The International Containment Of Displaced Persons Humanitarian Spaces Without Exit:

The International Containment of Displaced Persons Cecile Dubernet, 2017-07-12 This title was first published in 2001 This work examines four post Cold War interventions launched on behalf of people on the move international action in Iraq Bosnia Somalia and Rwanda Because these crises accompanied the emergence of the concept of Internationally Displaced Persons IDPs in international relations they have shaped the understandings of forced displacement issues such as ethnic cleansing need and humanitarian action The author looks at attitudes towards IDPs concluding that UN backed interventions regarding displaced civilians were primarily about deterring sometimes preventing them from escaping places of conflict Protection in this context became a device by which international protagonists sought to contain people on the move within the confines of their collapsed states As a result levels of safety effectively granted by the international community depended less on the vulnerability of populations than on Western fears of mass border crossings

Would the World Be Better Without the UN? Thomas G. Weiss, 2018-02-20 Do we need the United Nations Where would the contemporary world be without its largest intergovernmental organization And where could it be had the UN s member states and staff performed better These fundamental questions are explored by the leading analyst of UN history and politics Thomas G Weiss in this hard hitting authoritative book While counterfactuals are often dismissed as academic contrivances they can serve to focus the mind and here Weiss uses them to ably demonstrate the pluses and minuses of multilateral cooperation He is not shy about UN achievements and failures drawn from its ideas and operations in its three substantive pillars of activities international peace and security human rights and humanitarian action and sustainable development But he argues the inward looking and populist movements in electoral politics worldwide make robust multilateralism more not less compelling The selection of António Guterres as the ninth UN secretary general should rekindle critical thinking about the potential for international cooperation There is a desperate need to reinvigorate and update rather than jettison the United Nations in responding to threats from climate change to pandemics from proliferation to terrorism Weiss tells you why and how

for refugees Sadako Ogata Internal Displacement will appeal to students and scholars with interests in war and peace forced migration human rights and global governance *UNHCR* Associate Professor Department of International Development Alexander Betts, Chairman of the External Advisory Board to the United Nations High Commissioner for Refugees in Geneva and Professor of International Relations Gil Loescher, James Milner, 2008-08 This is a concise and comprehensive introduction to both the world of refugees and the UN organization that protects and assists them Written by experts in the field this is one of the very few books that trace the relationship between state interests global politics and the work of the United Nations High Commissioner for Refugees *UNHCR Looking ahead into the twenty first century* the authors outline how the changing nature of conflict and displacement poses *UNHCR* with a new array of challenges and how there exists a fundamental tension between the UN's human rights agenda of protecting refugees fleeing conflict and persecution and the security political and economic interests of states around the world Key topics discussed include The *UNHCR* as an actor in world politics since 1950 Refugee definition and protection instruments New challenges to the *UNHCR*'s mandate Institutional strengths and weaknesses Asylum crises in the global North and global South Protracted refugee situations and internally displaced persons Key criticisms and continuing relevance of the *UNHCR* [What's Wrong with the United Nations and How to Fix it](#) Thomas G. Weiss, 2009 Six decades after its establishment the United Nations and its system of related agencies and programs is perpetually in crisis While World War I and World War II gave rise to ground breaking efforts at international organization in 1919 and 1945 the UN today seems ill equipped to deal with modern challenges to world order Neither the end of the Cold War nor the aftermath of 9 11 has led to the creation of a next generation of multilateral institutions But what exactly is wrong with the UN and how can we fix it Is it possible to retrofit the world body In this succinct and illuminating analysis Thomas G Weiss takes a diagnosis and cure approach to the world organization's inherent difficulties In the first half of the book he considers the problems of international leadership and decision making in a world of self interested states the diplomatic difficulties caused by the artificial divisions between the industrialized North and the global South the structural problems of managing the UN's many overlapping jurisdictions agencies and bodies and the ever demanding challenges of bureaucracy and leadership The second half examines how to mitigate these maladies and points the way to a more ideal world in which the UN's institutional ills might be cured His remedies are not based on pious hopes of a miracle cure for the UN but rather on specific and encouraging examples that could be replicated With considered optimism and in contrast to received wisdom Weiss contends that substantial change in intergovernmental institutions is plausible and possible This indispensable book will spark debate amongst students scholars and policy makers concerned with international politics as well as anyone genuinely interested in the future of the United Nations and international cooperation **Refuge beyond Reach** David Scott FitzGerald, 2019-03-14 Why do people seeking asylum often break immigration laws *Refuge Beyond Reach* shows how rich democracies deliberately and systematically shut down most legal

paths to safety An architecture of repulsion in the air at sea and on land keeps most refugees far away from places where they can ask for sanctuary

Individual Agency and Policy Change at the United Nations Ingvild Bode, 2015-03-24 This book highlights how temporary international civil servants play a crucial role in initiating processes of legal and institutional change in the United Nations system These individuals are the missing creative elements needed to fully understand the emergence and initial spread of UN ideas such as human development sovereignty as responsibility and multifunctional peacekeeping The book Shows that that temporary UN officials are an actor category which is empirically crucial yet usually neglected in analytical studies of the UN system Focussing on these particular individual actors therefore allows for a better understanding of complex UN decision making Demonstrates how these civil servants matter looking at what their agency is based on Offering a new and distinctive model Bode seeks to move towards a comprehensive conceptualisation of individual agency which is currently conspicuous for its absence in many theoretical approaches that address policy change Uses three key case studies of international civil servants Francis Deng Mahbub ul Haq and Marrack Goulding to explore the possibilities of this specific group of UN individuals to act as agents of change and thereby test the prevailing notion that international bureaucrats can only act as agents of the status quo This book will be of great interest to students and scholars of international organizations and the United Nations

Biopolitics, Governmentality and Humanitarianism Volha Piotukh, 2015-04-10 This book critically analyses the changing role and nature of post Cold War humanitarianism using Foucault's theories of biopolitics and governmentality It offers a compelling and insightful interpretation of the policies and practices associated with new humanitarianism in general as well as of the dynamics of two specific international assistance efforts the post 2001 conflict related assistance effort in Afghanistan and the post 2000 Chernobyl related assistance effort in Belarus The central argument of the book is that new humanitarianism represents a dominant regime of humanitarian governing informed by globalising neoliberalism and is reliant on a complex set of biopolitical disciplinary and sovereign technologies It demonstrates that while the purposes of humanitarian governing are specific to particular contexts its promise of care is more often than not accompanied by sovereign and or biopolitical violences Making an important contribution to existing scholarship on humanitarian emergencies and humanitarian action on biopolitics and governmentality this book will be of much interest to students and scholars of humanitarianism critical security studies governmentality and International Relations generally
