**The Illogic of American Nuclear Strategy** Robert Jervis, 1984      **The Logic of American Nuclear Strategy**

Matthew Kroenig, 2018 For decades the reigning scholarly wisdom about nuclear weapons policy has been that the United States only needs the ability to absorb an enemy nuclear attack and still be able to respond with a devastating counterattack. So long as the US or any other nation retains such an assured retaliation capability no sane leader would intentionally launch a nuclear attack against it and nuclear deterrence will hold. According to this theory possessing more weapons than necessary for a second strike capability is illogical. This argument is reasonable but when compared to the empirical record it raises an important puzzle. Empirically we see that the United States has always maintained a nuclear posture that is much more robust than a mere second strike capability. In *The Logic of American Nuclear Strategy* Matthew Kroenig challenges the conventional wisdom and explains why a robust nuclear posture above and beyond a mere second strike capability contributes to a state's national security goals. In fact when a state has a robust nuclear weapons force such a capability reduces its expected costs in a war, provides it with bargaining leverage and ultimately enhances nuclear deterrence. This book provides a novel theoretical explanation for why military nuclear advantages translate into geopolitical advantages. In so doing it helps resolve one of the most intractable puzzles in international security studies. Buoyed by an innovative thesis and a vast array of historical and quantitative evidence *The Logic of American Nuclear Strategy* will force scholars to reconsider their basic assumptions about the logic of nuclear deterrence.      Nuclear Modernization in the 21st Century Aiden

Warren, Philip M. Baxter, 2020-02-17 This collection examines the extent to which nuclear weapons modernization has become a significant point of concern and consideration in international security. Recent statements and substantial investments by nuclear weapon possessor states in the upkeep and modernization of their nuclear postures, particularly the United States, Russia and China, illustrate a return of primacy and the salience of nuclear forces in international politics. The upgrading of systems, the introduction of new capabilities, the intermingling of new technologies and the advancement of new strategic models are all indicative of their elevation in importance and reliance. With contributions from leading thinkers in the nuclear weapons domain, this book elucidates the global strategic and policy implications such modernization efforts by the above mentioned states will have on international security. In unpacking and conceptualizing this developing source of potential in security and tension, the collection not only provides a technical context but also frames the likely effects modernization could have on the relations between these nuclear weapon powers and the larger impact upon efforts to curb nuclear weapons both in terms of horizontal and vertical proliferation. The chapters have been arranged so as to inform a variety of stakeholders from academics to policy makers by connecting analytical and normative insights and thereby advancing debates pertaining to where nuclear modernization sits as a point of global security consternation in the 21st century.      **Prisoners of Reason** S. M. Amadae, 2016-01-14 Is capitalism inherently predatory? Must there be winners and

losers Is public interest outdated and free riding rational Is consumer choice the same as self determination Must bargainers abandon the no harm principle Prisoners of Reason recalls that classical liberal capitalism exalted the no harm principle Although imperfect and exclusionary modern liberalism recognized individual human dignity alongside individuals responsibility to respect others Neoliberalism by contrast views life as ceaseless struggle Agents vie for scarce resources in antagonistic competition in which every individual seeks dominance This political theory is codified in non cooperative game theory the neoliberal citizen and consumer is the strategic rational actor Rational choice justifies ends irrespective of means Money becomes the medium of all value Solidarity and good will are invalidated Relationships are conducted on a quid pro quo basis However agents can freely opt out of this cynical race to the bottom by embracing a more expansive range of coherent action

*Nuclear Proliferation in South Asia* Sumit Ganguly, S. Paul Kapur, 2008-08-06 This edited volume explores competing perspectives on the impact of nuclear weapons proliferation on the South Asian security environment The spread of nuclear weapons is one of the worlds foremost security concerns The effect of nuclear weapons on the behaviour of newly nuclear states and the potential for future international crises are of pa

**The Ideology of the Offensive** Jack L. Snyder, 2013-05-21 Jack Snyder s analysis of the attitudes of military planners in the years prior to the Great War offers new insight into the tragic miscalculations of that era and into their possible parallels in present day war planning By 1914 the European military powers had adopted offensive military strategies even though there was considerable evidence to support the notion that much greater advantage lay with defensive strategies The author argues that organizational biases inherent in military strategists attitudes make war more likely by encouraging offensive postures even when the motive is self defense Drawing on new historical evidence of the specific circumstances surrounding French German and Russian strategic policy Snyder demonstrates that it is not only rational analysis that determines strategic doctrine but also the attitudes of military planners Snyder argues that the use of rational calculation often falls victim to the pursuit of organizational interests such as autonomy prestige growth and wealth Furthermore efforts to justify the preferred policy bring biases into strategists decisions biases reflecting the influences of parochial interests and preconceptions and those resulting from attempts to simplify unduly their analytical tasks The frightening lesson here is that doctrines can be destabilizing even when weapons are not because doctrine may be more responsive to the organizational needs of the military than to the implications of the prevailing weapons technology By examining the historical failure of offensive doctrine Jack Snyder makes a valuable contribution to the literature on the causes of war

**The Domestic Bases of Grand Strategy** Richard N. Rosecrance, Arthur A. Stein, 1993 This book explores the idea of grand strategy and offers a full blown critique both theoretical and empirical of the gaps and inconsistencies that weaken modern realist theory Grand strategy the authors maintain is determined as much by domestic politics as by international pressures

