Stephen L. Clark

The Instrumental Music Of Carl Philipp Emanuel Bach:

The Instrumental Music of Carl Philipp Emanuel Bach David Schulenberg, 1984 **C.P.E. Bach** David

Schulenberg, 2017-07-05 The second son of Johann Sebastian Bach C P E Bach was an important composer in his own right as well as a writer and performer on keyboard instruments He composed roughly a thousand works in all the leading genres of the period with the exception of opera and Haydn Mozart and Beethoven all acknowledged his influence He was also the author of a two volume encyclopedic book about performance on keyboard instrument C P E Bach and his music have always been the subject of significant scholarship and publication but interest has sharply increased over the past two or three decades from performers as well as music historians This volume incorporates important writings not only on the composer and his chief works but also on theoretical issues and performance questions The focus throughout is on relatively recent scholarship otherwise available only in hard to access sources **Fantasy in the Instrumental Music of C.P.E. Matthew William Head, 1995 [The Music of Carl Philipp Emanuel Bach](#) David Schulenberg, 2014 Of the four sons of J S Bach who became composers Carl Philipp Emanuel 1714-88 was the most prolific the most original and the most influential both during and after his lifetime This first full length English language study critically surveys his output examining not only the famous keyboard sonatas and concertos but also the songs chamber music and sacred works many of which resurfaced in 1999 and have not previously been evaluated The book also outlines the composer's career from his student days at Leipzig and Frankfurt Oder to his nearly three decades as court musician to Prussian King Frederick the Great and his last twenty years as cantor at Hamburg Focusing on the composer's choices within his social and historical context the book shows how C P E Bach deliberately avoided his father's style while adopting the manner of his Berlin colleagues derived from Italian opera A new perspective on the composer emerges from the demonstration that C P E Bach best known for his virtuoso keyboard works refashioned himself as a writer of vocal music and popular chamber compositions in response to changing cultural and aesthetic trends Supplementary texts and musical examples are included on a companion website David Schulenberg is professor of music at Wagner College and teaches historical performance at the Juilliard School He is the author of *The Music of Wilhelm Friedemann Bach* University of Rochester Press 2010 *The Instrumental Music of Carl Philipp Emanuel Bach* David Schulenberg, 1983 **Carl Philipp Emanuel Bach Studies** Stephen L. one of the towering figures of the period the authors explore Bach's music in its cultural contexts and show in diverse and complementary ways the reciprocal relationship between Bach's work and contemporary literary theological and aesthetic debates Topics include Bach's relation to theories of sensibility and the sublime the free fantasy and concepts of self and being and Bach's engagement with music history and the legacy of his predecessors Wider questions of C P E Bach reception also play an important part in the book which explores not only the interpretation of Bach's music in his time but also its reception over the two centuries since his death

Mendelssohn, Time and Memory Benedict Taylor, 2011-10-27 Felix Mendelssohn has long been viewed as one of the most historically minded composers in western music This book explores the conceptions of time memory and history found in his instrumental compositions presenting an

intriguing new perspective on his ever popular music Focusing on Mendelssohn's innovative development of cyclic form Taylor investigates how the composer was influenced by the aesthetic and philosophical movements of the period This is of key importance not only for reconsideration of Mendelssohn's work and its position in nineteenth century culture but also more generally concerning the relationship between music time and subjectivity One of very few detailed accounts of Mendelssohn's music the study presents a new and provocative reading of the meaning of the composer's work by connecting it to wider cultural and philosophical ideas *Interpreting Historical Keyboard Music* Andrew Woolley, John Kitchen, 2016-05-23 Research in the field of keyboard studies especially when intimately connected with issues of performance is often concerned with the immediate working environments and practices of musicians of the past An important pedagogical tool the keyboard has served as the workbench of countless musicians over the centuries In the process it has shaped the ways in which many historical musicians achieved their aspirations and went about meeting creative challenges In recent decades interest has turned towards a contextualized understanding of creative processes in music and keyboard studies appears well placed to contribute to the exploration of this wider concern The nineteen essays collected here encompass the range of research in the field bringing together contributions from performers organologists and music historians Questions relevant to issues of creative practice in various historical contexts and of interpretative issues faced today form a guiding thread Its scope is wide ranging with contributions covering the mid sixteenth to early twentieth century It is also inclusive encompassing the diverse range of approaches to the field of contemporary keyboard studies Collectively the essays form a survey of the ways in which the study of keyboard performance can enrich our understanding of musical life in a given period *Orientalism, Masquerade and Mozart's Turkish Music* Matthew Head, 2018-12-13 Matthew Head explores the cultural meanings of Mozart's Turkish music in the composer's 18th century context in subsequent discourses of Mozart's significance for Western culture and in today's not entirely post colonial world Unpacking the ideological content of Mozart's numerous representations of Turkey and Turkish music Head locates the composer's exoticisms in shifting power relations between the Austrian and Ottoman Empires and in an emerging orientalist project At the same time Head complicates a presentist post colonial critique by exploring commercial stimuli to Mozart's turquerie and by embedding the composer's orientalism in practices of self disguise epitomised by masquerade and carnival In this context Mozart's Turkish music offered fleeting liberation from official and proscribed identities of the bourgeois Enlightenment *Elements of Sonata Theory* James Hepokoski, Warren Darcy, 2011-02-11 *Elements of Sonata Theory* is a comprehensive rethinking of the basic principles of sonata form in the decades around 1800 This foundational study outlines a new up to date paradigm for understanding the compositional choices found in the instrumental works of Haydn Mozart Beethoven sonatas chamber music symphonies overtures and concertos **C.P.E. Bach** David Schulenberg, 2017-07-05 The second son of Johann Sebastian Bach C P E Bach was an important composer in his own right as well as a writer and

Speaking German Musically: Poetic Recitation in Central Europe, 1760-1820 Jacqueline Waeber, 2025-05-20 Shows how poetic recitation and the interweaving of music and poetry contributed to the advent of a German identity in late eighteenth and early nineteenth century Europe The art of reciting a text out loud known as Vortragskunst be it in a private circle or in a concert hall originated in German speaking countries in the 1760s and by the nineteenth century had become a well established practice subjected to an artistic blossoming unparalleled in the rest of Europe In this book Jacqueline Waeber explains and examines how and why this happened focusing on the origins of poetic recitation and its development during the late eighteenth and early nineteenth centuries a period essential to the development of modern German literature and theatre bookended by the two main figures who contributed to the theoretical and aesthetical tenets of poetic recitation the poet Friedrich Gottlieb Klopstock 1724 1803 and Johann Wolfgang von Goethe 1749 1832 Poetic recitation quickly gained attraction for the Lied and the musical melodrama both musical genres that were driven by a search for new declamatory styles As a result poetic recitation became increasingly musicalized by the frequent addition of a musical accompaniment As the book shows this intertwining of music and poetry made a huge contribution to the advent of German identity through the reappraisal of its language
