Foreign Affairs, 1961 **An Act for International Development** United States. President's Task Force on Foreign Economic Assistance, 1961 **Inventory of Federal Programs Involving Educational Activities Concerned with Improving International Understanding and Cooperation** United States. Office of Education. Institute of International Studies, 1969 **Working with Assumptions in International Development Program Evaluation** Apollo M. Nkwake, 2019-11-27

This book discusses the crucial place that assumptions hold in conceptualizing implementing and evaluating development programs It suggests simple ways for stakeholders and evaluators to 1 examine their assumptions about program theory and environmental conditions and 2 develop and carry out effective program monitoring and evaluation in light of those assumptions A survey of evaluators from an international development agency reviewed the state of practice on assumptions aware evaluation This 2nd edition has been updated with further illustrations case studies and frameworks that have been researched and tested in the years since the first edition Regardless of geography or goal development programs and policies are fueled by a complex network of implicit ideas Stakeholders may hold assumptions about purposes outcomes methodology and the value of project evaluation and evaluators which may or may not be shared by the evaluators A major barrier to viable program evaluations is that development programs are based on assumptions that often are not well articulated In designing programs stakeholders often lack clear outlines for how implemented interventions will bring desired changes This lack of clarity masks critical risks to program success and makes it challenging to evaluate such programs Methods that have attempted to address this dilemma have been popularized as theory of change or other theory based approaches Often however theory based methods do not sufficiently clarify how program managers or evaluators should work with the assumptions inherent in the connections between the steps The critical examination of assumptions in evaluation is essential for effective evaluations and evaluative thinking How does one think evaluatively It all begins with assumptions Systematically articulating examining and testing assumptions is the foundation of evaluative thinking This book more than any other explains how to build a strong foundation for effective interventions and useful evaluation by rigorously working with assumptions Michael Quinn Patton PhD Author of Utilization Focused Evaluation and co editor of THOUGHTWORK Thinking Action and the Fate of the World USA This updated edition presents us with a new opportunity to delve into both the theoretical and practical aspects of paradigmatic prescriptive and causal assumptions We need to learn and apply these insights with the deep attention they deserve Zenda Ofir PhD Independent Evaluator Richard von Weizsäcker Fellow Robert Bosch Academy Berlin Germany Honorary Professor School of Public Leadership Stellenbosch University South Africa This thought provoking book explains why assumptions are an essential condition within the theories and methodologies of evaluation and how assumptions influence the ways that

evaluators approach their work It will enrich the ways that evaluators develop their models devise their methodologies interpret their data and interact with their stakeholders Jonny Morell Ph D President 4 669 Evaluation and Planning Editor Emeritus Evaluation and Program Planning International Development and Humanitarian Assistance Act of 1971 United States.