The New Europe Frances Scott, 1991  
Theories of International Cooperation and the Primacy of Anarchy Jennifer Sterling-Folker, 2012-02-01 Challenging the

standard liberal explanations for international cooperation in the field of international relations this book contends that despite numerous efforts and the passage of time our understanding of the cooperative phenomenon remains woefully inadequate Sterling Folker argues that widespread explanatory reliance on what constitutes functionally efficient choices in global interdependence is deductively illogical and empirically unsound The author s approach for explaining international cooperation is comprised of realist and constructivist insights and places the state rather than the market at the center of analysis A thorough examination of Post Bretton Woods American monetary policy making reveals the fundamental flaws of traditional explanations and the superiority of a realist constructivist alternative to the cooperative phenomenon

**Psychology, Strategy and Conflict** James W. Davis, 2013-02-11 This volume examines the explanatory nesting approach in the analysis of international relations and its continuing relevance in the 21st century International relations theory urgently needs strategies for coping with the growing complexity of the international system following the collapse of the US Soviet bipolar stalemate the multiple challenges to US unipolar hegemony and the rise of powerful non Western actors Over the course of this book leading scholars of international relations and diplomatic history return to an approach to explanation pioneered in the writings of the late Robert Jervis The approach calls for nesting multiple layers of explanation systemic strategic and perceptual in an integrated causal account that is simultaneously parsimonious and nuanced Highlighting the logic of strategic interactions under uncertainty it also integrates the effects of psychological biases and the unintended consequences of acting in complex systems to provide explanations that are at once theoretically rigorous and rich in empirical detail Analyzing the current state of Realist theory signaling under conditions of uncertainty and anarchy the role of nuclear weapons in international politics the role of cognition and emotions in economic and foreign policy decision making and questions of responsibility in international affairs the authors provide a compelling guide for the future of international relations theory This book will be of much interest to students of international relations foreign policy and security studies *Special Bibliography Series* United States Air Force Academy. Library, 1991 **Special Bibliography Series**, 1957

**Deterring America** Derek D. Smith, 2006-05-25 Faced with America s military superiority many countries are turning to weapons of mass destruction WMD as a means to deter United States intervention However the events of September 11 awakened America to a degree of vulnerability it had never experienced before making it increasingly unwilling to tolerate such weapons in the hands of unstable and unpredictable regimes Through theoretical historical and prescriptive lenses this book explores the modern security dilemma created by the twin fears of American encroachment and vulnerability which form a vicious cycle of insecurity that challenges traditional notions of deterrence Using Iraq and North Korea as case studies Smith argues that the United States may need to re evaluate its foreign policy strategies against WMD proliferation giving renewed attention to defensive measures negotiated disarmament interdiction and perhaps preemption

Dowdy, 1998 The contributors to this book including policymakers diplomats scientists regionalists and academic specialists have joined in an effort to survey nuclear arms control successes ongoing initiatives and future prospects for reducing and countering nuclear proliferation

*Statecraft and Security* Ken Booth, 1998 This study analyzes some of the key questions in contemporary international relations The first part examines the lessons and legacies of the Cold War the second focuses on post Cold War power politics and the third looks at future globalisation

*The Art of War in an Age of Peace* Michael O'Hanlon, 2021-05-25 An informed modern plan for post 2020 American foreign policy that avoids the opposing dangers of retrenchment and overextension Russia and China are both believed to have grand strategies detailed sets of national security goals backed by means and plans to pursue them In the United States policy makers have tried to articulate similar concepts but have failed to reach a widespread consensus since the Cold War ended While the United States has been the world's prominent superpower for over a generation much American thinking has oscillated between the extremes of isolationist agendas versus interventionist and overly assertive ones Drawing on historical precedents and weighing issues such as Russia's resurgence China's great rise North Korea's nuclear machinations and Middle East turmoil Michael O'Hanlon presents a well researched ethically sound and politically viable vision for American national security policy He also proposes complementing the Pentagon's set of 4 1 pre-existing threats with a new 4 1 biological nuclear digital climatic and internal dangers

*Bibliographie Mensuelle* United Nations Library (Geneva, Switzerland), 1987-05

*Atomic Obsession* John Mueller, 2012-04-26 John Mueller argues how our obsession with nuclear weapons is unsupported by history scientific fact or logic Examining the entire atomic era Mueller boldly contends that nuclear weapons have had little impact on history

**US Nuclear Weapons Policy After the Cold War** Nick Ritchie, 2008-08-08 This book offers an in depth examination of America's nuclear weapons policy since the end of the Cold War Exploring nuclear forces structure arms control regional planning and the weapons production complex the volume identifies competing sets of ideas about nuclear weapons and domestic political constraints on major shifts in

policy It provides a detailed analysis of the complex evolution of policy the factors affecting policy formulation competing understandings of the role of nuclear weapons in US national security discourse and the likely future direction of policy The book argues that US policy has not proceeded in a linear rational and internally consistent direction and that it entered a second post Cold War phase under President George W Bush However domestic political processes and lack of political and military interest in America s nuclear forces have constrained major shifts in nuclear weapons policy This book will be of much interest to students of US foreign policy nuclear proliferation strategic studies and IR in general
