking To date conservation has been very much the domain of the biologist but the current ecological crisis in Africa and the failure of orthodox conservation policies demand a radical new appraisal of conventional practices This new approach to conservation the book argues cannot deal simply with the survival of species and habitats for the future of African wildlife is intimately tied to the future of African rural communities Conservation must form an integral part of future policies for human development The book emphasises this urgent need for a complementary rather than a competitive approach It covers a wide range of topics important to this new approach from wildlife management to soil conservation and from the Cape in the nineteenth century to Ethiopia in the 1980s It is essential reading for all those concerned about people and conservation in Africa
