A History of the Apocalypse Catalin Negru, 2023-01-20 Religion For thousands of years this thing has dictated which people should live and which people should die, what shape our buildings should have or what colors our garments should contain, what food people should eat or what words people should speak. If religion is the opium of the masses, then beliefs about the end of the world are like overdoses. People touched by such beliefs no longer rely on a hidden personal and intimate god contemplated upon from the safe distance of the beating human heart. They live with the promise of divine intervention at a grand scale on the current coordinates of space and time. This can be an exceptional motivator and a game changer in terms of civil obedience both at an individual and collective level. In the name of an immediate and palpable deity, people can commit shocking cruelties. However, such belief can also account for some of the most exceptional social developments in human history.
