PRADEEP YADAV, MR. ARUN AGARWAL, MS. MONIKA CHAUHAN, 2020-01-14 Maternal and newborn care is a critical area in healthcare with significant implications for public health. Innovations in this field have the potential to drastically improve outcomes, reduce mortality rates, and enhance the quality of life for mothers and their infants. This chapter provides an overview of the current landscape of maternal and newborn care, highlighting the importance of innovation in addressing existing challenges. It outlines the types of innovations being implemented, their benefits, and the barriers to their adoption. Maternal and newborn health is a cornerstone of global health, significantly impacting family and community well-being. According to the World Health Organization (WHO), improving maternal and newborn health is essential for reducing maternal and infant mortality rates, preventing complications during childbirth, and ensuring healthy development in the early stages of life. WHO 2015 Medical Technology Assessment Directory Institute of Medicine, Council on Health Care Technology, 1988-02-01 For the first time, a single reference identifies medical technology assessment programs. A valuable guide to the field, this directory contains more than 60 profiles of programs that conduct and report on medical technology assessments. Each profile includes a listing of report citations for that program, and all the reports are indexed under major subject headings. Also included is a cross-listing of technology assessment report citations arranged by type of technology, headings, brief descriptions of approximately 70 information sources of potential interest to technology assessors, and addresses and descriptions of 70 organizations with memberships, activities, publications, and other functions relevant to the medical technology assessment community. **The Nation's Health** Leiyu Shi, Douglas A.
