**The Improvement of Productivity** Hofstra University. School of Business,1980  
**Productivity** John E. Ullmann,1980-04-01 Personnel Literature ,1984 Technology and Transformation in the American Electric Utility Industry Richard F. Hirsh,2003-11-20 This book illuminates the role of technological stagnation in the decline of the American electric utility industry in the late 1960s and 1970s Unlike other interpreters of the industry s woes Professor Hirsh argues that a long and successful history of managing a conventional technology set the stage for the industry s deterioration After improving steadily for decades the technology that brought unequalled productivity growth to the industry appeared to stall in the late 1960s making it impossible to mitigate the economic and regulatory assaults of the 1970s Unfortunately most managers did not recognize or did not want to believe the severity of the technological problems they faced and they chose to focus instead on issues usually financial or public relations that appeared more manageable Partly as a result of this lack of attention to technological issues the industry found itself in the 1980s challenged by the prospects of deregulation and restructuring  
The Great Boom 1950-2000 Robert Sobel,2016-02-09 In The Great Boom historian Robert Sobel tells the fascinating story of the last 50 years when American entrepreneurs visionaries and ordinary citizens transformed our depression and war exhausted society into today s economic powerhouse As America s G I s returned home from World War II many of the nation s best minds predicted a new depression yet exactly the opposite occurred Jobs were plentiful in retooled factories swamped with orders from pent up demand Tens of thousands of families moved out of cities into affordable suburban homes built by William Levitt and his imitators They bought cars televisions and air conditioners by the millions And they took to the nation s roads and new interstate highways the largest public works project in world history where Kemmons Wilson of Holiday Inns Ray Kroc of McDonalds and other start up entrepreneurs soon catered to a mobile populace with food and lodgings for leisure time vacationers Americans and their families began to channel savings into new opportunities Credit cards democratized purchasing power while early mutual funds found growing numbers of investors to fuel the first postwar bull market in the go go 60s At the same time the continuing boom enriched the fabric of social and cultural life A college education became a must on the highway to upward mobility high tech industries arose with astonishing new ways of conducting business electronically and an unprecedented 49 million families had become investors when the 1981 2000 stock market boom reached 10 000 on the Dow The Great Boom is the first major book to portray the great wave of homegrown entrepreneurs as post war heroes in the complete remaking and revitalizing of America All that plus the creation of unprecedented wealth or themselves for the nation for tens of millions of citizens all in five short drama filled decades  
The Global Economics of Forestry William F. Hyde,2012-05-23 This book traces the economic and biological pattern of forest development from initial settlement and harvest activity at the natural forest frontier to modern industrial forest plantations It builds from diagrams describing three discrete stages of forest

development and then discusses the management and policy implications associated with each supporting its observations with examples and data from six continents and from both developed and developing countries It shows that characteristic distinctions between the three stages make forestry unusual in natural resource management and that effective policy requires different even contrasting decisions at each stage William F Hyde s comprehensive discussion covers a wide range of issues including the impacts of both specific forest policies and broader macroeconomic policies the unique requirements of current issues such as global warming biodiversity and tourism and the complexities of the different forest products industries Concluding chapters review the roles of the newer institutional landowners of smaller private and farm landowners and of public agencies This highly original volume reaches far beyond forest economics it explains what forestry can do for regional development and environmental conservation and what policies designed for other sectors and the macro economy can do for forestry

**Recent Social Trends in the United States, 1960-1990** Theodore Caplow, Howard M. Bahr, John Modell, Bruce A. Chadwick, 1994-03-21 On Rachel Carson and her work and on current environmental challenges The four authors present information on various American trends demographic macroeconomic and macro technological Descriptions tables and graphs trace the dynamics of population specifically in relation to the expansion which followed the 1982 83 recession and analyze achievements in intelligence genetic engineering and space travel Annotation copyrighted by Book News Inc Portland OR
