Abstract The purpose of this study was to determine whether there were differences in the prevalence of self-reported depression between men and women who had been exposed to violence by intimate partners. Data from the National Longitudinal Study of Women's Health are used. Results show that among women who reported being sexually abused by their current or former partner, 10% reported having experienced depression during the past year compared to 6% of those who did not report sexual abuse. Among women who reported physical abuse by their current or former partner, 17% reported experiencing depression during the past year compared to 9% of those who did not report physical abuse. These results suggest that exposure to violence by intimate partners is associated with higher rates of self-reported depression.

The Image of Celestina Enrique Fernández, 2024-01-31 La Celestina a Spanish literary masterpiece second only in importance to Don Quixote in Spanish literature has been shaped by the inclusion of images from its very first edition in 1499 The subsequent five centuries were punctuated by many illustrated editions imaginary portraits of the eponymous procuress Celestina by painters such as Murillo Goya and Picasso and more recently screen and stage adaptations Celestina became the prototype from which later representations of procuresses and bawds derived The Image of Celestina sheds light on the visual culture that developed around La Celestina including paintings illustrations and advertisements Enrique Fernández examines La Celestina as a mixed media text incorporating methods from disciplines such as art history and women's and cinema studies and considers a variety of images including promotional posters lobby pictures and playbills of theatrical and cinematic adaptations of the book Using a visual studies approach The Image of Celestina ultimately illuminates the culture of Celestina a mythical figure who surpasses the literary text in which she originated

Symbols and the Image of the State in Eurasia Anita Sengupta, 2016-10-14 This book discusses the significance of cultural symbols images in the nation building of Eurasian states that emerged out of the former Soviet Union It particularly focuses on the cases of Uzbekistan and Kazakhstan in the post Soviet era and argues that the relationship between nation and image building has been particularly relevant for Eurasian states In an increasingly globalized world nation state building is no longer an activity confined to the domestic arena The situating of the state within the global space and its image in the international community nation branding becomes in many ways as crucial as the projection of homogeneity within the state The relationship between politics and cultural symbols images therefore acquires and represents multiple possibilities It is these possibilities that are the focus of Symbols and the Image of the State in Eurasia It argues that the relationship between politics and cultural symbols images became particularly relevant for states that emerged in the wake of the disintegration of the Soviet Union in Central Asia It extends the argument further to contend that the image that the state projects is largely determined by its legacy and it attempts to do this by taking into account the Uzbek and Kazakh cases In the shaping of the post Soviet future these legacies and projections as well as the policy implications of these projections in terms of governmentality and foreign policy have been decisive

The Image of Man in Selected Plays of August Wilson Shamal Abu-Baker Hussein, 2012

Wilson's approach can be seen as a communal romanticism dealing with ordinary people language and problems giving the priority to the feeling and human dignity over logic power and money putting freedom and equity as a pivotal concern almost presenting women and children as victims and highlighting the importance of heritage identity and culture As his self revision message all those three plays demonstrate scenes of black self review showing the blacks part of responsibility in the situation they live in It is a project of self rehabilitation for the blacks Since American society is a multicultural spectrum there is not any certain legibly ascribed American identity That is why Wilson does not submit to the claims of the dominant cultural trend by some white critics like Brustein Wilson confidently presents the blacks identity typified with self fulfilment and contribution to the American culture as his alternative contributory image of man against the white dominant models or the violent black ones

One of the significant advantages of The Image books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes.
