Rada, 1982 UNESCO pub Monograph on the economic implications and social implications of microelectronics and data processing technology comprising case studies of Argentina Brazil and Bolivia examines the speed of diffusion and impact on production production costs employment opportunities skill requirements international division of labour etc and stresses the need for sound industrial policies and science policies to obtain benefits and to neutralise likely negative effects Diagrams graphs and references **The Socio-Economic Impact of Microelectronics** J. Berting, S. C. Mills, H. Wintersberger, 2013-10-22 The Socio Economic Impact of Microelectronics contains papers presented at an international conference on socio economic problems and potentialities of the application of micro electronics held in Zandvoort the Netherlands in September 1979 Organized into eight sections this book begins with the technological evaluation of microelectronics Subsequent sections focus on the social economic and political consequences of the widespread use of microelectronics opportunities and problems for socialist countries brought about by microelectronics technology effects of microelectronics on developing countries as well as problems connected with industrial relations and organization of work The influence of the technology on political economic epistemological ethical moral and esthetic values and a broad concept of informatics introducing the notions of living and non living environments as well as of human non human constructed natural and abstract systems are explained The last section contains the conclusions of the chairman of the conference on the application of microelectronics

The Impact of Micro-electronics J. Rada, 1980 The Social and Economic Impact of New Technology 1978-84: A Select Bibliography Leslie Grayson, 2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of

information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts

Methods and Materials in Microelectronic Technology Joachim Bargon, 2013-03-09 The papers collected in this volume were presented at the International Symposium on Methods and Materials in Microelectronic Technology This symposium was sponsored by IBM Germany and it was held September 29 October 1 1982 in Bad Neuenahr West Germany The progress of semiconductor and microelectronic technology has become so rapid and the field so sophisticated that it is imperative to exchange the latest insight gained as frequently as it can be accomplished In addition it is peculiar for this field that the bulk of the investigations are carried out at industrial research and development laboratories which makes some of the results less readily accessible Because of these circumstances the academic community which among other things is supposed to communicate the progress in this field to students of different disciplines finds it rather difficult to stay properly informed It was the intent of this IBM sponsored symposium to bring together key scientists from academic institutions primarily from Europe with principal investigators of the industrial scene Accordingly this symposium exposed technologists to scientists and vice versa Scientific advances often lead directly to technological innovations In turn new technologies are often arrived at empirically and because of that are initially poorly understood Scientific inquiry then attempts to probe these processes and phenomena in order to achieve a better understanding Thus science and technology are intricately interconnected and it is important that technical exchange between technologists and scientists is facilitated since the problems are typically interdisciplinary in nature
