The International Lesson Annual, 1983-84 Horace R. Weaver, Charles M. Laymon, 1983-05-01 **In Good Times**

Prepare for Crisis Ira Lieberman, 2018-10-09 Sovereign debt crises are a little like the weather One can get ready to endure them and maybe take some steps to lessen their impact but so far it hasn't been possible to prevent them Like the weather they just keep happening That's the overriding thesis of this book tracing the major debt crises of the past century starting with the Great Depression and running through the recent Great Recession Written by a former World Bank expert on debt crises this book discusses best practices for how such crises can be resolved As the painful experience of the past decade reminded everyone frequent debt crises and defaults do great damage to economies and cause vast personal hardship But resolving them has proven difficult both economically and politically and has taken time almost always requiring a lender of last resort such as a country's central bank or the International Monetary Fund Too often efforts to end debt crises have been little more than a palliative and the debt overhang from one crisis contributes to the next as illustrated by the ongoing saga in Greece Both private and sovereign debts have increased substantially since the 2008 crisis with inadequate deleveraging This debt overhang leaves countries vulnerable and with limited maneuverability to address the next crisis This book does not pretend to describe how debt crises can be prevented But it does draw useful lessons from recent crises that can help economists bankers policymakers and others resolve the inevitable future crises with the least possible damage *Current*

Bellows-Blakely, 2025-05-06 An examination of how when and why austerity capitalism and strands of feminism became intertwined and why girl focused programs have been at the heart of international policymaking Girl focused education programs have long been at the heart of international policymaking when girls access to education is ensured the reasoning goes they are more likely to turn into productive adults who can drive economic growth These ideas combine strands of feminism and capitalism that have a specific and understudied origin In this book historian Sarah Bellows Blakely shows how a doctored study of girls education in East and Southern Africa led to the creation of international norms in the United Nations that would go on to guide policymaking on women's rights and economic growth promoting neoliberal feminist policy at the expense of other forms of gender based justice Focusing on the growth of free market feminism and girl focused economic development planning through the relationship between UNICEF and the Nairobi based NGO FEMNET Bellows Blakely reveals how their joint efforts set the blueprints for linked movements of economic development and women's rights that are still ongoing Through a narrative of the UNICEF FEMNET lobbying campaign Bellows Blakely shows how multiple contested girl focused visions of economic programming and gender justice became selectively erased in favor of an

approach to global policy centered on the free market construction and strategic deployment of the African girl child
