identity within sociology and associated human sciences In the early chapters Robin Williams draws on a range of historical and contemporary sources to describe and discuss some common images of identity as subjective achievement as social location and as discursive effect In later chapters the author explores recent empirical studies which have argued for the suspension or modification of conventional theoretical assertions about how and why identity matters to human subjects in their ordinary lives Williams concludes by endorsing recent arguments for detailed descriptions of the ways in which identity matters arise and are dealt with within and through the accountability of social interaction Making Identity Matter will be essential reading for all those involved in the human sciences who are concerned to understand the significance accorded to identity within the wider effort to examine the relationship between subjectivity action and social and cultural institutions

**The Identity of Christian Morality** Dr Ann Marie Mealey, 2013-05-28 This book argues that moral theology has yet to embrace the recommendations of the Second Vatican Council concerning the ways in which it is to be renewed One of the reasons for this is the lack of consensus between theologians regarding the nature content and uniqueness of Christian morality After highlighting the strengths and weaknesses of the so called autonomy and faith ethic schools of thought Mealey argues that there is little dividing them and that in some instances both schools are simply defending one aspect of a hermeneutical dialectic In an attempt to move away from the divisions between proponents of the faith ethic and autonomy positions Mealey enlists the help of the hermeneutical theory of Paul Ricoeur She argues that many of the disagreements arising from the Christian proprium debate can be overcome if scholars look to the possibilities opened up by Ricoeur's hermeneutics of interpretation Mealey also argues that the uniqueness of Christian morality is more adequately explained in terms of a specific identity self that is constantly subject to change and revision in light of many often conflicting moral sources She advocates a move away from attempts to explain the uniqueness of Christian morality in terms of one specific unchanging context motivation norm divine command or value By embracing the possibilities opened up by Ricoeurian hermeneutics Mealey explains how concepts such as revelation tradition orthodoxy and moral conscience may be understood in a hermeneutical way without being deemed sectarian or unorthodox [The Israeli Palestinians](#) Alexander
